Ending Hunger Frederick A. Praeger, The Hunger Project, 1985-08-15 Not too long ago only poets and dreamers imagined a world without hunger and starvation Today the world's expert community scientists agricultural specialists development professionals working with governments the UN and private voluntary organizations is united in its declaration that hunger can be eliminated from the face of our planet by the year 2000 Compiled by the Hunger Project a non profit group established in 1977 *Ending Hunger An Idea Whose Time Has Come* is the definitive source and reference book to one of the greatest opportunities humanity has ever faced the end of hunger by the end of the century Written in response to a growing grassroots demand for up to date information about world hunger and how to end it *Ending Hunger* brings together for the first time in one place the full range of expert thinking and approaches to eradicating humanity's oldest and most persistent enemy A product of five years research with the essential information facts and data they need to learn about how they can help to end hunger

Whose Hunger? Jenny Edkins, 2000 We see famine and look for the likely causes poor food distribution unstable regimes caprices of weather A technical problem we tell ourselves one that modern social and natural science will someday resolve To the contrary Jenny Edkins responds in this book Famine in the contemporary world is not the antithesis of modernity but its symptom A critical investigation of hunger famine and aid practices in international politics *Whose Hunger* shows how the forms and ideas of modernity frame our understanding of famine and consequently shape our responses

Can't Not Do Paul Shoemaker, 2015-07-20 With so many social challenges facing our world trying to effect change feels daunting The problems are complex the politics murky and the players innumerable Yet every day there are regular heroes making a significant impact on our most intractable social issues *Can't Not Do* is a catchphrase for the urge that captures the heart of effective social change agents explaining in their own words their passion and drive I can't not do this It's not that I can do this it's that I can't not I could not imagine not doing something about this issue The surprising truth from the trenches is we already have numerous proven solutions for our many social challenges what our world needs most and what most changes our children's future are more people prepared and committed to act on their social impulses for the long haul Innovation helps Money helps too But greater numbers of committed people help the most If you feel an internal persistent call to do more for the world *Can't Not Do* will help you to bridge the gap between wanting to do and doing to access the drive of an effective change agent to break through self imposed barriers to learn key principles for success and to start seeing yourself acting as a change agent There is no secret sauce someone is born with and no special club needed to be successful at social change Rather successful change agents share some fundamental orientations to the world and to their committed cause and over time learn certain lessons that help

them become more effective These lessons are reflected in Can t Not Do in seven seemingly simple questions that provide guideposts and unlock the reader s potential to make a difference for a social cause they care about This isn t a self help book It s an inspiring narrative intertwined with a street readiness dialogue between the author and you between you and your inner aspirations These are authentic success stories vital questions and unconventional answers that can guide and inspire you to realize your greatest potential

Food Policy Tim Lang,David Barling,Martin Caraher,2009-03-19 For over half a century food policy has mapped a path for progress based upon a belief that the right mix of investment scientific input and human skills could unleash a surge in productive capacity which would resolve humanity s food related health and welfare problems It assumed that more food would yield greater health and happiness by driving down prices increasing availability and feeding more mouths In the 21st century this policy mix is quietly becoming unstuck In a world marred by obesity alongside malnutrition climate change alongside fuel and energy crises water stress alongside more mouths to feed and social inequalities alongside unprecedented accumulation of wealth the old rubric of food policy needs re evaluation This book explores the enormity of what the new policy mix must address taking the approach that food policy must be inextricably linked with public health environmental damage and social inequalities to be effective Written by three authors with differing backgrounds one in political science another in environmental health and health promotion and the third in social psychology this book reflects the myriad of perspectives essential to a comprehensive view of modern food policy It attempts to make sense of what is meant by food policy explores whether the term has any currency in current policy discourse assesses whether current policies help or hinder what happens judges whether consensus can triumph in the face of competing bids for understanding looks at all levels of governance across the range of actors in the food system from companies and the state to civil society and science considers what direction food policies are taking not just in the UK but internationally assesses who and what gains or loses in the making of these food policies and identifies a modern framework for judging how good or limited processes of policy making are This book provides a major comprehensive review of current and past food policy thinking and proposing the need for what the authors call an ecological public health approach to food policy Nothing less will be fit for the 21st century

Economics of Agricultural Development George W. Norton, Jeffrey Alwang, William A. Masters, 2009-12-22 The globalization of goods services and capital for agriculture is fundamental to the future of developing countries and has major implications for the fight against poverty and sustainability of the environment In recent years agriculture has once again returned to a position of centre

stage as food price volatility has led countries to re-examine their development strategies. This new edition of the essential textbook in the field builds on the 2006 original and reflects the following developments: the increased impact of climate change issues affecting agricultural markets such as bio-fuels, the rise in farm prices and energy costs, the move to higher valued agricultural products. The book contains a wealth of real world case studies and is now accompanied by a website that includes powerpoint lectures, a photo bank and a large set of discussion and exam questions.
