Drying Technology in Food Processing Seid Mahdi Jafari, Narjes Malekjani, 2023-05-08 Drying Technology in Food Processing in the Unit Operations and Processing Equipment in the Food Industry series explains the processing operations and equipment necessary for drying of different food products. These processes and unit operations are very important in terms of qualitative properties and energy usage. Divided into four sections: Drying basics, Different dryers in the food industry, Application of drying in the food industry and Design, control and efficiency of dryers, all chapters emphasize experimental, theoretical, computational and/or applications of food engineering principles and the relevant processing equipment. Written by experts in the field of food engineering in a simple and dynamic way, this book targets industrial engineers working in the field of food processing and within food factories to make them more familiar with drying unit operations. Thoroughly explores novel applications of drying unit operations in food industries. Strives to help improve the quality and safety of food products with drying.
