Caputo, 2011-01-20 U S Social Welfare Reform examines pivotal changes in social welfare for low income families in the United States between 1981 the advent of the Reagan administration and 2008 the end of the G W Bush administration It focuses on the change from the Federal state open entitlement Aid to Families with Dependent Children AFDC program to the time limited state run Temporary Assistance to Needy Families TANF program which Congress authorized with passage of the Personal Responsibility and Work Opportunity Act of 1996 The book also focuses on the development of the Earned Income Tax Credit EITC program enacted in 1975 against the backdrop of failed efforts to nationalize AFDC which aimed at providing a basic income to all poor families but which blossomed with continued bipartisan support in the 1990s This book also explores alternative strategies to assist low income families including job training programs It presents original research on the educational and economic well being of youth from low income families who participated in government sponsored job training programs in the late 1970 and early 1980s The book seeks a middle ground between general and technical social policy texts It provides more depth than is available in the more general social policy texts Further while the more comprehensive texts often rely on government documents and reports relying on Current Population Survey data to profile program use this book relies on panel data from the National Longitudinal Surveys and presents original research that builds upon prior related research and scholarship about the role of the federal government in social welfare provisioning in general and AFDC TANF and EITC use in particular and on school to work transition programs It presents related technical material in a narrative style better suited to professionals and policy makers who may lack expertise in quantitative analysis

*Financing Infrastructure* Richard M. Bird, Enid Slack, 2017-12-04 Politicians and citizens universally agree that Canada's urban infrastructure urgently needs work Roads and bridges are overdue for repair aging water systems should be replaced sewage must be adequately treated urban transit needs to be updated and extended and it is necessary that public housing as well as schools health centres and government offices are brought up to current standards But few cities have room to

raise additional revenue and the federal and provincial governments to which they turn for financial support are already in deficit so who is going to pay for all of this Bringing together perspectives and case studies from across Canada the US and Europe Financing Infrastructure argues that the answer to the question Who should pay should always be users Headed by two of Canada's foremost experts on municipal finance this book provides a closer look at why charging user fees makes sense how much users should pay how to charge fees well and where present processes can be improved and how to convince the politicians and the public of the importance of pricing infrastructure correctly Across the disciplines of public policy urban studies and economics almost no one is looking at the extent to which users should play a role in infrastructure planning Financing Infrastructure contends that the users not federal and provincial taxpayers should start paying directly for their cities repairs and expansions Contributors include Richard M Bird University of Toronto Bernard Dafflon University of Fribourg Switzerland Robert D Ebel Local Governance Innovation and Development Harry Kitchen Trent University Jean Philippe Meloche Universit de Montr al Matti Siemiatycki University of Toronto Enid Slack University of Toronto Almos T Tassonyi University of Calgary Lindsay M Tedds University of Victoria Fran ois Vaillancourt Universit de Montr al and Yameng Wang World Bank **Tax Expenditures..., December 2006, 109-2 Committee Print S. \* ,2003      **Special Features of the UN Model Convention** Anna Binder,Viktoria Wöhrer,2019-10-01 Detailed research on the UN Model Convention s unique features The UN Model Convention has a significant influence on international tax treaty practice and is especially used by emerging and developing countries as a starting point for treaty negotiations Driven by the aim to achieve consistency in the international tax treaty practice the structure and content is to a large extent similar in the UN Model and the OECD Model However whereas the OECD has historically focused its efforts on issues mainly relevant for developed countries the UN Tax Committee has continuously attempted to specifically take into account tax treaty policies for developing countries when drafting and amending the UN Model Convention Compared to the OECD Model Convention the UN Model Convention aims at giving more weight to the source principle Popular examples are the PE definition in the UN Model which provides for a lower threshold than Article 5 of the OECD Model or Article 12A on Fees for Technical Services which has been introduced with the latest amendment of the UN Model Convention 2017 and allows for a withholding tax to be levied on payments to non residents when the payer of the fee is a resident of that contracting State irrespective of where the services are provided Interestingly in the discussions of the tax challenges arising from the digitalization of the economy the OECD and the G20 are also exploring options to allocate more taxing rights to the jurisdiction of the customer and or user i e the market jurisdictions As this has traditionally been the focus of the UN Model Convention its unique features and developing countries practices could be taken into account when exploring new nexus rules that are not constrained by the physical presence requirement This book contains the master s theses of the full time LL M program 2018 2019 for which Special Features of the UN Model Convention has been chosen as the general topic With this book the authors and editors do not aim at discussing each article of the UN Model Convention but rather focus on the unique features of the UN Model Convention which are explored in detail This is supplemented with an evaluation of the function and relevance of the UN Tax Committee in the international tax policy discussion and with an analysis of the influences of the OECD s BEPS project on the UN Model      **Guide to Reference in Business and Economics** Steven W.
