Community Action and Organizational Change Brenton D. Faber, 2002 Faber technical communications Clarkson U examines issues relating to the process of organizational change and the process of researching such change including how people cope with create adapt to and resist change how people research and talk about it and the links created and severed between theory and practice the researcher and the researched and the academic and the community The text combines theoretical discussions of these issues drawing on the work of Michel Foucault Anthony Giddens and Pierre Bourdieu with Faber s firsthand experiences in the study and implementation of change For academics businesspeople not for profit organizations and community action groups interested in a sustained examination of change Annotation copyrighted by Book News Inc Portland OR

Consultation for Organizational Change Anthony F. Buono, David W. Jamieson, 2010-09-01 This volume is a joint publication in the Research in Management Consulting and Contemporary Trends in Organizational Change and Development series This dual focus reflects the reality that consulting for organizational change is a special type of management consultation a complex field of endeavor that requires a broad range of skills and competencies To be truly effective change related consulting requires a unique client consultant relationship a special set of consulting skills an expertise in human and organizational systems and significant personal qualities It is in high demand in a world full of change Yet we still know relatively little theoretically about this type of consulting and have relatively little empirical evidence about what actually works and why As the contributors amply illustrate the Organization Development OD field has a well developed set of frameworks technologies and models of change Still we need to focus on and learn more about the role of the OD consultant as a special kind of change agent A goal of this joint volume is to increase that specific body of knowledge and provide an illustration of much needed collaboration in bringing all possible resources to bear on our understanding of an increasingly critical and essential form of consulting

Where to from Here? Stephen Duckett, 2012-02-09 Universal healthcare perhaps the most distinguishing feature of Canada s public policy is under fire criticized for its heavy expense and questionable sustainability In *Where to From Here Keeping Medicare Sustainable* Stephen Duckett defends Canadian Medicare addressing key concerns and refuting criticism while also acknowledging flaws in the system and room for improvement Duckett argues that while the fundamentals of Medicare are sound a great deal of change is necessary to keep it sustainable This book envisions a Medicare that is not static and simply responsive to problems but an active shifting system that keeps up with the evolving needs of a rapidly changing time Duckett systematically lays out proposals for incremental change across a range of areas including primary care hospitals and the health workforce *Where to From Here* Presents an unflinching defense of one of Canada s iconic policies while keeping a clear eye on the future of the nation s health

Handbook of Community Movements and Local Organizations Ram A. Cnaan,Carl Milofsky,2006-11-28 Although the way associations and the organization of local social life are intertwined is one of the oldest approaches to community study the way citizens and residents come together informally to act and solve problems has rarely been a primary focus Associations are central to important and developing areas of social theory and social action This handbook takes voluntary associations as the starting point for making sense of communities It offers a new perspective on voluntary organizations and gives an integrated yet diverse theoretical understanding of this important aspect of community life Creating Opportunities for Change and Organization Development in Southern Africa Dalitso Samson Sulamoyo,2012-12-01 This book takes the position that successful OD applications in cross cultural settings are predicated on the ability of OD experts to localize them for purposes of suiting local conditions and context Cultural frameworks have been utilized by global OD experts to understand the general cultural settings of environments in which they are working and applying OD techniques However the complexities of culture within organizations communities and countries may not always be understood within these cultural frameworks and models Assumptions of culture based or reliant on models alone can impede the successful applications of OD The author discusses the role of cultural translations of OD techniques within a southern African context It examines the approach of western consultants in a southern African environment as well as the approach of local southern African consultants as they interact with western developed OD applications in their own local environments The book uses three methods for conveying the opportunities and experience of OD in southern Africa research practitioner point of view and storytelling The author recognizes the works of renowned African scholars in the field of management as well OD practitioners carrying out innovative and pioneering work in southern Africa Their work may not have had much exposure in the West however their contributions to the field of management should be recognized OD is discussed in this book as an opportunity for change and development for southern African countries that are in democratic transitions post conflict environments and on a path of development The future of OD is explored within the context of economical global and political emerging issues The time is right for change and development in southern Africa with OD as the driving force
