**ICTs for Inclusive Communities in Developing Societies** Darelle van Greunen, Jacques Steyn, 2015-11-25 Several decades of international aid predominantly granted by the highly developed world the haves for the use of ICT in developing regions known by several labels such as the have nots bottom of the pyramid the south or some time ago the third world have passed but the holy grail of turning these societies into the ideals defined by the donors is still elusive Previously the emphasis was on top down approaches in this endeavour Now priority is increasingly given to bottom up approaches putting the targeted communities first using methods such as co creation and living labs Information and Communication Technologies for Development ICT4D is still a domain in search of a common ground The many different perspectives from diverse ideologies paradigms and theoretical perspectives here lead to an interesting debate but meanwhile agents of social change are doing their best to change communities ostensibly for the better An ongoing endeavour this discussion requires further investigation of the complexities of techno societies The contributions to this volume range from explorations of theory models and methods to investigations into the practical implementation of ICT in communities covering the characteristics of social groups and different generations and gender issues as well as its applications in education and health As such the contributions in this book will inform continuing debates concerning the role of ICT in developing communities on the wrong side of all the technical and social divides in human societies

**Technology and Social Inclusion** Mark Warschauer, 2004-09-17 Much of the discussion about new technologies and social equality has focused on the oversimplified notion of a digital divide Technology and Social Inclusion moves beyond the limited view of haves and have nots to analyze the different forms of access to information and communication technologies Drawing on theory from political science economics sociology psychology communications education and linguistics the book examines the ways in which differing access to technology contributes to social and economic stratification or inclusion The

book takes a global perspective presenting case studies from developed and developing countries including Brazil China Egypt India and the United States A central premise is that in today s society the ability to access adapt and create knowledge using information and communication technologies is critical to social inclusion This focus on social inclusion shifts the discussion of the digital divide from gaps to be overcome by providing equipment to social development challenges to be addressed through the effective integration of technology into communities institutions and societies What is most important is not so much the physical availability of computers and the Internet but rather people s ability to make use of those technologies to engage in meaningful social practices

Society of Singularities Andreas Reckwitz, 2020-04-21 Our contemporary societies place more and more emphasis on the singular and the unique The industrial societies of the early 20th century produced standardized products cities subjects and organizations which tended to look the same but in our late modern societies we value the exceptional unique objects experiences places individuals events and communities which are beyond the ordinary and which claim a certain authenticity Industrial society s logic of the general has been replaced by late modernity s logic of the particular In this major new book Andreas Reckwitz examines the causes structures and consequences of the society of singularities in which we now live The transformation from industrial to cultural capitalism the rise of digital technologies and their culture machine and the emergence of an educated urban new middle class form a powerful engine for the singularization of the social In late modernity what is singular is valorized and stirs the emotions while what is general has to remain in the background and this has profound social consequences The society of singularities systematically produces devaluation and inequality winner takes all markets job polarization the neglect of rural regions and the alienation of the traditional middle class The emergence of populism and the rise of aggressive forms of nationalism which emphasize the cultural authenticity of one s own people thus turn out to be the other side of singularization This prize winning book offers a new perspective on how modern societies have changed in recent decades and it will be of great value to anyone interested in the forces that are shaping our world today
