**Real Food, Real Facts** Charlotte Biltekoff, 2024-08-27 A free ebook version of this title is available through Luminos University of California Press's Open Access publishing program Visit [www.luminosoa.org](http://www.luminosoa.org) to learn more In recent decades many members of the public have come to see processed food as a problem that needs to be solved by eating real food and reforming the food system But for many food industry professionals the problem is not processed food or the food system itself but misperceptions and irrational fears caused by the public's lack of scientific understanding In her highly original book Charlotte Biltekoff explores the role that science and scientific authority play in food industry responses to consumer concerns about what we eat and how it is made As Biltekoff documents industry efforts to correct public misperceptions through science based education have consistently misunderstood the public's concerns which she argues are an expression of politics This has entrenched food scientism in public discourse and seeded a form of antipolitics with broad consequences Real Food Real Facts offers lessons that extend well beyond food choice and will appeal to readers interested in how everyday people come to accept or reject scientific authority in matters of personal health and well being

**Vicente Ximenes, LBJ's Great Society, and Mexican American Civil Rights Rhetoric** Michelle Hall Kells, 2018 Beginning as a grassroots organizer in the 1950s Vicente Ximenes was at the forefront of the movement for Mexican American civil rights through three presidential administrations joining Lyndon B Johnson's Great Society and later emerging as one of the highest ranking appointees in Johnson's administration One of the most influential government representatives of Mexican American issues in recent history Ximenes succeeded largely because he could adapt his rhetoric for different audiences in his speeches and writings In *Vicente Ximenes LBJ's Great Society and Mexican American Civil Rights Rhetoric* Michelle Hall Kells elucidates Ximenes's achievement through a rhetorical history of his career as an activist Kells draws on Ximenes's extensive archive of speeches reports articles and oral interviews to present the activist's rhetorical history and begins each chapter with an excerpt from the collection that showcases Ximenes's ability to negotiate multiple public spheres Exploring Ximenes's legacy against the backdrop of the Cold War era Kells's analyses illustrate how Ximenes effectively agitated for open inclusive and pluralist democracy at regional and national levels After a

discussion of Ximenes's early life the author focuses on his career as an activist examining Ximenes's leadership in several key civil rights events including the historic 1967 White House cabinet committee hearings on Mexican American Affairs and highlighting his role in advancing Mexican Americans and Latinos from social marginalization to greater representation in national politics Kells concludes by reflecting on the later years of Ximenes's life and his contributions to the post World War II civil rights movement Vicente Ximenes LBJ's Great Society and Mexican American Civil Rights Rhetoric shows us a remarkable man who dedicated the majority of his life to public service using rhetoric to mobilize activists for change at the grassroots level as well as at the highest levels of government to secure civil rights advances for his fellow Mexican Americans

**Global Rhetorics of Science** Lynda C. Olman,2023-09-01 With this volume the field of rhetoric of science joins its sister disciplines in history and philosophy in challenging the dominance of Euro American science as a global epistemology The discipline of rhetoric understands world making and community building as interdependent activities that is if we practice science differently we do politics differently and vice versa This wider aperture seems crucial at a time when we are confronted with the limitations of Euro American science and politics in managing global risks such as pandemics and climate change particularly in our most vulnerable communities The contributors to this volume draw on their familiarity with a wide range of global scientific traditions from Australian Aboriginal ecology to West African medicine to Polynesian navigation science to suggest possibilities for reconfiguring the relationship between science and politics to better manage global risks These possibilities should not only inspire scholars in rhetoric and technical communication but should also introduce readers from science and technology studies to some useful new approaches to the problem of decolonizing scenes of scientific practice around the world
