Arianne Reimerik

El autor nos explica el porque de esta aplicación, cómo surgió históricamente y que finalidad tiene para ayudar tanto a estudiantes e investigadores especializados en diversos temas a redactar y traducir artículos científicos de calidad; promoviendo así la libre producción y publicación de los mismos.

Todo esto con la intención de buscar solución a los problemas reales a los que se enfrentan los estudiantes a la hora de escribir un texto científico en inglés debido a su contenido gramatical. Por último, describe el funcionamiento y principales componentes de este programa.

Como Escribir Un Articulo Cientifico En Ingles Tangente:

Las mil y una bases del ADN. Jorge Laborda Fernández, 2009-10-10 Se trata de una recopilación de artículos de divulgación científica escritos por el autor y aparecidos en los periódicos La Tribuna de Albacete y ocasionalmente EL PAÍS y el Heraldo de Aragón en los últimos cuatro años. Son artículos que explican en unas mil palabras de una manera sencilla y entretenida los avances que se han ido produciendo en las ciencias sobre todo de las ciencias biomédicas si bien hay algunos dedicados a la astronomía a la evolución del hombre y al origen de la vida. Los artículos se han escrito desde el año 2001 hasta la actualidad lo que ha permitido a la hora de realizar su selección para el libro tener una perspectiva de la verdadera relevancia y evolución de las noticias científicas aparecidas en el periódico y que originaron los artículos periodísticos del autor. Además para la selección de los artículos se han seguido los criterios de rigor científico a la vez que se emplea un lenguaje asequible sin caer en la frecuente utilización de anglicismos en el lenguaje científico y haciendo especial hincapié gracias al sentido del humor del autor en que la ciencia puede ser atractiva y entretenida. Prueba de ello son los títulos de los artículos que incitan a la lectura del mismo.

¿Te atreves? II Jaime López de la Osa [et al.], Carmen Patricia Pérez Matute, Francisco Antequera, Paco Quevedo, Marcelo H. Vaccarezza, Emilio Cervantes, David Camps i Munuera, Carmen Martínez Gómez, 2006. Una asignatura pendiente de la comunidad científica actual es la de encontrar fórmulas imaginativas para acercar el trabajo realizado dentro de los laboratorios a la sociedad en general de una manera comprensible para ésta. Los científicos deben tener la voluntad de transmitir a la sociedad conceptos científicos con precisión y a su vez conocer aquello que la sociedad espera del trabajo científico. El jurado del II Concurso de relatos científico literarios te atreves estuvo compuesto por los siguientes miembros: César de Haro Investigador Científico CSIC, Graziella Almendral periodista especializada en divulgación científica, Antonio Talavera Científico Titular CSIC, Mónica Fernández Aceytuno Bióloga y escritora especializada en divulgación ambiental y Elena Feduchi Editorial H. Se decidió otorgar el premio al relato ganador "Ritmos perdidos" de Jaime López de la Osa y se eligieron dos relatos finalistas: "Amor con Omega 3" de Carmen Patricia Pérez Matute y "Noticia de un fermento hecho hombre" de Víctor Jiménez Cid. La editorial ha hecho una selección entre los relatos mejor valorados por cada miembro del jurado. Con estos ocho relatos edita este libro que pretende ser una pequeña muestra representativa de los recibidos y de la consecución del propósito del concurso. Se abordan temas diversos pero en todos ellos se trasluce un mensaje común: la pasión por la ciencia, la satisfacción íntima de ser protagonistas del avance del conocimiento. El deseado encuentro entre ciencia y sociedad refuerza la idea de que la ciencia resulta imprescindible para la sociedad y constituye una parte decisiva de nuestra cultura.

Cómo escribir un artículo científico en inglés Guy Norman, 1999. El libro está dirigido a investigadores del área de las ciencias biomédicas que quieren publicar artículos científicos en inglés o que ya publican pero quieren mejorar su capacidad de redacción técnica en dicho idioma. Partiendo de la base de que lo más importante es una redacción clara y precisa sea en español o en inglés, el libro está pensado tanto para aquellos autores que

deciden escribir directamente en inglés como para aquellos que prefieren escribir sus trabajos en español para después acudir a un traductor. Cualquier persona que se dedique a analizar las redacciones técnicas en inglés hechas por científicos no angloparlantes se encontrará pronto con un hecho evidente: el mayor problema y el más extendido es que el autor piensa demasiado en el inglés y no lo suficientemente en la claridad de expresión. Aunque no hay fórmulas mágicas, Guy Norman, traductor técnico de la Universidad de Santiago de Compostela, España, ofrece siete reglas de oro como recomendaciones esenciales para los investigadores a la hora de redactar sus artículos: pensar en la comprensibilidad de la redacción y después en el inglés; pensar en lo que el lector necesita saber para entender lo que viene a continuación; prestar especial atención a la declaración de objetivos en el último párrafo de la Introducción; explicar con absoluta claridad lo que se hizo y los elementos específicos del estudio: variables, tratamientos, grupos experimentales, etc.; facilitar la comprensión del lector con construcciones paralelas; vocabulario constante y verbosus y cuidar especialmente el uso de adjetivos y de la estadística.

Day, 2005 *Cómo escribir un artículo de investigación en inglés* Inmaculada Fortanet Gómez, 2002 *Redacción científica* Chris Dennis, 2021-10-27. Una guía práctica para ingenieros científicos y profesionales no técnicos. La segunda edición permite a los lectores escribir, editar y publicar materiales de naturaleza técnica incluidos libros, artículos, informes y medios electrónicos. Escrita por un ingeniero de renombre y autor técnico ampliamente publicado, esta guía complementa los manuales de referencia de los autores tradicionales sobre redacción técnica al presentar ejemplos de primera mano que ayudan a los lectores a comprender las consideraciones prácticas al escribir y producir contenido técnico. Estos ejemplos ilustran cómo nace una publicación así como varios desafíos y soluciones. La segunda edición contiene material nuevo en cada capítulo, incluidos temas nuevos, ejemplos adicionales, ideas, consejos y trucos, dibujos animados nuevos y otros ejercicios. Se han agregado apéndices para escribir listas de verificación y muestras de escritura. Las referencias y el glosario se han actualizado y ampliado. Además, se ha incorporado un enfoque en la escritura para personas no técnicas que trabajan en el mundo de la tecnología y para hablantes no nativos de inglés. Escrito en un estilo informal y conversacional a diferencia de los textos tradicionales de escritura universitaria, el libro también contiene muchas caricaturas e historias personales interesantes. *Cómo escribir un artículo de investigación en inglés* Inmaculada Fortanet, 2014-11-20. El inglés se ha convertido en la lengua de transmisión de los conocimientos científicos en la mayoría de las disciplinas, por lo que todo buen investigador no sólo ha de conocer su campo de investigación sino también esta lengua. Por otra parte, los artículos de investigación que se publican en las revistas especializadas están sujetos a determinadas convenciones que caracterizan su lenguaje. El presente libro está dirigido a investigadores cuya lengua materna es el español y que pese a tener conocimientos de la lengua inglesa encuentran dificultades a la hora de elaborar sus artículos de investigación en inglés. Además, incluye las características especiales de los artículos en áreas como la economía y la empresa, la informática,

la ingeniería química y las ciencias de la salud
