Anti-Cartel Enforcement in a Contemporary Age Caron Beaton-Wells, Christopher Tran, 2015-09-24. Leniency policies are seen as a revolution in contemporary anti cartel law enforcement. Unique to competition law, these policies are regarded as essential to detecting, punishing and deterring business collusion conduct that subverts competition at national and global levels. It charts the origins of and impetuses for the leniency movement, captures key insights from academic research and practical experience relating to the operation and effectiveness of leniency policies and examines leniency from the perspectives of corporate and individual applicants, advisers and authorities. The book also explores debates surrounding the intersections between leniency and other crucial elements of the enforcement system such as compensation, compliance and criminalisation. The rich critical analysis in the book draws on the disciplines of law, regulation, economics and criminology. It makes a substantial and distinctive contribution to the literature on a topic that is

Research Handbook on Asian Competition Law Steven Van Uytsel,Shuya Hayashi,John O. Haley,2020-04-24 This timely Research Handbook provides a comprehensive overview and discussion of the substantive competition law provisions of the ASEAN Plus Three region including Hong Kong and Taiwan Taking a unique comparative perspective chapters examine Asian competition laws in relation to the existing laws that served as models for them analysing how and why they deviate *Competition Law and Economic Inequality* Jan Broulik,Katalin Cseres,2022-12-15 The gap between the rich and poor is widening across the globe

This book explores whether this major societal challenge of our time can be addressed by the means of competition law. The primary goal of today's competition law is to ensure that market power does not lead to an inefficient production of goods and services. Nevertheless, even such efficiency-oriented curbing of market power may arguably contribute to the reduction of differences in how much people own and earn. Furthermore, many competition law regimes do take into account distributive considerations too. The chapters investigate the relationship between competition law and economic inequality from philosophical, historical, and economic perspectives. Their inquiries concern the conceptual foundations of competition law and doctrinal frameworks of individual jurisdictions as well as specific problems and markets. As such, the book provides a novel and comprehensive overview of whether and how competition law can contribute to more equality in both developed and developing countries. The book is a must-read for researchers, public officials, judges, and practitioners within the competition law community. It will also appeal to anyone more broadly interested in issues of inequality and economic policy. *Research Handbook on General Principles in EU Law* Ziegler, Katja S., Neuvonen, Päivi J., Moreno-Lax, Violeta, 2022-04-22

This Research Handbook offers a comprehensive study of existing and emerging general principles of EU law by scholars from a wide range of expertise in EU law, international law, legal theory, and different areas of substantive law. It explores the theory, content, role, and function of general principles in EU law to better understand general principles as a mechanism for the substantive openness of the EU legal order as well as for cross-fertilization and coherence of legal orders. Their potential as a tool to manage the interaction of legal regimes and orders is a particular focal point and will make this Handbook a must-read for scholars of EU law. **Research Methods in Competition Law** Deborah Healey, Michael Jacobs, Rhonda L. Smith, 2020-11-27

Offering a broad-ranging examination of competition law methodologies worldwide, this Handbook focuses on the economic foundations of competition law. Expert contributors consider the procedural and substantive application of competition laws and draw comparisons between newer and more established jurisdictions. This comparison assists in understanding newer models of competition law such as those from China, a particularly significant example as a global trade power. Showcasing unique approaches to specific jurisdictional issues, the book further explores the important interface of competition law and intellectual property. *Research Handbook on Private Enforcement of Competition Law in the EU* Barry J.
