Compiling With Continuations:

Compiling with Continuations Andrew W. Appel, 2007-02-01 This book shows how continuation passing style is used as an intermediate representation to perform optimizations and program transformations. Continuations can be used to compile most programming languages. The method is illustrated in a compiler for the programming language Standard ML. Prior knowledge of ML however is not necessary as the author carefully explains each concept as it arises. This is the first book to show how concepts from the theory of programming languages can be applied to the production of practical optimizing compilers for modern languages like ML. All the details of compiling are covered including the interface to a runtime system and garbage collector.

Trends in Functional Programming Meng Wang, Scott Owens, 2018-04-18 This book constitutes the thoroughly refereed revised selected papers of the 18th International Symposium on Trends in Functional Programming TFP 2017 held in Canterbury UK in June 2017. The 8 revised full papers were selected from 16 submissions and present papers in all aspects of functional programming taking a broad view of current and future trends in the area.

Compiling Natural Semantics Mikael Pettersson, 2005-11-20 Natural Semantics has become a popular tool among programming language researchers for specifying many aspects of programming languages. However due to the lack of practical tools for implementation the natural semantics formalism has so far largely been limited to theoretical applications. This book introduces the rational meta language RML as a practical language for natural semantics specifications. The main part of the work is devoted to the problem of compiling natural semantics actually RML into highly efficient code. For this purpose an effective compilation strategy for RML is developed and implemented in the rml2c compiler. This compiler ultimately produces low level C code. Benchmarking results show that rml2c produced code is much faster than code resulting from compilers based on alternative implementation approaches.

Construction and Analysis of Safe, Secure, and Interoperable Smart Devices Gilles Barthe, 2005-01-21 This book constitutes the thoroughly refereed post proceedings of the International Workshop on Construction and Analysis of Safe Secure and Interoperable Smart Devices CASSIS 2004 held in Marseille France in March 2004. The 13 revised full papers presented were carefully selected during two rounds of reviewing and improvement.
