Ethics and Professional

Persuasion Ralph D. Barney,2003-07-30 Examining the applied media ethics question of professional persuasion this special double issue resulted from a colloquium and conference on allowable ethical limits of deception in professional persuasion Participants were invited to reason their way toward a threshold that would define acceptable deception for a professional persuader in pursuit of favorable market and public opinion conditions for a client As a whole this issue covers a broad range of views and expressions of opinion that often come close to defining the threshold between morally acceptable and morally outrageous persuasion

PR AS PERSONS IN RELATION

Dr. Joseph Parackal,2016-12-05 Many scholars and practitioners opine that public relations are all about building and maintaining an organization s relationship with its public As human relationships depend on personal interactions so it naturally necessitates ethical as well as anthropological aspects In fact a vast majority of the scholars have already portrayed the ethical responsibility of the organization and the practitioner while dealing with various people But a few of them have pointed out that public relation is needed to view anthropological perspectives which in turn will be significant and virtuous for human beings Accordingly practical functional approach is the foremost requirement to overcome in dealing with the public relationships Therefore while exploring the public relations literature we have tried to integrate these three aspects relational ethical and anthropological and propose a reasonable ethical framework for the professional practice of public relations based on the dignity of the person

Communicating

for Success Cheryl Hamilton,Tony Kroll,Bonnie Creel,2023-02-28 Communicating for Success third edition is a core textbook for Introduction to Communication courses and gives students an overview of the subfields of Communication Studies and how these areas provide practical fun and immediate applications to students pursuing a wide variety of career

paths as well as practical instruction in public speaking for success on today's social media platforms. This fully updated third edition focuses on the key communication competencies recommended by the National Communication Association including verbal and nonverbal communication, listening, interpersonal communication and conflict resolution, group and organizational communication, public speaking, leadership, and the roles of social media, technology, culture, gender, and ethics in communication. With a vibrant and engaging design, this volume is packed with applied features including practical scenarios and examples, key terms, discussion questions, sample activities, learning objectives, and more. A concentrated focus on the influence of communication on careers in business, education, and healthcare is highlighted in a two-page career spread at the end of each chapter and takes lessons beyond the classroom. New features in this edition include a greater focus on public speaking in the workplace, emphasis on demographic and behavioral factors in audience analysis, and increased discussion of issues of social justice and equity. Online resources for instructors include PowerPoint slides and an Instructor's Manual with guidance on how to use the book's activities in both in-person and online courses.

The Communicative Relationship Between Dialogue and Care Marie Baker-Ohler, Annette Holba, 2009. This book provides insight into the nature of the relationship between dialogue and care. The work is textured and mindful of the human need for authentic communication between embedded human communicative agents. This is because the authors are well-versed in the field, having published articles, books, and book chapters dealing with the cultivation of human communication and human relationships through aspects of care, dialogue, and other philosophical preconditions. This study approaches the relationship of care and dialogue through a constructive hermeneutic approach situated within the current historical moment while relying on a rich and textured historical tradition of philosophical writings that invite new discussion on the value of this relationship. In a historical era of rapidly changing technologies, it is often easier to text, tweet, and e-mail in a hypertext mode that fails to acknowledge the dialogic potential in human relationships. This book reminds us that even in these technologically sophisticated times, we gain more in human relationships through care and dialogue than in quick, instant communication. It is unique from other books dealing with the relationship between dialogue and care in human relationships because it integrates literature involving communication ethics and philosophies of communication framed around the metaphor of care to provide a more textured insight related to human communication. The discussion is an alternative to a social scientific approach. Readers will gain a thorough and comprehensive understanding of the issues involved from different perspectives. Many other books on these matters are also theoretically laden with deep philosophical concepts but they are often devoid of connections to everyday experiences, which limits application of the ideas. The authors address this by a text that explores those philosophical and theoretically laden concepts related to care in an applied manner so that the practice of these ideas is situated within actual human interaction. This study provides an in-depth exploration specifically dealing with care as a philosophical and ethical paradigm for living in the world. This book is distinctive as it encompasses theorists, scholars, from

multiple perspectives that include sociological psychological philosophical and from both social science and humanities approaches all of which come together within a communication framework The purpose of this book is to provide readers with the opportunity to consider multiple ways of enhancing human communication through discovering how the notion of care has the ability to shape and guide communicative exchanges Care is posited as a philosophy of communication and more specifically as a communicative ethic that can be embraced in interpersonal and organizational communicative contexts Our goal is to provide a textured understanding of care as it relates to human communication and as it is foregrounded in philosophical thought This text will help develop philosophical understanding of this topic that is inescapably linked to human communication This book will interest all in communication sociology psychology and anthropology *Public Relations Ethics and Professionalism* Johanna Fawkes, 2014-08-01 Do professions really place duty to society above clients or their own interests If not how can they be trusted While some public relations PR scholars claim that PR serves society and enhances the democratic process others suggest that it is little more than propaganda serving the interests of global corporations This is not an argument about definitions but about ethics yet this topic is barely explored in texts and theories that seek to explain PR and its function in society This book places PR ethics in the wider context of professional ethics and the sociology of professions By bringing together literature from fields beyond public relations sociology professional and philosophical ethics and Jungian psychology it integrates a new body of ideas into the debate The unprecedented introduction of Jungian psychology to public relations scholarship shifts the debate beyond a traditional Western Good Bad ethical dichotomy towards a new holistic approach with dynamic implications for theory and practice This thought provoking book will be essential reading for students academics and professionals with an interest in public relations ethics and professionalism

The Moral Compass of Public Relations Brigitta R. Brunner, 2016-10-04 The civic and moral responsibilities of public relations are hotly contested topics While many researchers call for focusing on ethics in public relations they concentrate on ethics in relation to how people do their jobs In actuality emphasis should move beyond professional codes of ethics to include general morality and citizenship Currently as the profession receives greater scrutiny it is important to be aware of the value of public relations in the community This book centers on four areas of public relations conscience in order to examine its role in morality and citizenship civic professionalism corporate social responsibility ethics and public communication This approach will help to answer the question of what is public relations responsibility to the public good

Assessing Media Education William G. Christ, 2013-11-05 This component of Assessing Media Education is intended for those who would like to know how other schools have grappled with implementing assessment initiatives and who have used assessment to improve their programs

Persuasion Robert H Gass, John S Seiter, 2015-07-17 First Published in 2015 Routledge is an imprint of Taylor Francis an Informa company

Media Education Assessment Handbook William G. Christ, 2020-07-24 Assessing media education is a formidable task because both assessment and media education are complex and controversial concepts Assessment which can take place at the individual student class sequence program department or unit and university levels is questioned in terms of reliability validity relevance and cost Media education which has been challenged at a number of schools finds faculty and administrators in the midst of soul searching about how to clearly articulate its missions and purposes to a broader audience Departments are under increasing national state and institutional pressure to get assessment procedures carried out quickly but there is an obvious danger in rushing to implement assessment strategies before establishing what is essential in media education In communication education in general the what of assessment is often discussed in terms of skills attitudes affect values and knowledge People assess students to determine what they know think feel value and can do Here it is suggested that one of the places to start defining what students should learn from their media education is by identifying outcomes Outcomes can be assessed in a variety of ways but first they need to be developed and clearly articulated
