BENEFITS

Rotary Screw Compressors are very cost-effective for handling high volumes of gas in field gathering, vapor recovery, and other applications. The HG24 Series is suitable for applications to 350 BHP and 300 PSIG discharge pressure.

Low maintenance and high reliability are inherent with rotary screws because they have few moving parts. There are no valves, rings or packing to wear out or cause loss of efficiency.

Smooth operation results from no unbalanced forces and no pressure pulsation. No foundation is required. There are no piping vibrations from pressure pulsation.

Direct coupled natural gas engine or electric motor drives are equally acceptable with the HG24000 rotary screw.

LeROI Rotary Screw Gas Compressors are available in 12 models covering a flow range of 20 to 15,000 MSCFD and horsepower from 10 to 800.

FEATURES

Single-Stage operation from 15 PSIG to 300 PSIG maximum is possible with the HG24 Series oil-flooded compressors. Compressor packages are therefore simple, reliable and inexpensive.

The gas differential pressure provides oil circulation for proper lubrication at differential pressures over 60 PSI. Optional oil pumps are available for applications with less than 60 PSI differential pressure.

Adjustable V_i allows discharge porting to be selected in the field to match the internal compression to the application requirement for maximum compression efficiency.

Variable V_i

All iron or steel construction with no copper or copper alloys makes these compressors compatible with natural gas, sweet or sour.
