

Compare and Order Whole Numbers Study Guide

SOL 4.NS.2

When ordering numbers, you need to pay attention to place value as well.

You also need to see if you are ordering the numbers from least to greatest or greatest to least.

Example: Order these numbers from least to greatest.

145,397 145,089 145,308 145,295

Step 1: Line your numbers up vertically by place value.

145,397
145,089
145,308
145,295

Step 2: Start with the far left number and relist the numbers in order from least to greatest.

145,397
145,089
145,308
145,295

145,089 comes first since the zero is the smallest value.

145,295 comes second since the two is the next smallest value.

Since the three in the hundreds place is the same with the last two numbers, we have to then go to the tens place.

145,308 will be the third number since the zero is smaller than the nine in 145,397.

Therefore the answer is:

145,089, 145,295, 145,308, 145,397

(When ordering from greatest to least, you find the greatest value first and then end with the smallest value.)
