Competition Policy Analysis An Integrated Approach Zew Economic Studies:

Competition Policy Analysis Kai Hüscherlath, 2008-09-08 Competition policy is an integral and prominent part of economic policy making in the European Union. The EU Treaty prescribes its member states to conduct economic policy in accordance with the principle of an open market economy with free competition. More precisely, the goal of EU competition policy is to defend and develop effective competition in the common market. European Commission 2000 7 Under its Commissioners van Miert, Monti and most recently Kroes, the EU Commission has stepped up its effort to pursue and achieve the aforementioned goal. A number of so-called hard-core cartels, such as the notorious vitamin cartel led by Roche, have been detected, tried in violation of Art 81 of the Maastricht Accord and punished with severe fines. Also, Microsoft was hit hard by the strong hand of the Commission, having been severely fined for exploiting a dominant market position. Economic analysis has been playing an increasingly significant role in the Commission's examination of competition law cases. This holds true in particular for merger control. Here, however, the Commission has had to accept some painful defeats in court, such as the Court's reversals of *Airtours*, *First Choice* or *GE Honeywell*. Among other things, the European Court of Justice found the economic analysis as conducted by the EU's Directorate General for Competition to be flawed and the conclusions drawn not to be convincing. These rejections by the courts have stirred up the scholarly debate on the conceptual foundations of European competition policy.

The Impact of Cartels on National Economy and Competitiveness Jurgita Bruneckienė, Irena Pekarskienė, Andrius Guzavičius, Oksana Palekienė, Jūratė Šovienė, 2015-06-09 The book presents theoretical and empirical research on the integrated assessment of cartels' effects on national economies. The empirical analysis is based on three cases in Lithuania, a country chosen because it corresponds to the features of a small economy with a developing culture of competition. An integrated assessment of a cartel's impact by measuring the net economic effect created by its operations on the market is extremely important at the scale of national economies. If a cartel's true impact is not identified and evaluated, it is impossible to make important strategic decisions for the whole economy instead of individual affected parties and to establish an optimum baseline for mitigating the harm done to the economy. Thus, an integrated cartel impact assessment can help to more proactively combat cartel agreements on the market and improve the economic welfare of the respective country.

The Use of Economics in International Trade and Investment Disputes Theresa Carpenter, Marion Jansen, Joost Pauwelyn, 2017-04-20 Twenty-first century trade agreements increasingly are a source of international law on investment and competition. With chapters contributed by leading practitioners and academics, this volume draws upon investor-state arbitration and competition/antitrust disputes to focus on the application of economics to international trade law and specifically WTO law. Written in an accessible language suitable for a broad readership while providing concrete insights designed for the specialist, this book will be of use to those active or interested in the related fields of trade disputes, competition law and investor-state arbitration.

ZEW News ,2007 Competition Policy and the Economic Approach

Josef Drexl, Wolfgang Kerber, Rupprecht Podszun, 2011-01-01 This outstanding collection of original essays brings together some of the leading experts in competition economics policy and law They examine what lies at the core of the economic approach to competition law and deal with its normative and institutional limitations In recent years the more economic approach has led to a modernisation of competition law throughout the world This book comprehensively examines for the first time the foundations and limitations of the approach and will be of great interest to scholars of competition policy no matter what discipline Competition Policy and the Economic Approach will appeal to academics in competition economics and law policy makers and practitioners in the field of antitrust competition law as well as postgraduate students in competition law and economics Those interested in the interplay of law and economics in the field of competition will also find this book invaluable

Public Procurement and the EU Competition Rules

Albert Sánchez Graells, 2015-06-25 Public procurement and competition law are both important fields of EU law and policy intimately intertwined in the creation of the internal market Hitherto their close connection has been noted but not closely examined This work is the most comprehensive attempt to date to explain the many ways in which these fields often considered independent of one another interact and overlap in the creation of the internal market This process of convergence between competition and public procurement law is particularly apparent in the 2014 Directives on public procurement which consolidate the principle of competition in terms very close to those advanced by the author in the first edition This second edition builds upon this approach and continues to ask how competition law principles inform and condition public procurement rules and whether the latter in their revised form are adequate to ensure that competition is not distorted The second edition also deepens the analysis of the market behaviour of the public buyer from a competition perspective Proceeding through a careful assessment of the general rules of competition and public procurement the book constantly tests the efficacy of these rules against a standard of the proper functioning of undistorted competition in the market for public procurement It also traces the increasing relevance of competition considerations in the case law of the Court of Justice of the European Union and sets out criteria and recommendations to continue influencing the development of EU Economic Law
