**Discipline Problems** Tadashi Dozono, 2024-05-07

Angel, a Black tenth grader at a New York City public school, self-identifies as a nerd and likes to learn But she's troubled that her history classes leave out events like the genocide and dispossession of Indigenous people in the Americas, presenting a sugar-coated image of the United States that is at odds with her everyday experience The history she learned in school is simpler, she says The world she lives in is a lot more complex

Angel, like every student interviewed in *Discipline Problems*, has been identified by teachers as a troublemaker: a student whose behavior disrupts classroom norms and interferes with instruction But her critiques of the curriculum she's taught speak to her curiosity and insight, crucial foundations for understanding history Like many students who have been marginalized by systemic racism in American schools, she exposes the shortcomings of her classrooms' academic environments by challenging both the content and the methods of her

education All too often these challenges are framed as troublemaking and the students are disciplined for acting out instead of being rewarded for their intellectual engagement Tadashi Dozono a professor of education and former high school social studies teacher takes seriously the often overlooked critiques that students of color who get labeled as troublemakers direct toward their high school history curriculum He reinterprets troublemaking usually cast as a behavioral deficit as an intellectual asset and form of reasoning that challenges the disciplining reason of classrooms where whiteness is valued over the histories and knowledge of people of color Dozono shows how what are traditionally framed as discipline problems can be seen through a different lens as responses to educational practices that marginalize non white students *Discipline Problems* reveals how students of color seek out alternate avenues for understanding their world and imagines a pedagogy that champions the curiosity intellect and knowledge of marginalized learners **El-Hi Textbooks in Print**, 1984 **Crafting Poems: A Guide to Creative Writing** Ethel Rackin, 2024-09-13 *Crafting Poems* demystifies the genre through diverse examples clear instruction and emphases on practice enjoyment and developing a distinct voice By connecting reading with writing and balancing discipline with self expression and improvisation *Crafting Poems* gives aspiring poets a flexible and powerful toolbox with which to build their work **El-Hi Textbooks & Serials in Print**, 2000 **Teaching L2 Composition** Dana R. *Beyond the Bubble Test* Linda Darling-Hammond, Frank Adamson, 2014-06-16 Performance assessment is a hot topic in school systems and educators continue to analyze its costs benefits and feasibility as a replacement for high stakes testing Until now researchers and policymakers have had to dig to find out what we know and what we still have to learn about performance assessment Beyond the Bubble Test How Performance Assessments Support 21st Century Learning synthesizes the latest findings in the field and not a moment too soon Statistics indicate that the United States is in danger of falling behind if it fails to adapt to our changing world The memory and recall strategies of traditional testing are no longer adequate to equip our students with the skills they need to excel in the global economy Instead teachers need to engage students in deeper learning assessing their ability to use higher order skills Skills like synthesizing information understanding evidence and critical problem solving are not achieved when we teach to multiple choice exams Examples in Beyond the Bubble Test paint a useful picture of how schools can begin to supplement traditional tests with something that works better This book provides new perspectives on current performance assessment research plus an incisive look at what s possible at the local and state levels Linda Darling Hammond with a team of leading scholars bring together lessons learned new directions and solid recommendations into a single readily accessible compendium

Beyond the Bubble Test situates the current debate on performance assessment within the context of testing in the United States This comprehensive resource also looks beyond our U S borders to Singapore Hong Kong and other places whose reform mindedness can serve as an example to us Time and Space in Formal Logic Richard L. Epstein,2022-09-13 Time and Space in Formal Logic begins with an analysis of assumptions about how logic and language relate Then in the first section times are taken to be established by true propositions and those are related as before and after with temporal propositional connectives In the second section times are treated as things that can be picked out and counted leading to a predicate logic that allows for quantification over times In the third section locations in space are also treated as things that can be picked out and counted leading to a predicate logic that allows for quantification over both times and locations Many applications of the formal systems to formalizing ordinary language propositions and inferences clarify better the assumptions we make in reasoning taking account of time and space by making those precise in the formal systems Appendices on events branching times intentions and descriptive names add to the scope of the work **Books and Pamphlets, Including Serials and Contributions to Periodicals** Library of Congress.
