

Enlargement

Enlargement is a type of transformation that changes the size of a shape by making it bigger or smaller by multiplying its side lengths by a scale factor.

Enlarging a shape by a scale factor **greater than 1** will make the shape **bigger**. E.g. Shape A has been enlarged by scale factor 2 to make shape B.

Enlarging a shape by a scale factor **between 0 and 1** will make the shape **smaller**. E.g. Shape A has been enlarged by scale factor $\frac{1}{2}$ to make shape B.
