Enterprise Architecture Turnaround Nagesh V. Anupindi Ph. D.,Gerard A. Coady,2011-12 To provide structure and transparency to the complex world of IT Enterprise Architecture was created However we created complexities within Enterprise Architecture with Frameworks that are not easily understandable and purposefully implementable In this book Nagesh and Gerry help to turnaround Enterprise Architecture organizations They introduce a simple IDEA Framework that is based on common practices and investments within IT organizations The Ten deliverables presented in this book bring structure and clarity to IT organizations that are 10 people IT shops and 1000 IT staff enterprises alike This book is not an ivory tower work it is actionable applied Enterprise Architecture It is also a healthy dose of EA tough love If you want to know why EA fails read the second chapter It is introspective it does not blame external forces the not my fault syndrome It also does not blame in fact it hardly mentions technology To be fair the Nagesh and Gerry do recognize external influences however they are viewed as risks that must be managed Most corporations focus on this year s budget investments and rewards The same focus rolls downhill to the Information Technology department If the IT department has not successfully communicated the budget and managed to spend it within the limits 10% variance everything else may seem irrelevant Eventually Nagesh and Gerry started looking through current IT systems and IT assets to understand a where the current

funds were being invested b how these investments jelled or were mandated because of the previous investments that had been made by IT and c how the company s business priorities aligned with future technology needs including the need to meet compliance requirements Considering and discovering the answers to these three questions led Nagesh and Gerry to develop a definition of Enterprise Architecture that was based on technology investments Investment Driven Enterprise Architecture IDEA Framework The purpose of the IDEA Framework is to provide guidance on how the corporation s future technology will be drafted and communicated Its method is to utilize actual systems hardware people and business functions in order to establish boundaries within which the IDEA Framework will work The structure of the IDEA Framework differs from that of many others because it consists of key deliverables that fit into day to day activities and it accommodates an enterprise wide strategic plan It also provides for the much needed interaction between these key deliverables and facilitates contributions from key stakeholders across Business Units and the various IT departments In essence the IDEA Framework takes the key deliverables stakeholders and organizations and demonstrates how they dynamically function together **The Practice of Enterprise Modeling** Geert Poels,Frederik Gailly,Estefania Serral Asensio,Monique Snoeck,2017-11-14 This volume constitutes the proceedings of the 10th IFIP WG 8 1 Conference on the Practice of Enterprise Modeling held in November 2017 in Leuven Belgium The conference was created by the International Federation for Information Processing IFIP Working Group 8 1 to offer a forum for knowledge transfer and experience sharing between the academic and practitioner communities The 20 full papers and 4 short papers accepted were carefully reviewed and selected from 70 submissions They include research results practitioner experience reports and work in progress papers and were presented in 8 sessions covering diverse topics related to enterprise modelling and its application in practice *Practice-Driven Research on Enterprise Transformation* Frank Harmsen,Frank Schalkwijk,Joseph Barjis,Sietse Overbeek,2010-11-01 The PRET working conferences are set up as a one day event in such a way that it attracts an audience from both industry and academia PRET 2010 was a continuation of the PRET 2009 working conference which was organized as the industrial track at the 2009 CAiSE conference The PRET 2010 working conference was organized as part of theenterpriseengineering week and was co located with PoEM 2010 and TEAR 2010 in Delft The statement that modern day enterprises are in a constant state of ux is in 2010 even more true than it was in 2009 The markets are in a state of confusion and seem to have no direction at all as they are swinging back and forth depending on often contradictory signals and economic forecasts As a consequence enterprises be they private businesses government departments or other organizations are taking their measures Restructuring divesting proving performance and merging are among the usual transformationactivities thatenterprisesconducttoprovideanswerstotheever challengingdemandsthat are put on them In addition to the tricky economic situation developments like globalization rapid technologicaladvancement aging and the changing mindset of customers contribute to a situation in which nothing is certain anymore and in which change is the only constant PRET
