Semantic Enterprise Application Integration for Business Processes: Service-Oriented Frameworks Mentzas, Gregoris, Friesen, Andreas, 2009-09-30 This book provides methods that allow for access to corporate and customer data independent of where it resides Provided by publisher

Enterprise Application Integration Framework for Third-party Logistics Mpho Makhatho, 2016 Enterprise Application Integration EAI is an integration framework that encapsulates a set of services and technologies that forms a middle tier to enable integration of varied systems and applications across the enterprise It is a mechanism to combine processes software standards and hardware to seamlessly integrate two or more enterprise application systems allowing them to operate as a unit There are various challenges with EAI in terms of the approach the architecture implementation and its operation in a business environment Even more so in a Third party logistics 3PL environment where its function is directly associated with the performance of the business Third Party Logistic is a supply chain service provider that carries out supply chain activities on behalf of a client also known as a shipper for part or all of their supply chain management However regardless of the value put on the 3PL IT capabilities shippers are still not satisfied with the performance and there are no specific guidelines for EAI usage in 3PL environment The goal of this study was to design an Enterprise Application Integration framework for Third Party logistics

User-Centric Application Integration in Enterprise Portal Systems Oliver Gmelch, 2012 The ever growing number of application scenarios for IT systems leads to a significant increase in their number and hence to a level of complexity that has grown tremendously in comparison with early IT installations by the mid of the past decade In numerous attempts to integrate these diverging application stacks various prominent methods have emerged in the past most recently the topic of EAI which strives to achieve a consolidated view at diverse application systems However the emergence and rise of cloud based services leads to new challenges to deal with Usage of offerings from a no further specified cloud appears appealing for IT decision makers since it promises cost savings while even enhancing flexibility to quickly respond to changing market needs To further support this idea this work focuses on the aspect of inter

organisational networks that are characterised by short setup times and short time to market in order to achieve innovative products emerging from the cooperation between different actors In this context proper backing by dedicated ICT components is one of the key challenges This book therefore demonstrates how portal systems acting as intermediary between providers and consumers can be embedded into networked enterprises by providing seamless access to all relevant information To achieve this this book presents a generic architecture that can serve as a blueprint for future implementations for the type of enterprise portals introduced previously and focuses on integration of external services in a user centric manner concentrating on the user and his specific needs to achieve productivity and user satisfaction gains Moreover secure communication facilities allow to consider the current application and or user context to control exchange of information between different applications integrated on the portal platform

Enterprise Application Integration with XML and Java Jeffrey P. Morgenthal, Bill La Forge, 2001 Three super hot topics come together in this first complete guide to Enterprise Application Integration with XML and Java The book teaches readers to identify data exchange requirements and meet them with Java and XML It contains easy to read well documented code throughout The CD ROM contains extensive source code from the book plus a library of leading edge software and trialware

Perspectives in Business Informatics Research Peter Forbrig, Horst Günther, 2010-09-27 This book constitutes the refereed proceedings of the 9th International Conference on Perspectives in Business Informatics Research BIR in Rostock Germany in September 2010 The 14 full and 4 short papers accepted for BIR were selected from 53 submissions They are organized in topical sessions on knowledge and information management ontologies models and workflows business information systems and databases and mobile computing

Decoding **Enterprise Application Integration Enterprise Application Integration**: Revealing the Captivating Potential of Verbal Expression

In a time characterized by interconnectedness and an insatiable thirst for knowledge, the captivating potential of verbal expression has emerged as a formidable force. Its ability to evoke sentiments, stimulate introspection, and incite profound transformations is genuinely awe-inspiring. Within the pages of "**Enterprise Application Integration Enterprise Application Integration**," a mesmerizing literary creation penned with a celebrated wordsmith, readers attempt an enlightening odyssey, unraveling the intricate significance of language and its enduring effect on our lives. In this appraisal, we shall explore the book's central themes, evaluate its distinctive writing style, and gauge its pervasive influence on the hearts and minds of its readership.
