Ross, 2012-12-06 It has been said that every generation of historians seeks to rewrite what a previous generation had established as the standard interpretations of the motives and circumstances shaping the fabric of historical events It is not that the facts of history have changed No one will dispute that the battle of Waterloo occurred on June 11 1815 or that the allied invasion of Europe began on June 6 1944 What each new age of historians are attempting to do is to reinterpret the motives of men and the force of circumstance impacting

the direction of past events based on the factual social intellectual and cultural milieu of their own generation By examining the facts of history from a new perspective today s historians hope to reveal some new truth that will not only illuminate the course of history but also validate contemporary values and societal ideals Although it is true that tackling the task of developing a new text on logistics and distribution channel management focuses less on schools of philosophical and social analysis and more on the calculus of managing sales campaigns inventory replenishment and income statements the goal of the management scientist like the historian is to merge the facts and figures of the discipline with today s organizational cultural and economic realities Hopefully the result will be a new synthesis where a whole new perspective will break forth exposing new directions and opportunities

Enterprise Resource Planning: Solutions and Management Nah, Fiona Fui-Hoon, 2001-07-01 Enterprise resource planning ERP refers to large commercial software packages that promise a seamless integration of information flow through an organization Traditionally separate units were created within an organization to carry out various tasks and these functional areas would create their own information systems thereby giving rise to systems that were not integrated ERP strives to provide a solution to these problems Enterprise Resource Planning Solutions and Management examines the issues that need to be further studied and better understood to ensure successful implementation and deployment of ERP systems

Enterprise Resources Planning and Beyond Gary A Langenwalter, 2020-01-03 To achieve success in today s business climate you must do more than provide high quality low cost products to customers when and how they want them Customers and suppliers require fully integrated information throughout the supply chain or value chain You must integrate your organization so completely that executive decisions are implemented effortlessly Competitive pressures often cause a reduction in prices in spite of continually rising costs A decrease in prices paired with increased costs quickly eliminates any profitability and threatens your company s ability to survive This book shows you how you can reduce costs through the elimination of waste caused by poor communication and coordination throughout a company as well as between the company its suppliers and its customers The author explains Enterprise Resource Planning ERP in non technical terms describing how an ERP system can fully integrate all functions in your manufacturing organization He demonstrates the system s capability to increase efficiency and profitability and to delight the customer as well as its current deficiencies In addition to his thorough coverage of ERP the author introduces Total Enterprise Integration TEI the process of integrating all the information required to fully support a manufacturing company TEI represents a logical extension of complete information integration throughout a manufacturing enterprise and into the supply chain This new concept shows you how the intelligent use of work flow allows responsibility to go to the most appropriate front line decision makers while maintaining proper budgetary and operational controls The power of TEI is in the integration of communication across the entire manufacturing company and out through the supply chain to customers and suppliers Enterprise Resource Planning and Beyond Integrating Your Entire Organization focuses on what a fully

integrated system can do for you
