initiated to provide systematic reliable and generalizable data on important features of the new business creation process The PSED includes information on the proportion and characteristics of the adult population involved in efforts to start businesses the activities and characteristics that comprise the nature of the business start up process and the proportion and characteristics of those business start up efforts that actually become new businesses The handbook also describes the PSED data collection process provides documentation of the interview schedules codebooks data preparation and weighting scheme as well as offers examples of how analyses of PSED data might be conducted The authors identify specific measures that can be used to operationalize theory as well as provide evidence from the PSED data sets on these measures reliability and validity The Handbook of Entrepreneurial Dynamics is ideal for a sizeable audience including graduate students academics and librarians in schools of business and management who need a comprehensive reference on business creation In addition researchers and policy makers at the federal state and local level will find this an invaluable reference covering all of the factors involved in new venture formation Key Features Considers categories of data not available prior to the PSED Includes a comprehensive overview of theories about new business formation Provides demographics of nascent entrepreneurs Analyzes the cognitive characteristics of nascent entrepreneurs Explores all of the processes of new business formation
