Entrepreneurial Knowledge Technology And The Transformation Of Regions Regions And Cities:

Entrepreneurial Knowledge, Technology and the Transformation of Regions Charlie Karlsson, Börje Johansson, Roger Stough, 2013-06-26 In recent years policy makers have given much credence to the role of entrepreneurship in the transformation of regions As a result a new set of policy responses have emerged that focus on the support of new venture creation small business growth and idea generation and commercialization While there is a wealth of research about entrepreneurship in general less attention has been given to the development of new tools and programs in support of entrepreneurial activities and to the ways in which the emergence the character and the types of entrepreneurship policies might differ between countries In particular the transatlantic perspective is of special interest because of the pioneering role of the United States in this area and also due to the European Union s focus on economic competitiveness The contributions included in this book explore the emergence of entrepreneurship policies from a transatlantic comparative perspective and address different aspects of entrepreneurship policies including local entrepreneurship policies and the relationship between knowledge based industries and entrepreneurship policies

Regional Worlds: Advancing the Geography of Regions Martin Jones, Anssi Paasi, 2017-10-02 A key concern in the debate and empirical research on the geography of regions is the evolution of the conceptualizations and practical uses of the idea of region This idea prioritises both the intellectual and the practical development of regional studies This book drives the discussion further It stresses the complex forms of agency advocacy involved in the production and reproduction of regional spaces and space of regionalism as well as the importance of geohistory and context The book moves beyond the territorial relational divide that has characterized debates on regions and regional borders since the 1990s The contributors answer key questions from different conceptual and concrete contextual angles and to motivate readers to reflect on the perpetual significance of regional concepts and how they are mobilized by

various actors to maintain or transform the contested spatialities of societal power relations This book was based on a special issue of Regional Studies

Reanimating Regions James Riding, Martin Jones, 2017-05-12 Writing regions undertaking a regional study was once a standard form of geographic communication and critique This was until the quantitative revolution in the middle of the previous century and more definitively the critical turn in human geography towards the end of the twentieth century From then on writing regions as they were experienced phenomenologically or arguing culturally historically and politically with regions was deemed to be old fashioned Yet the region is and always will be a central geographical concept and thinking about regions can tell us a lot about the history of the discipline called geography Despite taking up an identifiable place within the geographical imagination in scholarship and beyond region remains a relatively forgotten under used and in part under theorised term Reanimating Regions marks the continued reinvigoration of a set of disciplinary debates surrounding regions the regional and regional geography Across 18 chapters from international interdisciplinary scholars this book writes and performs region as a temporary permanence something held stable not fixed and absolute at different points in time for different purposes There is as this expansive volume outlines no single reading of a region Reanimating Regions collectively rebalances the region within geography and geographical thought In renewing the geography of regions as not only a site of investigation but also as an analytical framework through which to write the world what emerges is a powerful reworking of the geographic imagination Read against one another the chapters weave together timely commentaries on region and regions across the globe with a particular emphasis upon the regional as played out in the United Kingdom and regional worlds both within and beyond Europe offering chapters from Africa and South America Addressing both the political and the cultural this volume responds to the need for a consolidated and considered reflection on region the regional and regional geography speaking directly to broader intellectual concerns with performance aesthetics identity mobilities the environment and the body

Geographies of Growth Charlie Karlsson, Martin Andersson, Lina Bjerke, 2017-06-30 Today we can observe an increasing spatial divide as some large urban regions and many more medium sized and small regions face growing problems such as decreasing labour demand increasing unemployment and an ageing population In view of these trends this book offers a better understanding of the general characteristics and specific drivers of the geographies of growth It shows how these may vary in different spatial contexts how hurdles and barriers to growth in different types of regions can be dealt with how and to what extent resources in different areas can develop and how the potential of these resources to stimulate growth can be realized

Transformation of Resource Towns and Peripheries Greg Halseth, 2016-07-01 Most developed economies including single industry and resource dependent rural or small town regions are transforming rapidly as a result of social political and economic change Collectively they face a number of challenges as well as new opportunities This international collaboration describes a critical political economy framework that will be useful for understanding these transitions Transformation of Resource

Towns and Peripheries describes the multi faceted process of transition and change in resource dependent rural and small town regions since the end of the Second World War The book incorporates international case studies from Australia Canada Finland and New Zealand with the express purpose of highlighting similarities and differences in patterns and practices in each country Chapters explore three main themes how corporate ties and trade linkages are changing and impacting rural communities and regions how resource industry employment is changing in these small communities and how local community capacity and leadership are working to mitigate challenges and take advantage of new opportunities This book will be of interest to students of regional studies geography and rural and industrial sociology It will also have a strong appeal to policy makers and local regional development practitioners Knowledge, Networks and Policy James Hopkins,2015-05-08 The region has been used to understand and propose solutions to phenomena and problems outside the dominant spatial scale of the twentieth century the nation state Its influence can be seen in multiple social science disciplines and in public policy across the globe But how was this knowledge organised and how were its concepts transmuted into public policy This book charts the development of the academic field of Regional Studies and the application of its concepts in public policy through its learned society the Regional Studies Association In their modern form learned societies often play a complementary role to universities offering networks that operate in the spaces between and beyond universities connecting specialised academics and knowledge and making it possible for them to have impact outside the academy In contrast to the geographically tangible and popularly understood role of the university contemporary learned societies are nebulous networks that transcend barriers and whose contribution is difficult to discern However the production and dissemination of knowledge would be stunted were it not for the learned society connecting scholars through a network of publications and events This book traces the intellectual history of regional studies and regional science from the 1960s into the 2000s and the impact of the regional concept in public policy through the changing priorities of government in the UK and Europe By approaching the history through the Regional Studies Association it interrogates the role and function of the learned society model of organisation in contemporary academia and importance as a knowledge exchange vehicle for public policy influence Territorial Policy and Governance Iain Deas,Stephen Hincks,2017-02-24 In response to both policy and conceptual debates alternative narratives have begun to emerge about territorial governance and policymaking As local and regional policy actors strive to respond to the geographically uneven effects of the economic crises of the early twenty first century a crucial question emerges what are the opportunities and challenges presented by alternative forms of territorially based governance and policy The aim of this edited volume therefore is critically to explore the opportunities and challenges presented by different forms of territorial policy and governance Drawing on conceptual debates and empirical research from the United Kingdom and other international contexts the contributors engage with issues around the politics and governance of territorial development economic development planning and regeneration and the environment Territorial Policy and

Governance addresses the question of how alternative forms of territorial governance and policy can help to shape patterns of urban and regional development highlighting the related opportunities constraints and challenges that confront their operationalisation This book will be essential reading for international audiences with an interest in territorial development governance politics human geography and planning and regeneration

The Empirical and Institutional Dimensions of Smart Specialisation Philip McCann, Frank van Oort, John Goddard, 2016-11-25 Smart specialisation is the new policy approach to the development of regional innovation systems across Europe and it involves fostering innovative and entrepreneurial initiatives which are well tailored to the local context The different technologies skills profiles business activities institutions and sectors which reflect a region s economic strengths and potential are to be fostered and encouraged to diversify in ways which also exploit the region s linkages with broader global value chains Yet the ideas contained in the smart specialisation agenda have until now been primarily conceptual in nature The Empirical and Institutional Dimensions of Smart Specialisation draws together some of the leading regional economists and scientists in Europe to analyse how smart specialisation is working in practice This book investigates different dimensions of the agenda as it is developing across parts of Europe from both quantitative and qualitative perspectives The quantitative analysis examines the nature of the diversification processes undertaken by regions and the interplay between the chosen local regional development priorities and the wider global value chain impacts of these choices Meanwhile the qualitative analysis examines the institutional opportunities and challenges facing policy makers and the key elements most likely to provide the underpinnings of a workable set of policy settings The book is aimed both at academic researchers interested in the interface between economic geography and regional innovation systems as well as at policy makers making public policy decisions related to regional development at the local city regional or national levels

The London Olympics and Urban Development Gavin Poynter, Valerie Viehoff, Yang Li, 2015-07-24 As London sought to use the Olympics to achieve an ambitious programme of urban renewal in the relatively socially deprived East London it attracted global attention and sparked debate This book provides an in depth study of the transformation of East London as a result of the 2012 Summer Olympic and Paralympic Games Government and event organisers use legacies of urban renewal to justify hosting the world s leading sports mega event this book examines and evaluates those legacies The London Olympics and Urban Development the mega event city is composed of new research conducted by academics and policy makers It combines case study analysis with conceptual insight into the role of a sports mega events in transforming the city It critically assesses the narrative of legacy as a framework for legitimizing urban changes and examines the use of this framework as a means of evaluating the outcomes achieved This book is about that process of renewal with a focus on the period following the 2012 Games and the diverse social political and cultural implications of London s use of the narrative of legacy

The European Territory Jacques Robert, 2014-05-09 Originally published in French as *Le territoire europ en des racines aux enjeux globaux* this book

reflects the enormous changes that Europe has seen in the past half century In a period of immense upheaval the continent has experienced increased integration largely through the development of the European Union heightened urbanization and a changing rural landscape while economic and commercial activities have impressed their stamp on the whole scene In this book Jacques Robert deploys the experience amassed throughout his 35 years experience as adviser to European institutions in the field of territorial and regional development The chapter on cities explains the emergence of the European urban hierarchy and the driving forces and inertia behind its evolution while a following chapter looks at the changing role of rural areas This material provides a historic overview of relevant policies and a discussion of future challenges The third chapter discusses evolving paradigms of regional economic development and their impact on European regions Next there is a chapter on the historical roots and current processes within territorial integration The book concludes with an examination of Europe's place in the world at large focussing particularly on globalization effects climate change and new energy paradigms which will present real challenges for decades to come The book is unique in its combination of in depth analysis of the evolution of European territorial policies and paradigms but also in its geographically comprehensive approach integrating the experience of both Western and Eastern Europe It will be of interest to academics and professionals within territorial development and spatial planning

Soft Spaces in Europe Phil Allmendinger, Graham Haughton, Jörg Knieling, Frank Othengrafen, 2015-05-01 The past thirty years have seen a proliferation of new forms of territorial governance that have come to co exist with and complement formal territorial spaces of government These governance experiments have resulted in the creation of soft spaces new geographies with blurred boundaries that eschew existing political territorial boundaries of elected tiers of government The emergence of new non statutory or informal spaces can be found at multiple levels across Europe in a variety of circumstances and with diverse aims and rationales This book moves beyond theory to examine the practice of soft spaces It employs an empirical approach to better understand the various practices and rationalities of soft spaces and how they manifest themselves in different planning contexts By looking at the effects of new forms of spatial governance and the role of spatial planning in North western Europe this book analyses discursive changes in planning policies in selected metropolitan areas and cross border regions The result is an exploration of how these processes influence the emergence of soft spaces governance arrangements and the role of statutory planning in different contexts This book provides a deeper understanding of space and place territorial governance and network governance

Territorial Cohesion in Rural Europe Andrew Copus, Philomena de Lima, 2014-08-13 This book reflects on how the economies social characteristics ways of life and global relationships of rural areas of Europe have changed in recent years This reveals a need to refresh the concepts we use to understand measure and describe rural communities and their development potential This book argues that Europe has outgrown many of the stereotypes usually associated with it with substantial implications for European Rural Policy Rural structural change and its evolving geography are portrayed through regional typologies and the

concept of the New Rural Economy Demographic change migration business networks and agricultural restructuring are each explored in greater detail Implications for equality and social exclusion and recent developments in the field of governance are also considered Despite being a subject of active debate interventions in the fields of rural and regional development have failed to adapt to changing realities and have become increasingly polarized This book argues that rural regional policy needs to evolve in order to address the current complex reality partially reformulating territorial or place based approaches and the New Rural Paradigm following a set of principles termed Rural Cohesion Policy EU Cohesion Policy John Bachtler,Peter Berkowitz,Sally Hardy,Tatjana Muravska,2016-10-26 The Open Access version of this book available at <http://www.tandfebooks.com> doi view 10.4324/9781315401867 has been made available under a Creative Commons Attribution Non Commercial No Derivatives 3.0 license This book brings together academics members of European institutions and regional and national level policymakers in order to assess the performance and direction of EU Cohesion policy against the background of the most significant reforms to the policy in a generation Responding to past criticisms of the effectiveness of the policy the policy changes introduced in 2013 have aligned European Structural and Investment Funds with the Europe 2020 strategy and introduced measures to improve strategic coherence performance and integrated development EU Cohesion Policy Reassessing performance and direction argues that policy can only be successfully developed and implemented if there is input from both academics and practitioners The chapters in the book address four important issues the effectiveness and impact of Cohesion policy at European national and regional levels the contribution of Cohesion policy to the Europe 2020 strategy of smart sustainable and inclusive growth the importance of quality of government and administrative capacity for the effective management of the Funds and the inter relationships between institutions territory and place based policies The volume will be an invaluable resource to students academics and policymakers across economics regional studies European studies and international relations **Code and the City** Rob Kitchin,Sung-Yueh Perng,2016-04-20 Software has become essential to the functioning of cities It is deeply embedded into the systems and infrastructure of the built environment and is entrenched in the management and governance of urban societies Software enabled technologies and services enhance the ways in which we understand and plan cities It even has an effect on how we manage urban services and utilities Code and the City explores the extent and depth of the ways in which software mediates how people work consume communication travel and play The reach of these systems is set to become even more pervasive through efforts to create smart cities cities that employ ICTs to underpin and drive their economy and governance Yet despite the roll out of software enabled systems across all aspects of city life the relationship between code and the city has barely been explored from a critical social science perspective This collection of essays seeks to fill that gap and offers an interdisciplinary examination of the relationship between software and contemporary urbanism This book will be of interest to those researching or studying smart cities and urban infrastructure *Data and the City* Rob Kitchin,Tracey

P. Lauriault, Gavin McArdle, 2017-08-15 There is a long history of governments businesses science and citizens producing and utilizing data in order to monitor regulate profit from and make sense of the urban world Recently we have entered the age of big data and now many aspects of everyday urban life are being captured as data and city management is mediated through data driven technologies Data and the City is the first edited collection to provide an interdisciplinary analysis of how this new era of urban big data is reshaping how we come to know and govern cities and the implications of such a transformation This book looks at the creation of real time cities and data driven urbanism and considers the relationships at play By taking a philosophical political practical and technical approach to urban data the authors analyse the ways in which data is produced and framed within socio technical systems They then examine the constellation of existing and emerging urban data technologies The volume concludes by considering the social and political ramifications of data driven urbanism questioning whom it serves and for what ends This book the companion volume to 2016 s Code and the City offers the first critical reflection on the relationship between data data practices and the city and how we come to know and understand cities through data It will be crucial reading for those who wish to understand and conceptualize urban big data data driven urbanism and the development of smart cities

Smart Specialisation Dominique Foray, 2014-08-13 This is the first book on a new policy approach that has been widely adopted in Europe and beyond It analyses the concept of smart specialisation and discuss the need for smart specialisation strategies explains why the approach is new and different from more standard policy processes and explores what are the conditions for successful implementation Smart Specialisation Opportunities and Challenges for Regional Innovation Policy describes the origin of the concept explains when a smart specialisation policy is necessary provides a detailed analysis of the design principles of the policy and discuss the pertinence of this approach according to regional development levels Finally the book discuss the practical implementation phase of the process based on the first feedback acquired from certain regions engaged in the preparation of their smart specialisation strategy The book is original in that it provides the first full analysis of smart specialisation strategies both at theoretical and practical levels It has been written at the critical period of the implementation of smart specialisation strategies in every region in Europe The fact that the EU has adopted smart specialisation as a mandatory principle for every region and member states will make this book well received by and very useful for i policy makers in regional and national administrations in Europe ii policy makers in other parts of the world who are in charge of regional policy and have heard about the concept iii consultants analysts and experts who are active on the markets for smart specialisation diagnosis and expertise iv scholars researchers and graduate students working in the field of regional studies technology policy and geography of innovation

Entrepreneurship in a Regional Context Michael Fritsch, David Storey, 2017-08-17 Enterprise and entrepreneurship is of strong interest to policy makers because new and small firms can be a key contributor to job and wealth creation However this contribution varies spatially with some areas in a country having new firm formation rates that are up to three or four times higher than others

The vast majority of these new firms begin in the geographical area in which the founder lives works or was born emphasising that entrepreneurship is a local event The book documents a diversity of research approaches to examining the regional determinants of entrepreneurship in countries as contrasting as India and Sweden The Editors call is for scholars to better understand the long run factors that influence enterprise at the local and regional level For policy makers the Editors challenge is for them to be much clearer about the targets for their policies Is it new firms new jobs productivity and does it matter where these targets are delivered This book was published as a special issue of *Regional Studies* *Territorial Designs and International Politics* Boaz Atzili, Burak Kadercan, 2018-12-07 Territory is back with a vengeance Although territorial politics never really went away it was often perceived that way in public discussion and among scholars The territorial conflicts of the last several years however have raised new academic and policy questions revived old debates that were nearly forgotten and forced us to rethink many of our common conceptions Social scientists broadly agree that territory as well as the boundaries that confine it and group identity that relates to it are socially constructed rather than natural or primordial But how and through which mechanisms is the meaning of territory constructed By whom For which purposes and by what tools Which forces influence such territorial designs How do different territorial designs affect state behavior in particular and the dynamics of international politics in general This book brings together political scientists and geographers both disciplines in which scholars have long researched such questions to create a mutually fertilizing dialogue which will advance our understanding of territorial designs The authors tackle core theoretical questions institutions and ideas of territoriality borders space place and identity as well as the methodologies used to study them They utilize case studies as far apart as the Ottoman Empire the colonization of Ireland and current day Middle East and they interrogate the characteristics of spaces as different as land air and water The chapters were originally published as a special issue of *Territory Politics Governance* *Spaces and Places in Central and Eastern Europe* Gyula Horváth, 2014-08-21 Across Europe there is a rapidly changing context for undertaking regional development In the 20th century development of the former planned economies Bulgaria Czech Republic Hungary Poland Romania and Slovakia was defined by these countries differences rather than their common ideological roots These disparities altered over time and were marked by changing social structures However the ranking of regions has remained the same as core areas have strengthened their positions while the structural obstacles to the modernisation of peripheral areas have remained due to a lack of coherent regional policy This book examines the specific regional development paths of Central and Eastern European countries and evaluates the effects of the determining factors of this process Through analysis of the system of objectives instruments and institutions used in different eras and case studies of Hungary East Germany and Germany development models are established and compared with Western European patterns The book summarises the experiences of Central and Eastern European regional cooperation and examines the basic nature of the cohesion problems of the Carpathian Basin trans national macro region It confirms by

comparative historical analyses that the transformation was indeed unique This book will make a welcome addition to the literature for students and academics interested in the broader picture of Central and Eastern European politics future integration within the European Union and the history of regional development processes
