Climate Change-Resilient Agriculture and Agroforestry Paula Castro, Anabela Marisa Azul, Walter Leal Filho, Ulisses M. Azeiteiro, 2019-01-24 This book collects wide ranging contributions such as case studies reviews reports on technological developments outputs of research studies and examples of successful projects presenting current knowledge and raising awareness to help the agriculture and forestry sectors find solutions for mitigating climate variability and adapting to change

It brings the topic of ecosystem services closer to education and learning as targeted by the Framework Convention on Climate Change and the Paris Agreement the 2030 Agenda for Sustainable Development and the EU Biodiversity Strategy to 2020 Climate change and its impacts on agriculture and agroforestry have been observed across the world during the last 50 years Increasing temperatures droughts biotic stresses and the impacts of extreme events have continuously decreased agroforestry systems resilience to the effects of climate change As such there is a need to adapt farming and agroforestry systems so as to make them better able to handle ever changing climate conditions and to preserve habitats and ecosystems services

Hydrostructural Pedology Erik Braudeau, Amjad T. Assi, Rabi H. Mohtar, 2016-06-17 This book presents an in depth guide to the subject matter and main points of hydrostructural pedology as theorized for the first time The authors focus on the underlying concepts the purpose and role this field plays within agroenvironmental sciences It is divided into two parts Part 1 presents the theory behind hydrostructural pedology The systemic approach applied to the soil is presented showing how this leads to the thermodynamic formulation of water in the soil's organized medium and to the systemic modeling of soil water coupling in natural or anthropic organizations Part 2 presents the methodology to complement the first part In it the authors determine the hydrostructural characteristics of the pedostructure characteristic parameters of equilibrium state equations and the hydrostructural functioning of the soil

Modeling for Sustainable Management in Agriculture, Food and the Environment George Vlontzos, Yiannis Ampatzidis, Basil Manos, Panos M. Pardalos, 2021-12-23 Recent developments in computer science data mining and big data analytics have resulted in new operational frameworks in agriculture food and the environment which in fact share a strong link between them A key challenge for researchers is to extract new data patterns and utilize them in decision making Managers policy makers and practitioners have to be aware of these methodologies in order to establish efficient and effective working groups for the tasks to be resolved The book reviews the complexity of the interrelationship between agriculture food production and processing and environmental issues It also highlights the prospects of modeling in various cases of problem solving in these sectors and reviews the new and future challenges Consumer awareness in food production and processing practices is continually increasing and the necessity for advanced behavioural tools follows the same trend Furthermore the value chain management challenge is becoming one of the most crucial tasks due to the increased importance of new parameters like the origin of products its environmental footprint and the enhancement of local production etc The book addresses these topics in a holistic approach merging modeling with advanced marketing practices in a coherent and innovative manner being an effective tool in a continuously demanding world

agricultural issues and knowledge then proposes alternative solutions Finance or Food? Hilde Bjorkhaug, Philip McMichael, Bruce Muirhead, 2020-01-29 Exploring the ways in which culture systems of value and ethics impact agriculture this volume addresses contemporary land questions and conditions for agricultural land management Throughout the editors and contributors consider a range of issues including pressure on farmland international and global trade relations moral and ethical questions and implications for governance The focus of Finance or Food is land use in Australia Canada and Norway chosen for their commonalities as well as their differences With reference to these specific national contexts the contributors explore political ecological and ethical debates concerning food production alternative energy and sustainability The volume argues that recognition of food finance energy and climate crises is driving investments and reframing the strategies of development agencies At the same time food producers small farmers and pastoralists facing eviction from their land are making their presence felt in this debate not just locally but in national policy arenas and international fora as well This volume investigates the many ways in which this process is occurring and draws out the cultural implications of new developments in global land use An important intervention into a timely debate Finance or Food will be essential reading for both academics and policymakers **Farm-Level Modelling** Shailesh Shrestha, Andrew Barnes, Bouda Vosough Ahmadi, 2016-09-28 Agriculture is the product of a complex mixture of behavioural biophysical and market drivers Understanding how these factors interact to produce crops and livestock for food has been the focus of economic investigation for many years The advent of optimisation algorithms and the exponential growth in computing technology has allowed significant growth in mathematical modelling of the dynamics of agricultural systems The complexity of approaches has grown in parallel with the availability of data at increasingly finer resolutions Farm level models have been widely used in agricultural economic studies to understand how farmers and land owners respond to market and policy levers This book provides an in depth description of different methodologies and techniques currently used in farm level modelling While giving an overview of the theoretical grounding behind the models an applied approach is also used Case studies range from the application of modelling to policy reforms and the subsequent impacts on rural communities and food supply This book also provides descriptions of the use of farm level models in much wider fields such as aggregation and linking with sectoral models Its purpose is to show the reader the methods that have been employed to inform decision makers about how to improve the economic social and environmental goals required to achieve the aims of multidimensional policy Handbook of Environmental Impact Assessment Fonseca, Alberto, 2022-09-08 Reviewing over 50 years of Environmental Impact Assessment EIA policy making and implementation around the world this thought provoking Handbook provides a comprehensive overview of the current research surrounding EIA Presenting new trends in law and policy making it highlights best practices in the application of technology to impact prediction and management procedural efficiency decision making and public participation Quantification of Climate Variability, Adaptation and Mitigation for Agricultural

Sustainability Mukhtar Ahmed, Claudio O. Stockle, 2016-09-06 This book is a comprehensive volume dealing with climate change impacts on agriculture and which can help guide the redesign of agricultural management and cropping systems. It includes mitigation techniques such as use of bioenergy crops, fertilizer and manure management, conservation tillage, crop rotations, cover crops, and cropping intensity, irrigation, erosion control, management of drained wetlands, lime amendments, residue management, biochar, and biotechnology. It also includes Management of GHG emissions, Crop models as decision support tools, QTL analysis, Crop water productivity, Impacts of drought on cereal crops, Silvopastoral systems, Changing climate impact on wheat based cropping systems of South Asia, Phosphorous dynamics under changing climate, Role of bioinformatics. The focus of the book is climate change mitigation to enhance sustainability in agriculture. We present various kinds of mitigation options, ways to minimize GHG emissions, and better use of the latest techniques in conservation and environmental sustainability.
