Entropy Demystified Potential Order Life And Money:

Money, Virtual Energy Octavian Ksenzhek, 2007 Economic activity of humankind is considered in the book through the prism of fundamental physical concepts of Irreversible Thermodynamics In the frame of such an approach the Economy appears as an immense global system which performs work necessary for functioning human societies at the expense of dissipation of energy both biological provided with food and technological used for industrial and everyday needs Money plays a fundamental role of virtual energy specific for economic processes that makes possible mutual coupling of energy flows distinct in their nature The author applies the concept of entropy of money and shows that it depends upon the degree of concentration of money In turn entropy of money is shown to define attainable level of capability of money to perform work An ambivalent role of inequality in income distribution in a society as a natural consequence of economic activity of humans and as a factor of its motivation is analyzed Representing economy as a system driven by energy flows the author touches some conjugated global problems caused by developing economic activity of humankind such as ecological ones The considerations concerning the distinction between exogenous and endogenous energy as well as between heat associated and substance associated entropy seem to be very important *Econophysics & Economics of Games, Social Choices and Quantitative Techniques* Banasri Basu, Bikas K. Chakrabarti, Satya R. Chakravarty, Kausik Gangopadhyay, 2010-06-01 The combined efforts of the Physicists and the Economists in recent years in analyzing and modelling various dynamic phenomena in monetary and social systems have led to encouraging developments generally classified under the title of Econophysics These developments share a common ambition with the already established field of Quantitative Economics This volume intends to offer the reader a glimpse of these two parallel initiatives by collecting review papers written by well known experts in the respective research frontiers in one cover This massive book presents a unique combination of research papers contributed almost equally by Physicists and Economists Additional contributions from Computer Scientists and Mathematicians are also included in this volume The book consists of two parts the first part concentrates on Econophysics problems and the second part stresses on various quantitative issues in Economics Both parts specialize on frontier problems in Games and Social Choices *The Elgar Companion to Information Economics* Daphne R. Raban, Julia W_odarczyk, 2024-03-14 The Elgar Companion to Information Economics dexterously navigates this interdisciplinary field of research which celebrates the crucial contribution of information to decision making market dynamics and economic well being Offering a wealth of conceptual analysis this erudite Companion embarks on an intellectual journey exploring the fundamentals of information economics This title contains one or more Open Access chapters *The Thermodynamics of evolution* François Roddier, 2020-04-24 Thermodynamique de l'évolution Un essai de thermo bio sociologie translated into English with the help of Steve Ridgway PROPOS DE L'AUTEUR François Roddier est né en 1936 Astrophysicien il est connu de tous les astronomes pour ses travaux qui ont permis de compenser l'effet des turbulences atmosphériques lors de l
