## **Entropy In Urban And Regional Modelling Routledge Revivals:**

*Entropy in Urban and Regional Modelling* Alan Wilson, 2011 First published in 1970 this groundbreaking investigation into Entropy in Urban and Regional Modelling provides an extensive and detailed insight into the entropy maximising method in the development of a whole class of urban and regional models The book has its origins in work being carried out by the author in 1966 when he realised that the well known gravity model could be derived on the basis of an analogy with statistical rather than Newtonian mechanics Subsequent investigation demonstrated that the entropy maximising method stems from an even higher level of generality and the beginning of the book is devoted to an account of its importance and use as a general modelling tool This reissue will be welcomed by a range of students and professionals from fields as diverse as urban and regional studies economics geography planning civil engineering mathematics and statistics [Entropy in Urban and Regional Modelling \(Routledge Revivals\)](#) Alan Wilson, 2013-01-11 First published in 1970 this groundbreaking investigation into Entropy in Urban and Regional Modelling provides an extensive and detailed insight into the entropy maximising method in the development of a whole class of urban and regional models The book has its origins in work being carried out by the author in 1966 when he realised that the well known gravity model could be derived on the basis of an analogy with statistical rather than Newtonian mechanics Subsequent investigation demonstrated that the entropy maximising method stems from an even higher level of generality and the beginning of the book is devoted to an account of its importance and use as a general modelling tool This reissue will be welcomed by a range of students and professionals from fields as diverse as urban and regional studies economics geography planning civil engineering mathematics and statistics [Entropy in Urban and Regional Modelling \(Routledge Revivals\)](#) Alan Wilson, 2013-01-11 First published in 1970 this groundbreaking investigation into Entropy in Urban and Regional Modelling provides an extensive and detailed insight into the entropy maximising method in the development of a whole class of urban and regional models The book has its origins in work being carried out by the author in 1966 when he realised that the well known gravity model could be derived on the basis of an analogy with statistical rather than Newtonian mechanics Subsequent investigation demonstrated that the entropy maximising method stems from an even higher level of generality and the beginning of the book is devoted to an account of its importance and use as a general modelling tool This reissue will be welcomed by a range of students and professionals from fields as diverse as urban and regional studies economics geography planning civil engineering mathematics and statistics [Urban Systems \(Routledge Revivals\)](#) C S Bertuglia, G. Leonardi, S. Occelli, G. A. Rabino, R. Tadei, Alan Wilson, 2013-10-18 This edited collection first published in 1987 provides a comparative analysis of different approaches to urban modelling and lays the foundations for the possibility of integration and a more unified field The first part contextualises the development of the field of urban systems modelling focusing on the variety of approaches and possible implications of this on the future of research and methodology Next the editors consider economic and non

economic approaches followed by an analysis of spatial interaction based approaches Providing an overview to the field and research literature the overarching argument is that there should be an integrated methodological approach to urban system modelling

Urban Dynamics (Routledge Revivals) C.S. Bertuglia, 2013-12-19 Originally published in 1990 this work analyses the use of contemporary computer models to simulate urban systems The work deals with the two significant traditions of model building firstly the building of integrated models following the seminal research of Lowry first published in 1964 but with relatively simple submodels and secondly intensive research on particular submodels with a variety of techniques This volume constructs a model building exercise which integrates the two traditions an integrated model in a modular form with alternative components using the most advanced submodels The book concludes with a presentation of an example of an operational model of this type

Urban Geography (Routledge Revivals) David Clark, 2013-09-13 This book first published in 1982 addressed the need for a fresh and comprehensive guide to the rapidly expanding area of urban geography Drawing on examples from cities in a number of countries including the U S A David Clark outlines the contribution of geographers to the understanding of the city and urban society and analyses the growth of the urban environment alongside planning and policy A thorough and unique study this title will be of particular value to undergraduate students as well as laying the foundations for a more advanced study in urban geography and planning

**Store Choice, Store Location and Market Analysis (Routledge Revivals)** Neil Wrigley, 2014-10-14 This book first published in 1988 brings together leading researchers from both the retailing business and the academic world to discuss the latest techniques of analysis and forecasting in the fields of store choice store location and market analysis Its rationale is the major restructuring of the UK retailing industry which has taken place over the past twenty years and the profound implications of that restructuring for the type of research necessary to understand maintain and enhance corporate responsibility The contributors present accounts of the development of new and original methods for retail analysis and forecasting purposes They lay stress upon practical methods which are accurate and robust and which can operate with the type of data typically available to retailers The book will provide a major work of reference for retailers market researchers retail analysts estate managers urban planners and geographers in many countries

Building Capitalism (Routledge Revivals) Linda Clarke, 2012-12-06 First published in 1992 this Routledge Revival sees the reissue of a truly original exploration of the nature of urbanization and capitalism Linda Clarke's vital work argues that Urbanization is a product of the social human labour engaged in building as well as a concentration of the labour force The quality of the labour process determines the development of production Changes to the built environment reflect changes in the production process and in particular the development of wage labour To support these arguments the author identifies a qualitatively new historical stage of capitalist building production involving a significant expansion of wage labour and hence capital and the transition from artisan to industrial production Linda Clarke draws from a wide range of original material relating to the development of London from

the mid eighteenth to the early nineteenth century to provide a complete description of the development process materials extraction roadbuilding housebuilding paving cleansing etc profiles of builders and contractors involved and a picture of the new working class communities as in Somers Town their living conditions population working environment and politics

*Catastrophe Theory and Bifurcation (Routledge Revivals)* Alan Wilson, 2012-11-12 Mathematical models have long been used by geographers and regional scientists to explore the working of urban and regional systems via a system where the equilibrium point changes slowly and smoothly as the parameters change slowly and smoothly However this all changed with the advent of catastrophe theory and bifurcation which enabled the development of models where a quite sudden change in the position of the equilibrium point results from a slow small smooth change in one or more parameters First published in 1981 this reissue of Professor Wilson's classic study outlines the implications of these mathematical models for geography and regional science by way of a survey of contemporary applications

### **Sustainability Assessment of Urban Systems**

Claudia R. Binder, Romano Wyss, Emanuele Massaro, 2020-03-26 Our world is becoming more urban More than fifty percent of the global population now lives in cities which poses new challenges for sustainable development This book integrates theory and methods of sustainability assessment with concepts from systems science to provide guidelines for assessing the sustainability of urban systems It discusses different aspects of urban sustainability from energy and housing to mobility and health covering social economic and environmental factors as well as the various stakeholders and actors involved The book argues for the need to find models and solutions in order to design sustainable cities of the future in light of the complexity of urban social life Including diverse case studies from the developed and developing world this book provides a useful reference for researchers and students from a broad range of disciplines working in the field of sustainability as well as for environmental consultants and policy makers

### **Transport Planning for Third World Cities (Routledge Revivals)**

Harry T. Dimitriou, 2013-06-26 Cities within the developing world experience a form of urban development which is different to those in more industrialised countries Rates of growth are usually much more dramatic housing and transport are often provided informally and institutional support for urban management is also much weaker The crux of this book first published in 1990 lies in the idea that urban transport planning cannot be viewed in isolation from this wider development context Making special reference to a number of countries including Brazil India and Indonesia chapters discuss problems of urban transport planning deficiencies in the theory and practice of conventional transport planning and the emerging alternatives in the countries under examination This work addresses problems that are still of great concern to urban policy planners professionals and academics as well as students from the fields of development studies urban geography and planning architecture and civil engineering

*Routledge Revivals: Behavioral Problems in Geography (1969)* Kevin Cox, Reginald Golledge, 2017-11-22 Originally published in 1969 Behavioral Problems in Geography unpacks and identifies elements of behavioral models and theories The book seeks to examine their specific effects on spatial activity and to

operationalize some of the concepts previously used in a subjective and descriptive manner All papers are united by a common concern for the building of geographic theory regarding human behavior Contributions in the volume vary a great deal in their emphasis ranging from philosophy and review to theorizing and operationalization Each paper recognizes the importance of examining the behavioural basis of spatial activity This book will appeal to scholars of geography and psychology alike

Exploring Contemporary Migration Paul Boyle, Keith Halfacree, Vaughan Robinson, 2014-06-11 Exploring Contemporary Migration provides the first comprehensive introduction to the various aspects of population migration in both the developed and the developing worlds Some of the most important quantitative and qualitative methods used for the description and analysis of migration are presented in a clearly structured and accessible way The various theoretical approaches used to explain the complex patterns of migration are also summarised These patterns are then explored through the use of specific migration related themes employment stage in the life course quality of life societal engineering violence and persecution and the role of culture Exploring Contemporary Migration is written in a user friendly accessible style appealing to undergraduate students of population geography and social science students taking a population module This text will also be valuable reading to those researchers and academics concerned with gaining a broad understanding of the dynamics and patterns of contemporary population

**Histoire & mesure**, 1987 **Wilson, A.G. Entropy in Urban and Regional Modelling** Peter Rogers, 1973

The British National Bibliography Arthur James Wells, 1971

People and Environment D.J. Walmsley, G.J. Lewis, 2014-09-19 First published in 1994 This book comprises a second edition of Human Geography behavioural approaches first published in 1984 The first edition attempted to synthesize the massive volume of geographical literature to have appeared mainly since 1960 concerned with both how people come to

know the environment in which they live and with the way in which such knowledge influences subsequent spatial behaviour. As with the first edition the rationale for advantages of and shortcomings with behavioural approaches are explored at length in both substantive chapters and in a number of detailed examinations of particular aspects of life in advanced Western society.
