Consequentialism and Environmental Ethics Avram Hiller, Ramona Ilea, Leonard Kahn, 2013-12-04 This volume works to connect issues in environmental ethics with the best work in contemporary normative theory Environmental issues challenge contemporary ethical theorists to account for topics that traditional ethical theories do not address to any significant extent This book articulates and evaluates consequentialist responses to that challenge Contributors provide a thorough and well rounded analysis of the benefits and limitations of the consequentialist perspective in addressing environmental issues In particular the contributors use consequentialist theory to address central questions in environmental ethics such as questions about what kinds of things have value about decision making in light of the long term intergenerational nature of environmental issues and about the role that a state s being natural should play in ethical deliberation

Environmental Ethics Marion Hourdequin, 2024-01-25 What is environmental virtue Is developing good habits enough What does climate justice require Is ecological restoration just another form of the human domination of nature Exploring these questions and more this book provides an up to date and balanced introduction to environmental ethics It first examines ethical theory then ties theory to practice showing how values guide environmental policies but also how policies and institutions shape environmental values Updated and expanded to engage with the latest scholarship scientific findings and societal challenges this 2nd edition features New sections on food ethics multispecies justice intergenerational ethics and the Anthropocene Contemporary case studies focusing on the rights of nature the use of biotechnology in ecological restoration and just climate transitions Expanded coverage of diverse philosophical traditions including Confucian Daoist and Indigenous ethical perspectives Updated discussion questions further reading sections and

online resources Exploring the possibilities and limitations inherent in both classical ethical models and modern theoretical approaches to the environment this is a key resource for teaching students to think ethically about the world we live in

Environmental Ethics and Forestry Peter C. List, 2000 During the past twenty five years North American forestry has received increasingly vigorous scrutiny Critics including the environmentalists environmental scientists representatives of public interest groups and many individual citizens have expressed concerns about forestry's basic assumptions and methods as well as its practical outcomes Criticism has centered on such issues as the exploitation of forests for timber production the reduction and fragmentation of old growth habitats the destruction of biodiversity the degradation of grasslands through grazing practices lack of government attention to recreation facilities silvicultural methods like clearcutting and the use of herbicides and pesticides the exportation of industrial forestry techniques to other parts of the world and the use of public monies to provide services for private resource companies as in the creation of logging roads This rising tide of public scrutiny has led many foresters to suspect that their contract with society to manage forests using their best professional judgment had been undermined Some of these professionals as well as some of their critics have begun to reexamine their old beliefs and to look for new ways of practicing forestry Part of this reflective process has entailed new directions in environmental ethics and environmental philosophy This reader brings together some of the new thinking in this area Here students of the applied environmental and natural resource sciences as well as the interested general reader will discover a rich sampling of writings in environmental ethics and philosophy as they apply to forestry Readings focus on basic ethical systems in forestry and forest management philosophical issues in forestry ethics codes of ethics in forestry and related natural resource sciences such as fisheries science and wildlife biology Aldo Leopold's land ethic in forestry ethical advocacy and whistleblowing in government resource agencies the ethics of new forestry ecoforestry and public debate in forestry as well as ethical issues in global forestry such as the responsibilities of forest corporations environmentalists and individual wood consumers This volume contains materials from the founders of forestry ethics such as Bernhard Fernow Gifford Pinchot John Muir and Aldo Leopold from such organizations as the Society of American Foresters the Wildlife Society the American Fisheries Society Forest Service Employees for Environmental Ethics and the Ecoforesters group in addition to writings by a variety of well known environmental philosophers and foresters including Holmes Rolston Robin Attfield Lawrence Johnson Michael McDonald Paul Wood James E Coufal Raymond Craig Kristin Shrader Frechette Jeff DeBonis Jim L Bowyer Alasdair Gunn Goug Gaigle Alan G McQuillan Stephanie Kaza Alan Dregson Duncan Taylor and Kathleen Dean Moore Author note Peter C List is Professor of Philosophy at Oregon State University where he teaches courses on environmental ethics ethical issues in the natural resource sciences and sustainable forestry He is the author of articles on Aldo Leopold's land ethic and co author of several articles on public attitudes about federal forests and forest management published in the Journal of Forestry and Society and Natural Resources *A New Environmental Ethics* Holmes Rolston III, 2012-04-23 No one looking

ahead at the middle of the last century could have foreseen the extent and the importance of the ensuing environmental crises Now more than a decade into the next century no one can ignore it A New Environmental Ethics the Next Millennium for Life on Earth offers clear powerful and oftentimes moving thoughts from one of the first and most respected philosophers to write on the environment Rolston an early and leading pioneer in studying the moral relationship between humans and the earth surveys the full spectrum of approaches in the field of environmental ethics This book however is not simply a judicious overview Instead it offers critical assessments of contemporary academic accounts and draws on a lifetime of research and experience to suggest an outlook for the future As a result this focused forward looking analysis will be a necessary complement to any balanced textbook or anthology in environmental ethics and will teach its readers to be responsible global citizens and residents of their landscape helping ensure that the future we have will be the one we wish for

Doing Environmental Ethics Robert Traer, 2019-08-28 *Doing Environmental Ethics* explains how we may transform our fossil fuel burning economy which continues to intensify our ecological crisis into a circular and ecological economy The text resists political corruption and personal greed by gleaning ethical insights from our philosophical and religious cultures and by embracing the scientific Gaia hypothesis for the Earth Its reasoning ascribes intrinsic worth to uplifting duties and rights as well as inspiring virtues and relationships and tests applying these values by predicting the likely consequences of acting on them It affirms all life has value for itself and that human life also values reasoning and feelings and being ethical The third edition examines US and international environmental policies through 2018 It analyzes the Trump administration's repudiation of the environmental policies of the Obama administration and its new rules slashing the social costs of climate change The text reviews a draft UN treaty that would impose human rights and environmental constraints on transnational corporations but it also highlights outstanding examples of corporate upcycling and low carbon innovation Finally the third edition explains why food security requires protecting the food sovereignty of farming communities and cooperatives as well as public policies ensuring fair profits for farmers practicing agro ecology

Environmental Ethics for the Long Term John Nolt, 2014-09-25 Broad in scope this introduction to environmental ethics considers both contemporary issues and the extent of humanity's responsibility for distant future life John Nolt a logician and environmental ethicist interweaves contemporary science logical analysis and ethical theory into the story of the expansion of ethics beyond the human species and into the far future Informed by contemporary environmental science the book deduces concrete policy recommendations from carefully justified ethical principles and ends with speculations concerning the deepest problems of environmental ethics Pedagogical features include chapter outlines annotated suggestions for further readings the explanations of key terms when first mentioned and an extensive glossary *Reimagining Ethics* Matteo

Andreozzi, 2025-08-24 Several environmental problems are currently seriously undermining the traditional belief that the moral community should be restricted to human beings only New scientific theories especially in the fields of biology ethology and ecology together with recent scientific discoveries demonstrating how human activities are jeopardizing ecosystem services urge for a paradigmatic change in our moral convictions Environmental ethics has taken up the challenge and opened an extremely urgent and inspiring call for philosophical research This is the call for extending the moral community to non human and non paradigmatic entities regarding them as moral patients The main aim of this book is to analyze the possibility and the legitimacy of a non anthropocentric environmental ethic In pursuing this aim I primarily demonstrate the possibility and need to extend the status of moral patient beyond the ideal paradigmatic human being I also provide an original categorization of several theoretical projects that have been proposed in the last few decades Secondly this book comprises a constructive critique of the most significant moral theories debated in the field and outlines a personal theoretical proposal for a new environmental ethic My claim is that the refusal of ethical and ontological supremacy of human beings is not only necessary but also sufficient to set the foundation for a formally and materially valid ethical system Even without abandoning the most accepted forms of moral epistemology it is nonetheless possible to admit the need to respect different kinds of non human and non paradigmatic moral patients African Democracy Jonathan O.

Chimakonam, Isaiah A. Negedu, 2023-09-21 There are numerous different democratic systems in Africa from the Igbo institutions that date back to the 15th century to Western style democracy introduced by colonial powers But what does democracy really mean for African nations And what effect does it have on the lives of their people This is the first comprehensive examination of the social and political consequences of democracy in Africa Written from an African philosophical perspective leading and emerging scholars explore the impact of democracy in a continent dealing not only with the perennial issues of leadership failure poverty and corruption but also with contemporary global concerns such as

immigration digital media and COVID 19 With a focus first and foremost on the African people this pioneering volume investigates how the challenges of democracy as a system affect their lived experience Looking in particular at the sub Sahara it reveals the influence that the failures of democracy have on fundamental needs including allocation of primary resources autonomy welfare free speech and women s rights African Democracy Impediments Promises and Prospects gives an unflinching insight into the struggles caused by democratic governance in Africa whilst also crucially pointing to its accomplishments and the future possibilities for African nations

Sustainable food production and ethics Werner Zollitsch, Christoph Winckler, Susanne Waiblinger, Alexander Haslberger, 2023-08-28 Sustainability has become an issue widely debated in many countries Given the central role of food supply and the emotional relationship that modern mankind still has to its food sustainability is seen as a value which has to be maintained throughout food supply chains The complexity of modern food systems invokes a variety of ethical implications which emerge from contrasts between ideals perceptions and the conditions of technical processes within food systems and the concerns connected to this This book covers a broad range of aspects within the general issue of sustainable food production and ethics Linking different academic disciplines topics range from reflections about the roots of sustainability and the development of concepts and approaches to

globalisation and resilience of food systems as well as specific ethical aspects of organic farming and animal welfare Modern technologies which are intensely advocated by certain stakeholder groups and their societal challenges are addressed as are many other specific cases of food production and processing consumer perception and marketing

Duties Regarding Nature Toby Svoboda, 2015-06-26 In this book Toby Svoboda develops and defends a Kantian environmental virtue ethic challenging the widely held view that Kant s moral philosophy has little to offer environmental ethics On the contrary Svoboda contends that on Kantian grounds there is good moral reason to care about non human organisms in their own right and to value their flourishing independently of human interests since doing so is constitutive of certain environmental virtues Svoboda argues that Kant s account of indirect duties regarding nature can ground a compelling environmental ethic the Kantian duty to develop morally virtuous dispositions strictly proscribes unnecessarily harming organisms and it also gives us moral reason to act in ways that benefit such organisms Svoboda s account engages the recent literature on environmental virtue including Rosalind Hursthouse Philip Cafaro Ronald Sandler Thomas Hill and Louke van Wensveen and provides an original argument for an environmental ethic firmly rooted in Kant s moral philosophy
