Becoming Nature Positive Marco Lambertini, Joseph W. Bull, Leroy Little Bear, Harvey Locke, Eva

Zabey, Dorothy Maseke, Carlos Manuel Rodríguez, 2025-06-02 As humanity sits at an existential crossroads this book introduces the need to build a nature positive future to secure the functioning and stability of Earth systems essential to the survival and wellbeing of present and future human generations as well as the rest of Earth's amazing diversity of life. Alongside the change in climate a more silent but equally terrifying crisis is unfolding the loss of nature and biodiversity. These twin crises are in fact interconnected. After decades of ignoring our impacts on the natural world we are beginning to realise that nature conservation is a security issue for humanity and an imperative for intersectional and intergenerational justice. For these reasons we must embrace a transition from a nature negative to a nature positive society one that ensures human development and addresses today's inequality while conserving, restoring and sustainably benefiting from nature's resources and services. A Nature Positive future is one with more nature than today more forests more fish more pollinators more soil biodiversity with benefits for the Planet and for us. In this book we define what becoming Nature Positive means from a variety of perspectives what it takes to deliver it and why it is possible and most importantly necessary. This book is essential reading for those concerned with conserving nature and securing a safe future for humanity in the face of climate breakdown biodiversity loss and ecological collapse. The future can be bright. The choice is ours. **Global Environment**

Environmental Principles, 2020-10-30 This book traces the evolution of environmental principles from their origins as vague political slogans reflecting fears about environmental hazards to their embodiment in enforceable laws. Environmental law has always responded to risks posed by industrial society but the new generation of risks have required a new set of environmental principles emerging from a combination of public fears science ethics and established legal practice. This book shows how three of the most important principles of modern environmental law grew out of this new age of ecological risk the polluter pays principle the preventive principle and the precautionary principle. Since the first edition was published the principles of polluter pays prevention and precaution have been encapsulated in a swathe of legislation at domestic and international level. Courts have been invoking environmental law principles in a broad range of cases on issues including GMOs conservation investment waste and climate change. As a result more States are paying heed to these principles as catalysts for improving their environmental laws and regulations. This edition will integrate to a greater extent the relationship between environmental principles and human rights. The book analyses new developments including the EU

Charter of Fundamental Rights the case law of the European Court of Human Rights which has continuously carved out environmental duties from a number of rights enshrined in the European Convention of Human Rights and the implementation of the UNECE Convention on Access to Information Decolonising Blue Spaces in the Anthropocene Meg Parsons, Karen Fisher, Roa Petra Crease, 2021-02-15 This open access book crosses disciplinary boundaries to connect theories of environmental justice with Indigenous people s experiences of freshwater management and governance It traces the history of one freshwater crisis the degradation of Aotearoa New Zealand s Waip River to the settler colonial acts of ecological dispossession resulting in intergenerational injustices for Indigenous M ori iwi tribes The authors draw on a rich empirical base to document the negative consequences of imposing Western knowledge worldviews laws governance and management approaches onto M ori and their ancestral landscapes and waterscapes Importantly this book demonstrates how degraded freshwater systems can and are being addressed by M ori seeking to reassert their knowledge authority and practices of kaitiakitanga environmental guardianship Co governance and co management agreements between iwi and the New Zealand Government over the Waip River highlight how M ori are envisioning and enacting more sustainable freshwater management and governance thus seeking to achieve Indigenous environmental justice IEJ The book provides an accessible way for readers coming from a diversity of different backgrounds be they academics students practitioners or decision makers to develop an understanding of IEJ and its applicability to freshwater management and governance in the context of changing socio economic political and environmental conditions that characterise the Anthropocene
