Climate Emergency in the Philippines Kristoffer B. Berse, Juan M. Pulhin, Antonio G. M. La Viña, 2024-05-18. This book provides a snapshot of the manifestations of the climate emergency in the Philippines from a wide array of disciplines including physical sciences, social sciences, arts and humanities, management and law. Researchers and faculties at the University of the Philippines contributed to this compilation where each chapter provides policymakers and the public a clear picture of why climate change must be confronted with a sense of urgency and near desperation. Divided into three main parts, the first one zeroes in on climate vulnerable sectors such as water, food and agriculture, health and coastal communities in the Philippines to introduce readers to the current pressing impacts of the climate emergency. The second part presents case studies of local experiences from the country's three island regions, namely Luzon, Visayas and Mindanao, and it situates the readers in different environments and contexts. The third part features transdisciplinary responses to the climate emergency including salient challenges in relation to planning, financing, communication and education. The concluding chapter highlights eight areas for action to tackle the climate emergency. Each chapter comes with an overview and a Summary for Policymakers which provides clear guidance for action to be taken by both local and national policymakers. *Encyclopedia of Environmental Change* John A.
