Environmental Melancholia Renee Lertzman, 2015-06-12 In this groundbreaking book Renee Lertzman applies psychoanalytic theory and psychosocial research to the issue of public engagement and public apathy in response to chronic ecological threats By highlighting unconscious and affective dimensions of contemporary ecological issues Lertzman deconstructs the idea that there is a gap between what people care about and what is actually carried out in policy and personal practice In doing so she presents an innovative way to think about and design engagement practices and policy interventions Based on key qualitative fieldwork and in depth interviews conducted in Green Bay Wisconsin each chapter provides a psychosocial psychoanalytic perspective on subjectivity affect and identity and considers what this means for understanding behaviour in relation to environmental crises and climate change The book argues for a theory of environmental melancholia that accounts for the ways in which people experience profound loss and disruption caused by environmental issues and yet may have trouble expressing or making sense of such experiences Environmental Melancholia offers a fresh perspective to the field of environmental psychology that until now has been largely dominated by research in cognitive behavioural and social psychology It will appeal to academics researchers and postgraduate students in the fields of psychoanalysis psychosocial studies and sustainability as well as policy makers and educators internationally

Psychoanalytic Ecology Rod Giblett, 2019-02-25 Psychoanalytic Ecology applies Freudian concepts beginning with the uncanny to environmental issues such as wetlands and their loss to alligators and crocodiles as inhabitants of wetlands and to the urban underside It also applies other Freudian concepts such as sublimation symptom mourning and melancholia to

environmental issues and concerns Mourning and melancholia can be experienced in relation to wetlands and to their loss The city is a symptom of the will to fill or drain wetlands This book engages in a talking cure of psychogeopathology environmental psychopathology mental land illness environ mental illness manifested also in industries such as mining and pastoralism that practice greed and gluttony Psychoanalytic Ecology promotes gratitude for generosity as a way of nurturing environ mental health to prevent the manifestation of these psychogeopathological symptoms in the first place Melanie Klein s work on anal sadism is applied to mining and Karl Abraham s work on oral sadism to pastoralism Finally Margaret Mahler s and Jessica Benjamin s work on psycho symbiosis is drawn on to nurture bio and psycho symbiotic livelihoods in bioregional home habitats of the living earth in the symbiocene the hoped for age superseding the Anthropocene Psychoanalytic Ecology demonstrates the power of psychoanalytic concepts and the pertinence of the work of several psychoanalytic thinkers for analysing a range of environmental issues and concerns This book will be of great interest to students and scholars of environmental psychology psychoanalysis and the environmental humanities *Quality of Life, Environmental Changes and Subjectivity* Sônia Regina da Cal Seixas, João Luiz de Moraes Hoefel, 2021-11-19 In this volume the authors consider how environmental changes affect our social cultural and political lives and in doing so have a direct influence on individuals health In contrast to previous research in the area da Cal Seixas and de Moraes Hoefel emphasize both physical health and mental health as measures of human suffering in an approach informed by the concept of subjectivity Ultimately the authors argue that contemporary environmental changes have a significant effect on the mental and physical wellbeing of the world s population and that analysis and proposals for action should address both concerns in an effort to improve our quality of life

Psychoanalytic Studies of the Work of Adam Smith Sule Ozler, Paul Gabrinetti, 2017-07-14 Psychoanalytic Studies of the Work of Adam Smith blends the rich intellectual heritage of the hermeneutic tradition with the methods and concepts of psychoanalysis in order to examine the seminal works of Adam Smith This is the first book on Smith to analyse the works of the groundbreaking moral theorist and founding father of economics from a psychoanalytic perspective whilst also examining the human capacities and skills that are necessary to put Smith s ideas into practice Starting with a detailed discussion of the psychological difficulties that afflicted Smith zler and Gabrinetti examine the influence that Smith s life had on the ideas that are found in his major works The authors explore the sympathetic process in Smith s *The Theory of Moral Sentiments* TMS from an intersubjectivist perspective and use ideas from developmental psychology to argue that sympathy leads to morality This book contains a thorough analysis of the defences that are used to create Smith s moral system in the TMS and explores how Smith s ideas were precursors to concepts later developed by Freud The authors show that Smith s attitude to women was at best ambivalent and consider the reciprocal interaction between markets and morality from an evolutionary psychology perspective Covering an impressive range of topics this book will appeal to academics and postgraduate students with an interest in psychoanalysis moral philosophy history of thought and the social sciences The book should also be of

interest to more advanced undergraduate students **Psychoanalytic Readings of Hawthorne's Romances** David B. Diamond, 2021-07-08 Offering innovative psychoanalytic readings of Nathaniel Hawthorne's four romances this volume systematically applies Freudian theory to present significant new insights into the psychology of Hawthorne's characters and their fates By critically examining scenes in which the protagonists confront past traumas Diamond underscores the transformative potential which Hawthorne attributes to encounters with the unconscious Psychoanalytic narrative technique is employed to interpret the psychological crises all hidden by Hawthorne in narrative gaps in *The Scarlet Letter* *The House of the Seven Gables* *The Blithedale Romance* and *The Marble Faun* The protagonists' transformations that are illuminated are crucial to an understanding of the trajectory and resolution of the romances The text will benefit both academic and non-academic readers who seek a deeper understanding of the psychology of Hawthorne's romances It will be of particular interest to educators and researchers of applied psychoanalysis and psychoanalytic technique Since its conclusions challenge many currently held critical views this volume is especially relevant to scholars of Hawthorne studies interdisciplinary literary studies and 19th century American literature Everyday Life Ecologies Alice Dal Gobbo, 2023-04-04 *Everyday Life Ecologies* Sustainability Crisis Resistance is about those complex sticky but also open arrangements of bodies objects and plants that make up daily existence The multiple and interlocking lines of a long capitalist crisis disrupt their normal flow sometimes they open opportunities for transformation sometimes else they foreclose horizons of change In contrast with approaches that respond to environmental crisis by advocating sustainable lifestyles and responsible behaviors Alice Dal Gobbo suggests that it is necessary to address the complex socio-material relationalities that constitute everyday ecologies Beyond that the book argues for their politicization illuminating daily existence as embedded in capitalist relations of reproduction Combining political ecology and new materialist sensitivities this book investigates the ways in which ecologically damaging logics are inscribed in everyday assemblages through their habitual rehearsal and libidinal hold But it also points to how apparently banal acts of resistance embody and promote different logics such as a logic of care and an ecological aesthetic ethics of desire Based on ethnographic fieldwork in the Northeast of Italy this journey through the concrete matters and beings of daily life in crisis talks beyond this emplaced reality and dialogues with emerging forms of contestation and prefiguration that put socio-ecological reproduction at their center Textbook of Psychoanalysis, Third Edition Glen O. Gabbard, M.D., Bonnie E. Litowitz, Ph.D., Paul Williams, Ph.D., 2024-07-05 **Post-Sustainability** John Foster, 2018-10-22 The sustainability discourse and policy paradigm have failed to deliver In particular they have failed to avert the dangerously disruptive climate change which is now inevitable So if there is still a case for some transformed or revitalised version of sustainability that case must now surely be made in full acknowledgment of deep-seated paradigm failure to date But if we really take ourselves to be living in a post-sustainable world the issue of what next must be faced and the hard questions no longer shirked What options for political and personal action will remain open on a tragically degraded planet How will

economic and community life political and social leadership and education be different in such a world What will the geopolitics of crisis migration and conflict look like Where does widespread denial come from how might it be overcome and are there any grounds for hope that don't rest on it The urgent challenge now is to confront such questions honestly This collection of essays by thinkers from a diversity of fields including politics philosophy sociology education and religion makes a start This book was originally published as a special issue of Global Discourse

The Unconscious Marianne Leuzinger-Bohleber, Simon Arnold, Mark Solms, 2016-10-04 The Unconscious explores the critical interdisciplinary dialogue between psychoanalysis and contemporary cognitive neuroscience Characterised by Freud as the science of the unconscious mind psychoanalysis has traditionally been viewed as a solely psychological discipline However recent developments in neuroscience such as the use of neuroimaging techniques to investigate the working brain have stimulated and intensified the dialogue between psychoanalysis and these related mental sciences This book explores the relevance of

these discussions for our understanding of unconscious mental processes Chapters present clinical case studies of unconscious dynamics alongside theoretical and scientific papers in key areas of current debate and development These include discussions of the differences between conceptualisations of the unconscious in psychoanalysis and cognitive science whether the core concepts of psychoanalysis are still plausible in light of recent findings and how such understandings of the unconscious are still relevant to treating patients in psychotherapy today These questions are explored by leading interdisciplinary researchers as well as practising psychoanalysts and psychotherapists This book aims to bridge the gap between psychoanalysis and cognitive neuroscience to enable a better understanding of researchers and clinicians engagements with the key topic of the unconscious It will be of key interest to researchers academics and postgraduate students in the fields of psychoanalysis cognitive science neuroscience and traumatology It will also appeal to practising psychoanalysts psychotherapists and clinicians

Psychoanalysis and Ecology Cosimo Schinaia, 2022-03-31 Cosimo Schinaia and Psychoanalysis and Ecology are winners of the IPA Climate Award This book presents the psychoanalyst with the question of how our enormously modified environmental conditions determine our subjective mental changes and vice versa The gravity of the environmental crisis is amply clear and yet in the face of such incontrovertible evidence there is an emotional more than cognitive difficulty in comprehending the present reality and its future consequences In understanding the collective imagination as permeating the individual one and vice versa this book investigates this relationship of mutual co determination between the individual traumatic stories told and experienced in the consulting room and the positive or negative environmental attitudes exhibited by patients The pairing of clinical vignettes with dispatches from the collective imagination sheds light on the confused affective investments and anxieties that propel pathological defenses such as negation suppression intellectualization displacement and disavowal The final chapter concludes with notes on the role of hope in a damaged world and the importance of integrity within the psychoanalytic field and beyond This book will be of great interest to psychoanalysts psychotherapists and psychiatrists as well as anthropologists environmentalists and ecologists
