Markets, Politics and the Environment Barry Goodchild, 2016-08-25 Markets Politics and the Environment answers three groups of question What is planning and as part of this What are its key features as a style of social practice and action and How does planning as a style of social practice relate to social and economic change How as part of the justification for planning might claims of valid technical knowledge be constructed What is meant by rational What is the contribution of pragmatism as a supplement or replacement to rationalism How might rationality and pragmatism be adapted to postmodernism and the requirements of diversity Finally how may concepts of planning be reoriented towards sustainable development as a collective duty How might sustainable development be reworked in relation to planning as a means of managing and stimulating change Each group of question is

discussed in a separate chapter and is associated with different theories debates and examples of practice Markets Politics and the Environment concludes that the full implications of sustainable development and climate change point in the direction of a different type of state a green state whose future functioning can draw on planning theory but at present can only be conceived as a sketchy outline Local Environmental Politics in China Genia Kostka,2017-07-05 Knowledge and insight in national environmental governance in China is widespread However increasingly it has been acknowledged that the major problems in guiding the Chinese economy and society towards sustainability are to be found at the local level This book illuminates the fast changing dynamics of local environmental politics in China a topic only marginally addressed in the literature In the course of building up an institutional framework for environmental governance over the last decade local actors have generated a variety of policy innovations and experiments In large measure these are creative responses to two main challenges associated with translating national environmental policies into local realities The first such challenge is apolicy implementation gap stemming from the absence of the state capacity necessary to the implementation of environmental measures The second challenge refers to the need for local non state actors to engage in environmental management oftentimes such aparticipation gap contributes to implementation failures In recent years we have seen a multitude of initiatives within China at the provincial level and below designed to bridge bothgaps Hence the central aim of this book is to assess these experiments and innovations in local environmental politics This book was originally published as a special issue of the Journal of Environmental Policy and Planning **Asia's Environmental Movements in Comparative Perspective** Alvin Y. Maloney,2012-03-15 This book examines citizen engagement in contemporary democratic politics and the development of new participatory forms Based on empirical information gathered from citizens activists and organizations it examines the changing face of democratic participation Advanced democracies are plagued by the complex problem of basing political decisions on the active engagement of citizens and citizens organisations Although the benefits of an active citizenry appear great the reality is that most citizens positively embrace a relatively marginal role in organised politics The conventional activist citizens as active members engaged in voluntary associations and collective decision making seems to be replaced by passive supporters and donors or ephemeral or episodic democratic participators This volume aims to address several issues at the core of this transformation the rise of checkbox participation the growing attractiveness of individualized forms of participation and the increasing relevance of professional expertise Looking beyond the traditional single focus on participation or on organizations in isolation the book innovatively examines the empirical link that can be established between actual developments in democratic participations and the organizational framework in European countries New Participatory Dimensions in Civil Society is essential reading for students and scholars of democracy participation civil society politics and sociology
