Environmental Politics Of Sacrifice By Michael F Maniates 2010 07 06:

Environmental Health Perspectives ,2010 *Architecture and Design Versus Consumerism* Ann Thorpe,2012

Informed by recent research into the viability of a steady state economy this book sets an agenda for addressing the designer's paradox of sustainable consumption **The Environmental Politics of Sacrifice** Michael Maniates,John M. Meyer,2010

An argument that the idea of sacrifice with all its political baggage opens new paths to environmental sustainability

Refugees, Refuge, and Human Displacement Ignacio López-Calvo,Marjorie Agosin,2022-11-01 Every American is a descendant of either a Native American and enslaved person an immigrant or a refugee This book is devoted to the fourth category The essays in this volume will study the concept of refuge as well as historical forced displacement and statelessness trying to provide potential lasting solutions to the many problems associated with this situation This volume is not only timely but expansive as it moves from the pressing crisis of refugees to the crisis of humanity that seeks to find refuge From refugees to asylum seekers from climate change to war from historical uprootedness and displacement to today's crisis of refugeeism these topics are mobilizing humanities scholars to think about refugees with a new sense of urgency This book demonstrates how interdisciplinary cultural approaches grounded in the humanities can transform refugee conversations so often dominated by political science economics and other disciplines In doing so the collection sets up far more inclusive refugee discussions and urges humanities thinkers to respond by taking the lead in the face of environmental and sociopolitical uncertainties **Looking behind the Label** Tim Bartley,Sebastian Koos,Hiram Samel,Gustavo

Setrini,Nik Summers,2015-05-25 What does it mean when consumers shop with a conscience and choose products labeled as fair or sustainable Does this translate into meaningful changes in global production processes To what extent are voluntary standards implemented and enforced and can they really govern global industries Looking behind the Label presents an informative introduction to global production and ethical consumption tracing the links between consumers choices and the practices of multinational producers and retailers Case studies of several types of products wood and paper food apparel and footwear and electronics are used to reveal what lies behind voluntary rules and to critique predominant assumptions about ethical consumption as a form of political expression **What's Wrong with Climate Politics and How to Fix It** Paul G.

Harris,2013-07-11 Governments have failed to stem global emissions of carbon dioxide and other greenhouse gases causing climate change Indeed climate changing pollution is increasing globally and will do so for decades to come without far more aggressive action What explains this failure to effectively tackle one of the world's most serious problems And what can we do about it To answer these questions Paul G Harris looks at climate politics as a doctor might look at a very sick patient He performs urgent diagnoses and prescribes vital treatments to revive our ailing planet before it's too late The book begins by diagnosing what's most wrong with climate politics including the anachronistic international system which encourages nations to fight for their narrowly perceived interests and makes major cuts in greenhouse pollution extraordinarily difficult

the deadlock between the United States and China which together produce over one third of global greenhouse gas pollution but do little more than demand that the other act first and affluent lifestyles and overconsumption which are spreading rapidly from industrialized nations to the developing world The book then prescribes several remedies for the failed politics of climate change including a new kind of climate diplomacy with people at its center national policies that put the common but differentiated responsibilities of individuals alongside those of nations and a campaign for simultaneously enhancing human wellbeing and environmental sustainability While these treatments are aspirational they are not intended to be utopian As Harris shows they are genuine workable solutions to what ails the politics of climate change today
