Scientific American Environmental Science for a Changing World Anne Houtman, Susan Karr, Jeneen Interlandi, 2012-03-05 Environmental Science for a Changing World captivates students with real world stories while exploring the science concepts in context Engaging stories plus vivid photos and infographics make the content relevant and visually enticing The result is a text that emphasizes environmental scientific and information literacies in a way that engages students

Advancing Geoinformation Science for a Changing World Stan Geertman, Wolfgang Reinhardt, Fred Toppen, 2011-03-25 The book comprises innovative research presented at the 14th Conference of the Association of Geographic Information Laboratories in Europe AGILE held in 2011 in Utrecht The Netherlands The scientific papers cover a large variety of fundamental research topics as well as applied research in Geoinformation Science including measuring spatiotemporal phenomena quality and semantics spatiotemporal analysis modeling and decision support as well as spatial information infrastructures The book is aimed at researchers practitioners and students who work in various fields and disciplines related to Geoinformation Science and technology

Environmental Risk and Resilience in the Changing World Swapan Talukdar, Atiqur Rahman, Somnath Bera, G. V. Ramana, Atish Prashar, 2024-09-06 This book provides huge knowledge and data in the fields of geospatial sciences earth environmental sciences humanities and social sciences which target a diverse range of readers such as academics scientists students environmentalists meteorologists urban planners remote sensing and GIS experts Earth environment ecological envelope of geosphere biosphere hydrosphere atmosphere and cryosphere faces a significant challenge from different risks and threats due to due to rapid changes in global land use population increase and pollution They might drastically impair the ecosystem s ability to maintain long term service levels while bolstering the economic social and environmental pillars of sustainable development Therefore risk assessment RA has lately become a prominent research topic and a powerful mechanism for enforcing legal activities related environmental restoration and health improvements to do sustainable development The United States Environmental Protection Agency USEPA first used the risk assessment approach in 1980 and since then it has expanded and become standard practice in many areas of ecological research Some practices are air quality assessment land degradation assessment natural hazards

risk assessment urban surface ecological health condition wetland and forest health assessment and drinking water quality assessment However recently risk assessment alone is not sufficient to propose any sustainable management plans Also there is no universal strategy for conducting risk assessments and insufficient expertise with the methodology may result in erroneous findings Therefore scientists are increasingly interested in developing resilience strategies with AI and geospatial based risk assessment to lower environmental risk Different resilience approaches make different assumptions about the system dynamics involved in resilience based environmental risk and impact assessment Therefore this book seeks to showcase the most current advances in risk and hazards assessment of environments with resilience strategies to mitigate the prevailing environmental issues with the help of remote sensing GIS artificial intelligence and state of the art frameworks like PSR VIOR nature based solutions
