Ebook Online European Banking Union Challenges International:

Crises and Integration in European Banking Union Christopher Mitchell, 2023-12-06 It is conventional wisdom among scholars policymakers and other observers that crises are one of the primary drivers of European integration. However, while many crises have indeed spurred deeper integration, there is also no shortage of crises that failed to produce meaningful deepening or even led to disintegration. The literature on European integration has to date failed to develop a theory to identify ex ante which crises are most likely to produce integrating reform. *Crises and Integration in European Banking Union* addresses that gap, building a theory of how the combination of crisis severity and origin indicates whether a crisis will produce deep reform, modest reform, or a persistence of the pre-crisis status quo. Mitchell does so by examining the relative impact of a series of crises on the centralization of European financial regulation in the 21st century, including the 2007-09 Banking Crisis, 2010-14 Debt Crisis, the Brexit shock, and the 2020-21 COVID-19 Pandemic. It thus also makes an important contribution to the literature on European financial regulation and the steps needed to complete a European banking and capital markets union. The volume not only addresses a significant theoretical gap but also provides a foundation for policymaking in response to future crises by building a framework to identify which challenges are most likely to provide an opportunity for deeper integration. Bilbao-Ubillos, 2013-11-20 This book explores the way in which the financial crisis that began in the US spread to the economy of the European Union. It takes a critical look at the measures adopted by EU institutions in response to that crisis, seeking to explain the rationale behind them, their context, their development, and why different exit strategies were not

adopted In doing this the book makes comparisons with the measures adopted by institutions in the US and the UK As the crisis has shown that the financial supervision frameworks prevailing in 2007 were not fully able to deal with the largest financial crisis in history this volume also reviews the proposals that have been designed to reform the supervisory architecture in financial services in the EU The book concludes that the EU member states under most pressure from financial markets do suffer from intrinsic problems but that the economic effects of the crisis have been exacerbated by shortcomings in economic governance within the EU This work will be highly relevant to policy makers and scholars looking at EU integration finance and market regulation EBOOK: The European Union: Economics, Policy and History

Private Power, Online Information Flows and EU Law Angela Daly, 2016-12-01 This monograph examines how European Union law and regulation address concentrations of private economic power which impede free information flows on the Internet to the detriment of Internet users' autonomy. In particular competition law, sector specific regulation if it exists, data protection and human rights law are considered and assessed to the extent they can tackle such concentrations of power for the benefit of users. Using a series of illustrative case studies of Internet provision, search, mobile devices and app stores and the cloud, the work demonstrates the gaps that currently exist in EU law and regulation. It is argued that these gaps exist due in part to current overarching trends guiding the regulation of economic power, namely neoliberalism, by which only the situation of market failure can invite ex ante rules buoyed by the lobbying of regulators and legislators by those in possession of such economic power to achieve outcomes which favour their businesses. Given this systemic and extra legal nature of the reasons as to why the gaps exist, solutions from outside the system are proposed at the end of each case study. This study will appeal to EU competition lawyers and media lawyers.
