**Higher Education, Stratification, and Workforce Development** Sheila Slaughter, Barrett Jay Taylor, 2015-11-17 This work analyses how political economic shifts contribute to competition within higher education systems in the US EU and Canada The authors highlight competition for prestige and public and private subsidies exploring the consequences of these processes through theoretical and empirical analyses Accordingly the work highlights topics that will be of interest to a wide range of audiences Concepts addressed include stratification privatization of formerly public subsidies preference for high tech academic fields and the vocationalization of the curriculum i e Science Technology Engineering and Mathematics STEM fields selected professions and business rather than the liberal arts or the Humboldtian vision of the university Across national contexts and analytic methods authors analyze the growth of national policies that see universities as a sub set of economic development casting universities as corporate research laboratories and education as central to job creation Throughout the volume the authors make the case that national and regional approaches to politics and markets result in different experiences of consequences of academic capitalism While these shifts serve the interests of some institutions others find themselves struggling to meet ever greater expectations with stagnant or shrinking resource bases *Unequal Higher Education* Barrett J. Taylor, Brendan Cantwell, 2019-05-03 American higher education is often understood as a vehicle for social advancement However the institutions at which students enroll differ widely from one another Some enjoy tremendous endowment savings and or collect resources via research which then offsets the funds that students contribute Other institutions rely heavily on student tuition payments These schools may struggle to remain solvent and their students often bear the lion s share of educational costs *Unequal Higher Education* identifies and explains the sources of stratification that differentiate colleges and universities in the United States Barrett J Taylor and Brendan Cantwell use quantitative analysis to map the contours of this system They then explain the mechanisms that sustain it and illustrate the ways in which rising institutional inequality has limited individual opportunity especially for students of color and low income individuals

*How to be an Academic Superhero* Iain Hay, 2017-10-27 In universities across the world academics struggle to establish and sustain their careers while satisfying intensifying institutional demands Drawing from the author s decades of observation and experience in academia this exceptional book responds to the challenges of fostering and sustaining a successful academic career *The Social Health of the Nation* Marc Miringoff, Marque-Luisa Miringoff, 1999-07-01 This book is written for people who are skeptical and uneasy when they hear politicians economists and reporters tell Americans You re never had it so good as they recite lists of leading economic indicators *The Social Health of a Nation* as its subtitle indicates tell us How America is Really Doing The facts in this book confirm what many American know intuitively they are not better off now not with income inequality at its worst level in fifty years not with more and more Americans dropped from insurance rolls not with thousands of Americans feeling the effects of corporate downsizing not with real wages on a long

term decline This book provides the facts to see the rest of the picture the condition of the American national spirit that can never be revealed by economic indicators alone It also provides a forceful argument that without the social side of the picture Americans are in the dark about the nation s progress This book is not an ideological tract however Its purpose is portrayal not prescription Not everything reported is bad news an entire chapter is devoted to indicators of improving social performance Because it does not advocate for example a return to big government or any quick fix solution this book will be welcomed by readers from all parts of the political spectrum or of no particular political persuasion It will appeal to concerned individuals from business government clergy and other professions and to those who represent no interest group It will also be widely used as supplemental text in a variety of sociology economics and political science courses

The Social Health of the Nation is written by two sociologists Marc and Luisa Miringoff Marc is currently the Professor of Social Welfare Policy at Fordham University Graduate Center and the founder and Director of the Fordham Institute for Innovation in Social Policy Luisa is Professor of Sociology at Vassar College where she has served as Department Chair and Director of its Urban Studies Program Both earned Ph D degrees from the University of Chicago Since 1987 Marc has headed a research team to develop the Index of Social Health a nationally recognized social barometer that has been featured in ten New York Times and four Washington Post articles This index has commanded increasingly large electronic and print media attention because of its powerful presentation of trends in family life income health housing child poverty and other social indicators of everyday life in the United States The Social Health of the Nation will include the previously unreleased and very newsworthy Index for 1998 But it will contain much more Influenced by the effectiveness of the Index of Social Health in the summer of 1996 the Ford Foundation approached the authors with a plan Alarmed by a lack of government attention in the United States to monitoring the nation s social health the Foundation had a vision of creating a book building on the Index of Social Health to show what is needed to advance this field and deepen its impact To that end the Foundation provided financial assistance for the book s development by funding Miringoff s Fordham Institute for Innovation in Social Policy to convene a twenty five member team the Working Group on Social Indicators including nationally known pollster Daniel Yankelovich and Director of Research and Vice President of CNN Judy Milestone Each member of the Working Group was motivated to improve social reporting in the United States They came from the media universities and government representing fields as diverse as law medicine sociology and economics The vision of the Ford Foundation with the assistance of this working group has now become a reality in The Social Health of the Nation a nine chapter book written by Marc and Luisa Miringoff This book does show the other side of the Official Portrait of How America is Doing providing comprehensive coverage of improving shifting and worsening social performance It fills in the blanks after all the economic indicators are posted The book contains surprises the same kind that have been made the yearly release of the Social Index of Health a subject of media attention for twelve years an index whose 1998 figures will be released exclusively

in this book While some of the indicators will shock other will give reason for hope as we see evidence of improved performance in unlikely places For those whose livelihoods and well being depend on the social health of the United States this book provides the information necessary to find creative solutions for improved performance For students in a wide range of courses this book will become required reading [The Palgrave Handbook of Race and Ethnic Inequalities in Education](#) P.
