

The Vauxhall Frontiers was introduced into the UK at the end of 1989. At its launch, the Frontiers range consisted of a 2.0 litre (1000 cc) petrol engine 3-door model, and a 2.0 litre (2415 cc) petrol engine or 2.3 litre (2000 cc) diesel engine 5-door model. The engines are all self-proving units which have succeeded in many Vauxhall vehicles. All engines are of four-cylinder overhead camshaft design, mounted at the front of the car with the transmission mounted in line.

All models have fully-independent front suspension incorporating upper and lower arms, shock absorbers with torsion bars and were originally fitted with a leaf spring rear axle.

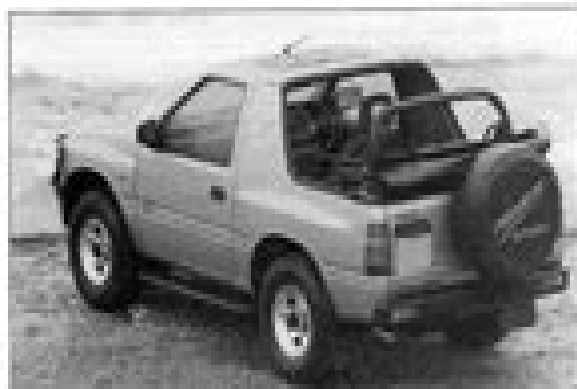

A wide range of standard and optional equipment is available within the range to suit most tastes, including central locking, electric windows and air electric sunroof. An air conditioning system was available as an option on certain models.

In early 1990 a soft-top 3-door model was introduced and in early 1991 the model range was completely revised. A new 2.0 litre (2415 cc) 16-valve petrol engine was brought in to replace the 2.0 litre engine and the 2.3 litre (2000 cc) diesel engine was replaced with a new 2.0 litre (2111 cc) engine. At the same time, the body underwent a major overhaul and the leaf spring rear axle was replaced with a new coil spring rear axle arrangement to improve road-holding and handling. The only other change to the Frontiers models range was the introduction of a new 2.0 litre (2415 cc) diesel engine in the middle of 1991.

Provided that regular servicing is carried out in accordance with the manufacturer's recommendations, the vehicle should prove reliable and very economical. The engine compartment is well-designed and most of the items requiring frequent attention are easily accessible.

Vauxhall Frontiers Sport

Your Vauxhall Frontiers manual

The aim of this manual is to help you get the best value from your vehicle. It can do so in several ways. It can help you decide what work must be done (even though you choose to get it done for a garage). It will also provide information on routine maintenance and servicing, and give a logical course of action and diagnosis when certain faults occur. However, it is hoped that you will use the manual by leaving the work unstarted. On repair jobs it may seem to hinder their looking the vehicle into a garage and getting their tools, to learn and collect it. Perhaps

most important, a lot of money can be saved by avoiding the costly garage-man charge to come to place and overhauls.

The manual has drawings and descriptions to show the location of the various components so that their location can be understood. Tables are described and photographed in a clear step-by-step sequence.

References to left and right of the vehicle are in the context of a person in the driver's seat facing forwards.

We take great pride in the accuracy of information given in this manual, but vehicle manufacturers make alterations and design changes during the production run of a particular vehicle of which they do not inform us. No liability can be accepted by the authors or publishers for loss, damage or injury caused by any errors in, or omissions from, the information given.

Working on your car can be dangerous. This page shows just some of the potential risks and hazards, with the aim of creating a safety-conscious attitude.

General hazards

Scalding

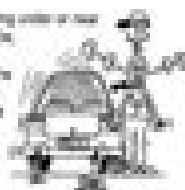

- Don't remove the radiator or expansion tank cap while the engine is hot.
- Engine oil, automatic transmission fluid or power steering fluid may also be dangerously hot if the engine has recently been running.

Burning

- Avoid oil drips from the oil-fuel system and from any part of the engine. Grease, dirt and sludge can also be extremely hot immediately after use.

Crushing

- When working under or near a raised vehicle, always support the jack with safe stands, or use chocks or bricks.
- Never venture under a car which is only supported by a jack.
- Take care if loosening or tightening high torque nuts when the vehicle is on stands. Make loosening and tight loosening should be done with the wheels on the ground.

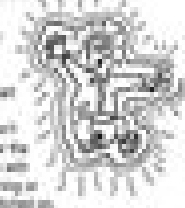

- Fuel is highly flammable. Fuel vapour is explosive.
- Don't let fuel spill onto a hot engine.
- Do not smoke or allow naked lights (including your lighted cigarette) near a vehicle being worked on. Also beware of smoking materials.

Fire

- Fuel is highly flammable. Fuel vapour is explosive.
- Don't let fuel spill onto a hot engine.
- Do not smoke or allow naked lights (including your lighted cigarette) near a vehicle being worked on. Also beware of smoking materials.
- Fuel vapour is heavier than air, so don't work on the fuel system with the vehicle over an open fire.
- Another cause of fire is an electrical short-circuit or open circuit. Take care when repairing or modifying the vehicle wiring.
- Keep a fire extinguisher handy, or a fire extinguisher for use on fuel and electrical fires.

Electric shock

- Ignition coil voltage can be dangerous, especially to people with heart problems or a pacemaker. Don't work on or near the ignition system with the engine running or the ignition switched on.

- When working is also dangerous. Make sure that any coast-operated equipment is correctly worked. Make power points should be protected by a residual current device (RCD) circuit breaker.

Fume or gas intoxication

- Exhaust fumes are poisonous. They often contain carbon monoxide, which is highly fatal if inhaled. Never run the engine in a confined space such as a garage with the doors shut.
- Fuel vapour is also poisonous. As with the vapours from engine cleaning solvents and paint thinners.

Poisonous or irritant substances

- Avoid skin contact with battery acid and with any fuel, fuel oil, solvents, especially antirust, brake hydraulic fluid and Diesel fuel. Don't swallow them by mouth. If such a substance is swallowed or gets into the eyes, seek medical advice.
- Prolonged contact with used engine oil can cause skin cancer. Wear gloves, or use a barrier cream if necessary. Change oil at oil-change centres and do not keep old oil in your garage.
- An air-conditioning refrigerant forms a continuous gas if released to a raised flame (including a cigarette). It can also cause gas burns on contact.

Asbestos

- Asbestos dust can cause cancer if inhaled or swallowed. Asbestos may be found in gaskets and in brake and clutch linings. When dealing with such components it is better to assume that they contain asbestos.

Special hazards

Hydrofluoric acid

- This extremely corrosive acid is formed when certain types of synthetic rubber, found in some O-rings, oil seals, fuel hoses etc, are exposed to temperatures above 400°C. The rubber changes into a chemical or sticky substance containing the acid. Once formed the acid remains dangerous for years. If it gets onto the skin, it may be necessary to amputate the limb concerned.
- When dealing with a vehicle which has suffered a fire, or with components salvaged from such a vehicle, wear protective gloves and do not touch them after use.

The battery

- Batteries contain sulphuric acid, which attacks clothing, eyes and skin. Take care when topping-up or working the battery.
- The hydrogen gas given off by the battery is highly explosive. Never cause a spark or allow a naked light nearby. The careful when connecting and disconnecting battery chargers or jump leads.

Air bags

- Air bags can cause injury if they go off accidentally. Take care when removing the steering wheel airbag from. Special storage instructions may apply.

Direct injection equipment

- Direct injection pumps supply fuel at very high pressures. Take care when working on the fuel injectors and fuel pipes.

Warning: Never expose the hands, face or any other part of the body to injected diesel fuel. Fuel can penetrate the skin with potentially fatal results.

Remember...

DO

- Use seat belt protection after using power tools, and when working under the vehicle.
- Do not drink or use heavy alcohol to prevent your hands from becoming slippery.
- Do get someone to check periodically that oil is well when working under the vehicle.
- Do make correct clothing and using tool out of the way of moving mechanical parts.
- Do remove rings, watches etc, before working on the vehicle - especially the electrical system.
- Do ensure that any lifting or jacking equipment has a safe working load, being adequate for the job.

DON'T

- Don't attempt to fit a heavy component which may be heavier than your capacity - get assistance.
- Don't rush to finish a job, or save yourself short cuts.
- Don't use 110V tools which may slip and cause injury.
- Don't leave tools or parts lying around where someone can trip over them, step on or use fuel spills as well.
- Don't allow children or pets to play in or near a vehicle being worked on.

simple water level indicator with buzzer electronics projects - Apr 10 2023

web nov 8 2021 in this electronics project i have explained how to make a simple water level indicator using the bc547 transistor a buzzer is also connected with the water tank level indicator circuit so when the water level reaches maximum

level the buzzer with starts along with indicator leds

simple water level indicator electronics projects circuits diy - Feb 08 2023

web sep 14 2023 so in today s project we are going to build a simple water level indicator using a configuration of bc337

nnp transistors a water level indicator is a simple electronic circuit that can indicate the level of any conductive liquid

contained in a vessel such as a reservoir overhead underhead tank or container

how to make a water level indicator 12 steps with pictures wikihow - Mar 09 2023

web feb 21 2022 1 get all of the electronic parts that you need for the project a water level indicator requires a few different electronic components to create a circuit these components are simple and easy to find you can purchase all of the parts that you need either at an electronics supply store or online 1

title water level indicator southern university - Jun 12 2023

web summary in this project we will be building a water level indicator using arduino water sensor with three levels that consist of inside a tank with the help of 3 led and a buzzer to indicate that the tank is full ii objectives to learn the working of a water indicator

water level indicator mini project report pdf electric power - Aug 02 2022

web the water level indicator circuit consists of a transistor element and a buzzer which indicates the overflow of water or excessive water in the container when the water reaches to maximum limit it shows and blinks the led with

simple water level indicator pdf power inverter scribd - Feb 25 2022

web fig 1 simple water level controller built around timer ne555 and inverter buffer cmos ic cd4049 it uses readily available low cost components and is easy to build and install on the over head tank oht to prevent wastage of water the circuit works off a 12v battery or 230v ac mains using a 12v adaptor

simple water level indicator with alarm tested circuits - Sep 03 2022

web march 14 2017 by administrator generally water stored in overhead tank is wasted due to over flow when the tank is full water level alarm using micro controllers like 8051 and avr are shown in previous articles this article shows simple circuits of

project report water level indicator pdf electrical scribd - Apr 29 2022

web water level indicators basically show the level of water tank after fitting this project we observe the level of water in tank main part of this project is six core wire and electronics circuit six core wire fitted in the water tank on the plastic tube

water level indicator project presentation ppt slideshare - May 31 2022

web jan 1 2017 when the water comes in contact with the electrode tip a conductive path is established between the sense electrode and the tank wall reference electrode which in turn makes the transistors conduct to glow led and indicate the level of

water level indicator project report pdf scribd - Mar 29 2022

web the water level indicator includes a simple mechanism which helps to detect and indicate the water level in an overhead tank or any other water container the sensing is done by using a set of different probes which are placed at different levels on the tank walls

pdf automatic water level indicator researchgate - Dec 06 2022

web mar 2 2016 the aim of developing this project is towards providing efficient and simple method for water level indicator the drinking water crisis in asia is reaching alarming proportions

water level indicator ijsr - Jul 01 2022

web 1 introduction water level indicator may be defined as a system by which we can get the information of any water reservoir water level indicator system is quite useful to reduce the wastage of water from any reservoir while filling such reservoir
