Powering Forward Bill Ritter, Jr.,2016-03-15 A historic energy revolution is underway in the United States Wind sunlight and other sustainable resources are now the fastest growing sources of energy in the U S and worldwide American families are installing power plants on their roofs and entire communities are switching to 100 percent renewable energy The urgent need to prevent climate change is causing people around the planet to question their reliance on carbon intensive oil coal and natural gas Author Bill Ritter Jr the 41st governor of Colorado and one of America s key thought leaders on this topic discusses the forces behind the energy revolution the new ways we must think about energy and the future of fossil and renewable fuels It is an essential read for any who want to understand one of history s biggest challenges to peace prosperity and security in the United States Written in partnership with the Center for a New Energy Economy **The Climate**

Threat. Crisis for Democracy? Jon Naustdalslid,2023-08-21 A key point in the book is the need to focus more seriously at the energy problem as the real problem behind global warming The failure of global climate policies to reduce CO2 emissions and halt climate change has led an increasing number of scientist and activists to lose confidence in democracy s ability to handle climate change and led them to look to more authoritarian measures to meet the problem The book documents these trends also from a historical perspective criticize them and sketches more democratic alternatives Life in Europe Under

Climate Change Joseph Alcamo, Jorgen E. Olesen, 2012-03-23 Life in Europe will indeed go on as the climate changes but not in the same way as before. The air will be warmer, winds will change, patterns of rainfall and snowfall will alter and sea level is likely to rise. These phenomena are already being seen. Europe will in the future experience marked changes in vegetation cover, increased floods along rivers and coastlines, as well as more frequent droughts and forest fires often leading to large societal costs. The changes will be minor in some cases, profound in others, but in any case pervasive. This book uses the most up-to-date information issued by the IPCC Intergovernmental Panel on Climate Change and informs readers about these effects as well as showing how Europe is contributing to attempts to slow the tempo of global climate change and how it can adapt to the climate change that seems unavoidable. *Life in Europe under Climate Change* makes essential information on climate impacts in Europe accessible to a broad audience including students, politicians, planners and members of non-governmental organizations.

Our Earth Matters B.H. Desai, 2021-06-21 On 21 May 2019 it was officially recognized that we are now living in the Anthropocene, our earth's latest geological epoch named for the unmistakable imprint of human activities. This announcement came almost 60 years after the publication of Rachel Carson's landmark work of environmental writing, *Silent Spring*, and next year 2022 it will be 50 years since the first UN Conference on the Human Environment held in Stockholm in June 1972. This book, *Our Earth Matters: Pathways to a Better Common Environmental Future*, is a special issue of the journal *Environmental Policy and Law* which was first published in 1975. It presents 21 invited contributions by outstanding scholars from around the world which examine existing global regulatory approaches, processes, instruments and institutions for the protection of the global environment. The articles are grouped under four headings: Prognoses, Processes, Problematique and Prospects, and in them the authors have sought to explore answers to the existential environmental crisis. They urge us to ponder our reckless destruction of natural spaces, endangering of plant and animal species, poisoning of the environment and general disturbance of our essential ecological processes. The primary objective of the book is to raise the awareness of the global audience by inspiring scholars and decision makers to re-examine current global approaches to environmental issues and explore the future trajectory with new ideas and frameworks for international environmental governance in the 21st century and beyond. The book will be of interest to all those working to secure the sustainable future of the human race on our only abode planet Earth. Bharat H. Desai is Professor of International Law and Jawaharlal Nehru Chair in International Environmental Law, Centre for International Legal Studies, School of International Studies, Jawaharlal Nehru University, New Delhi. Editor-in-Chief of the journal *Environmental Policy Law*, Amsterdam IOS Press and of the *Yearbook of International Environmental Law*, Oxford OUP.

Environment and Society Charles Harper, 2015-08-26 This book discusses human connections and impacts on the environment and vice versa, and examines suggestions for changing the human-environment relationship to a more sustainable environment. It provides students and interested readers with an introduction to environmental issues.

Climate Change, Second Edition S. George Philander, 2012-06-13 The First Edition of the Encyclopedia of Global Warming and Climate Change provided a multi authored academic yet non technical resource for students and teachers to understand the importance of global warming to appreciate the effects of human activity and greenhouse gases around the world and to learn the history of climate change and the research enterprise examining it This edition was well received with notable reviews Since its publication the debate over the advent of global warming at least partially brought on by human enterprise has continued to ebb and flow depending literally on the weather politics and media coverage of climate summits and debates Advances in research also change the discourse as new data is collected and new scientific projects continue to explore and explain global warming and climate change Thus a new Second Edition updates more than half of the original entries and adds new perspectives and content to keep students and researchers up to date in a field that has proven provocatively lively

Environmental Echoes K.B.DHARMA PRAKASH, Environment days are occasions to educate the public on the issues of concern to mobilize political will and resources to address global problems and to celebrate and reinforce achievements of humanity The existence of environmental days pre dates the establishment of the United Nations but the UN has embraced them as a powerful advocacy tool Water and air the two essentials on which all life depends have become global garbage cans now The real cure for our environment problems is to understand that our job is to salvage Mother nature we are facing a formidable enemy in this field it is the hunters and to convince them to leave their guns on the wall is going to be very difficult hence I strongly believe the information on every day of environmental importance will serve as a wake up call to aware the public on a wider scale I hope the contents of this book will serve the purpose to some extent

Biodiversity and Protected Areas Karen Beazley,Robert Baldwin,2019-04-16 Biodiversity and Protected Areas assembles twelve topics from around the world illustrating the complexities and promise of addressing the biodiversity crisis Authors from Mongolia Africa India Canada Iraq and the

United States dwell on particular aspects and challenges relevant to those regions. Lessons and approaches from interesting localities coupled with global analyses give the reader a synthetic view of emerging problems. The opportunities for understanding common issues across different geographies abound such as comparing local conservation in sub-Saharan Africa with a distribution of very small protected areas in Massachusetts. Several topics will be of immediate interest to policymakers. The book is illustrated with numerous color maps and figures and the authors strove for clear uncomplicated writing. The editors provide an overview of chapters placing them in the context of other biodiversity and protected area literature. Students and conservationists attempting to broaden their views of biodiversity and protected areas should find this collection to be interesting.

Ecofeminism, Second Edition Carol J. Adams, Lori Gruen, 2021-12-16

This new edition of Ecofeminism: Feminist Intersections with Other Animals and the Earth begins with an historical grounding overview that situates ecofeminist theory and activism within the larger field of ecocriticism and provides a timeline for important publications and events. Throughout the book authors engage with intersections of gender, sexuality, gender expression, race, disability, and species to address the various ways that sexism, heteronormativity, racism, colonialism, and ableism are informed by and support animal oppression. This collection is broken down into three separate sections. Affect includes contributions from leading theorists and activists on how our emotions and embodiment can and must inform our relationships with the more than human world. Context explores the complexities of appreciating difference and the possibilities of living less violently. Climate new to the second edition provides an overview of our climate crisis as well as the climate for critical discussion and debate about ecofeminist ideas and actions. Drawing on animal studies, environmental studies, feminist gender studies, and practical ethics, the ecofeminist contributors to this volume stress the need to move beyond binaries and attend to context over universal judgments; spotlight the importance of care as well as justice, emotion as well as reason, and work to undo the logic of domination and its material implications.
