 Presents a whole picture for measuring the web performance of technology companies through web metrics     *Big Data,  
 Open Data and Data Development* Jean-Louis Monino, Soraya Sedkaoui, 2016-03-03 The world has become digital and  
 technological advances have multiplied circuits with access to data their processing and their diffusion New technologies  
 have now reached a certain maturity Data are available to everyone anywhere on the planet The number of Internet users in  
 2014 was 2.9 billion or 41% of the world population The need for knowledge is becoming apparent in order to understand  
 this multitude of data We must educate inform and train the masses The development of related technologies such as the  
 advent of the Internet social networks cloud computing digital factories has increased the available volumes of data  
 Currently each individual creates consumes uses digital information more than 3.4 million e mails are sent worldwide every

second or 107 000 billion annually with 14 600 e mails per year per person but more than 70% are spam Billions of pieces of content are shared on social networks such as Facebook more than 2 46 million every minute We spend more than 4 8 hours a day on the Internet using a computer and 2 1 hours using a mobile Data this new ethereal manna from heaven is produced in real time It comes in a continuous stream from a multitude of sources which are generally heterogeneous This accumulation of data of all types audio video files photos etc generates new activities the aim of which is to analyze this enormous mass of information It is then necessary to adapt and try new approaches new methods new knowledge and new ways of working resulting in new properties and new challenges since SEO logic must be created and implemented At company level this mass of data is difficult to manage Its interpretation is primarily a challenge This impacts those who are there to manipulate the mass and requires a specific infrastructure for creation storage processing analysis and recovery The biggest challenge lies in the valuing of data available in quantity diversity and access speed

**Fourth Revolution and the Bottom Four Billion** Nir Kshetri, 2023-04-18 Products and services based on advanced technologies such as artificial intelligence and blockchain are normally considered to be for rich consumers in advanced countries Fourth Revolution and the Bottom Four Billion demonstrates how marginalized and vulnerable groups with limited resources can also benefit from these technologies Nir Kshetri suggests that the falling costs and the increased ease of developing and deploying applications based on these technologies are making them more accessible He illustrates how key emerging technologies are transforming major industries and application areas such as healthcare and pandemic preparedness agriculture finance banking and insurance The book also looks at how these transformations are affecting the lives of low income people in low and middle income countries and highlights the areas needing regulatory attention to adequately protect marginalized and vulnerable groups from the abuse and misuse of these technologies Kshetri discusses how various barriers such as the lack of data low resource languages underdeveloped technology infrastructures lack of computing power and shortage of skill and talent have hindered the adoption of these technologies among marginalized and vulnerable groups Fourth Revolution and the Bottom Four Billion suggests that it is the responsibility of diverse stakeholders governments NGOs international development organizations academic institutions the private sector and others to ensure that marginal groups also benefit from these transformative innovations
