Cognitive Warning Predictive System Vaccine:

The Cognitive Early Warning Predictive System Using the Smart Vaccine Rocky Termanini, 2016-01-06 This book introduces the Cognitive Early Warning Predictive System CEWPS as the new digital immune system. Similar to the human immune system, CEWPS relies on true or inoculated sickness experience to defend the body. The book also introduces The Smart Vaccine, an intelligent agent that manages all the vaccination as a service on the cloud before an attack happens. The book illustrates the current landscape of cyber warfare, highlights the vulnerabilities of critical infrastructure, and identifies the shortcomings of AVT. Next, it describes the concept, the architecture, and the enabling technologies required to build a digital immune system.

Biomedical Defense Principles to Counter DNA Deep Hacking Rocky Termanini, 2022-12-02 Biomedical Defense Principles to Counter DNA Deep Hacking presents readers with a comprehensive look at the emerging threat of DNA hacking. Dr. Rocky Termanini goes in depth to uncover the erupting technology being developed by a new generation of savvy bio hackers who have skills and expertise in biomedical engineering and bioinformatics. The book covers the use of tools such as CRISPR for malicious purposes, which has led agencies such as the U.S. Office of the Director of National Intelligence to add gene editing to its annual list of threats posed by weapons of mass destruction and proliferation. Readers will learn about the methods and possible effects of bio hacking attacks and, in turn, the best methods of autonomic and cognitive defense strategies to detect, capture, analyze, and neutralize DNA bio hacking attacks, including the versatile DNA symmetrical AI Cognitive Defense System ACDS. DNA bio hackers plan to destroy, distort, and contaminate confidential, healthy DNA records and potentially create corrupted genes for erroneous diagnosis of illnesses, disease genesis, and even wrong DNA fingerprinting for criminal forensics investigations. Presents a comprehensive reference for the fascinating emerging technology of DNA storage, the first book to present this level of detail and scope of coverage of this groundbreaking field. Helps readers understand key concepts of how DNA works as an information storage system and how it can be applied as a new technology for data storage. Provides readers with key technical understanding of technologies used to work with DNA data encoding, such as CRISPR, as well as emerging areas of application and ethical concern, such as smart cities, cybercrime, and cyber warfare. Includes coverage of synthesizing DNA-encoded data, sequencing DNA-encoded data, and fusing DNA with Digital Immunity Ecosystem DIE.

Machine Learning Mohssen Mohammed, Muhammad Badruddin Khan, Eihab Bashier Mohammed Bashier, 2016-08-19 Machine learning, one of the top emerging sciences, has an extremely broad range of applications. However, many books on the subject provide only a theoretical approach, making it difficult for a newcomer to grasp the subject material. This book provides a more practical approach by explaining the concepts of machine learning algorithms and describing the areas of application for each algorithm using simple practical examples to demonstrate each algorithm and showing how different issues related to these algorithms are applied.
