**of Addiction Counseling** Pamela S. Lassiter, John R. Culbreth, 2017-03-07 Theory and Practice of Addiction Counseling by Pamela S. Lassiter and John R. Culbreth brings together contemporary theories of addiction and helps readers connect those theories to practice using a common multicultural case study. Theories covered include motivational interviewing, moral theory, developmental theory, cognitive behavioral theories, attachment theory, and sociological theory. Each chapter focuses on a single theory, describing its basic tenets, philosophical underpinnings, key concepts, and strengths and weaknesses. Each chapter also shows how practitioners using the theory would respond to a common case study, giving readers the opportunity to compare how the different theoretical approaches are applied to client situations. A final chapter discusses approaches to relapse prevention.

**CBT for Compulsive Sexual Behaviour** Thaddeus Birchard, 2015-05-15 Increasing numbers of therapists are coming into contact with the problem of compulsive sexual behaviour disorders. However, it is still a relatively new field, and there is little in the current literature available that enables the therapist to work with and treat this problem. *CBT for Compulsive Sexual Behaviour: A guide for professionals* addresses this by providing a guide to cognitive behavioural theory and practice, which includes the assessment, diagnosis, and treatment of addictive sexually compulsive disorders. Beginning with a description of addictive sexuality and an overview of cognitive behavioural therapy, in which CBT is presented as the most useful response, Thaddeus Birchard provides clear therapeutic information about the implementation of CBT treatment intervention. The chapters included cover the neuroscience that underpins the addictive process, a how-to chapter on the use of groups, paraphilias, trauma, and attachment comorbid disorders, and cross-addictions, and analysis on the function of internet pornography, all written from a cognitive behavioural stance. Using case vignettes throughout, Thaddeus Birchard draws on his own experience as a psychosexual therapist, along with the latest research in the field, to enable the therapist to treat a range of compulsive sexual problems in a way that can be applied in individual practice or in a group setting, as well as how to prevent relapse. This book will be essential reading for psychosexual therapists, cognitive behavioural therapists, and other professionals working with sexual compulsive disorders.

**Integrative Addiction and Recovery** Shahla Modir, George Munoz, 2018-11-13 *Integrative Addiction and Recovery* offers an authentic model of comprehensive integrative modalities germane and specific to the field of addiction and recovery treatment. Although many treatment services for addiction include holistic, alternative, or integrative in their descriptions, they contain no substantive programs or services consistent with the mind-body-spirit paradigm contained within the integrative approach to health and healing. Consequently, many patients do not have the opportunity to benefit from the true spirit of an integrative approach within the discipline of addiction and recovery medicine. This book sets the standard for a bona fide integrative approach for others to follow, providing information that is immediately useful in clinical practice and rigorously evidence-based. Authored by world-class experts in the field of addiction medicine, *Integrative Addiction and Recovery* presents both scientific and holistic data regarding a wide variety of holistic and conventional approaches to the treatment of substance abuse and behavioral

addictions Its chapters cover both conventional and holistic treatment and provide background for each of the major classes of drugs of abuse including opiates alcohol tobacco stimulants sedative hypnotics hallucinogens and marijuana It also includes chapters on the topics of food addiction and behavioral addictions such as gambling and shopping The authors explore the major holistic modalities providing background and theory in areas like acupuncture Traditional Chinese Medicine Homeopathy Aromatherapy and Ayurvedic Medicine while at the same time providing spiritual approach chapters on Shamanism and Ibogaine as well as more conventional issues with a holistic view including Co Occurring Disorders and Psychosocial Treatment and Group Support The very complex issue of chronic pain and addiction is also addressed along with relapse prevention strategies

**Behavioral Addictions** Kenneth Paul Rosenberg MD, Laura Curtiss Feder PsyD, 2014-02-17 DSM V broke new ground in May of 2013 designating a new disorder called behavioral addiction. Clinicians immediately wanted to know how is a behavioral addiction different from an impulse control disorder? What are the criteria for determining that some behaviors are addictions rather than impulses? What if anything does this mean in terms of effective treatment? *Behavioral Addictions* is the first and most authoritative text ever written on the subject of behavioral addictions. This comprehensive work explains the criteria used to determine addiction, the evidence for identifying assorted behaviors as addictions, and the evidence-based treatment for each. With contributions from preeminent experts covering an exhaustive list of behavioral addictions, this book is unique in its coverage of behavioral addictions, their criteria, and treatment. It is a valuable and timely resource for any clinician treating addictions. A guide to understanding the new DSM V designation of behavioral addiction. Defines the criteria for behavior to be considered an addiction designation. Discusses the evidence for behaviors meeting addiction criteria. Identifies what is now likely will be and is not a behavioral addiction per evidence. Discusses behaviors formerly considered impulse control disorders. Presents evidence-based treatment for each behavioral addiction.

*Addiction and Change, First Edition* Carlo C. DiClemente, 2003-04-02 The stages of change model has become widely known as a framework for conceptualizing recovery. Less well known are the processes that drive movement through the stages or how the stages apply to becoming addicted. From Carlo C. DiClemente, codeveloper of the transtheoretical model, this book offers a panoramic view of the entire continuum of addictive behavior change. The author illuminates the common path that individuals travel as they establish and reinforce new patterns of behavior, whether they are developing an addiction or struggling to free themselves from one, and regardless of the specific addictive behavior. The book addresses crucial questions of why, when, and how to intervene to bolster recovery in those already addicted and reach out effectively to people at risk.

**Brief Interventions and Brief Therapies for Substance Abuse** Kristen Lawton Barry, 1999 This TIP presents the historical background, outcomes research, rationale for use, and state of the art practical methods and case scenarios for implementation of brief interventions and therapies for a range of problems related to substance abuse. This TIP is based on the body of research conducted on brief interventions and brief therapies for substance abuse as well as on the broad clinical expertise of the Consensus Panel. Because many therapists and other practitioners are eclectically trained, elements from each of the chapters may be of use to a range of professionals.
