Cold Matters The State And Fate Of Canadas Fresh Water:

Cold Matters Robert William Sandford, 2012-12-01 Cold Matters is a vital and approachable work that distills the scientific complexities of snow ice water and climate and presents the global implications of research put forth and funded by the Canadian Foundation for Climate and Atmospheric Sciences This timely book gives the concerned reader an opportunity to take part in the conversation about our global environment in a way that transcends traditional scientific journals textbooks public talks or newspaper articles that are so often ignored or forgotten In the end Cold Matters will change the way you think about ice and snow The impassioned narrative and sophisticated illustrations found within the pages of Robert Sandford s latest work offer ecologically and globally minded citizens an understanding of the behaviour of our ever changing climate system and its effect on cold environments in western Canada over the past 400 years Using revolutionary prediction scenarios to model glaciers and glacier meltwater in British Columbia Alberta Saskatchewan Ontario Yukon NWT and throughout the world Cold Matters presents a clear snapshot of how altered ecosystems will impact future climates urban centres and agricultural landscapes

Freshwater Politics in Canada Peter Clancy, 2014-01-01 The opening chapters introduce core concepts such as power organized interests knowledge systems and the state They are followed by chapters discussing freshwater subsectors including fisheries irrigation flood control hydropower and groundwater A series of topical themes is addressed including salmon conservation Aboriginal water interests hydraulic fracturing regulatory revisions and interjurisdictional management A final section explores emerging trends in freshwater governance

The Columbia Icefield - 3rd Edition Robert William Sandford, 2016 The Columbia Icefield is the largest sub polar accumulation of glacial ice in North America Because it is possible to drive to the second largest glacier flowing out of the Columbia Icefield it is the best known ice age feature in Canada and a remarkably popular tourist destination From this amazing and accessible ice mass we can learn a great deal about how water shaped our landscape in the past and how it will shape our civilization in the future Despite a century of accelerating recession the Columbia Icefield is still an incredible geographical feature It is a high basin of accumulated snow and ice that presently straddles 223 square kilometres some 86 square miles of the Great Divide the stupendous mountain wall that marks the boundary between the provinces of British Columbia and Alberta It also straddles Banff and Jasper National Parks contributing significantly to their designations as United Nations World Heritage Sites Written by one of Canada s most respected experts on water and water related climate processes this remarkable book offers a clear and concise visual overview of the geological history and features of the Columbia Icefield an outline of human presence in the glaciated landscapes of the mountain West and a breathtaking photographic tour of one of the world s most amazing landscapes

Water Policy in Canada Mohammed H. Dore, 2015-03-11 This book deals with the water policy and management in Canada It discusses various problems and risks in the fresh and drinking water supply in the second largest country in the world Mohammed Dore argues that water is underpriced and used wastefully in Canada In selected case

studies he illustrates the major threats from human activity to Canadian freshwaters and drinking water resources including manufacturing mining oil sands production animal farming and agricultural use Selected case studies include reviews of even dramatic incidences e g the Walkerton tragedy of 2000 when 7 people were killed and 200 went onto permanent dialysis treatment because of water contamination with harmful pathogens The book warns that wastewater treatment standards are often not sufficient so that many drinking water resources are in peril of wastewater contamination As most of the water resources are provincial responsibility the book discusses the water management policies in the different provinces separately Through a detailed discussion and statistical analyses it can define water policy and management lessons that emerge from the investigated case studies It ends by contrasting water policy and practice in Canada with the practice in some European countries

The Columbia River Treaty: A Primer Robert William Sandford, Deborah Harford, Jon O'Riordan, 2014 The Columbia River Treaty A Primer is a vital work that clearly explains the nature of this complex water agreement between Canada and the United States and how its impending update will impact communities landscapes industry and water supplies between the two countries for many years to come The Columbia River Treaty ratification in 1964 created the largest hydropower project in North America with additional emphasis on flood protection for the USA As the Treaty approaches its 60th anniversary and the first opportunity for modification its signatories are preparing proposals for new ways forward and stakeholders on both sides of the border are speaking up This primer explores the initial intent of the Treaty and its success to date its costs to Columbia Basin residents and ecosystems and new influences the signatories must now consider Shifts in social norms related to the environment equity and social justice new views on the relevance of Indigenous traditional and local knowledge and the economic and physical effects of a changing climate are all considered as factors in future Treaty governance The primer concludes with a summary of the perspectives that currently exist between and within each country with respect to Treaty benefits and outlines the next steps that will take place in the negotiation process The authors conclude with a call to action in the hope that a renewed Columbia River Treaty might prove a model for outstanding transboundary water agreements around the world as they strive to meet not only the challenges of the present day but also the needs of future generations

Heart Waters Kevin Van Tighem, 2015 Water does not come from the river It comes to the river Heart Waters takes us to the sources of that water and into the living beauty human stories and future possibilities that also arise from the green slopes and valleys of Alberta's Eastern Slopes where the Bow River is born For more than a century ago the foothills and Front Range mountains of western Alberta have been recognized vital to the future water supply for Canada's prairies Virtually all the water that sustains communities ecosystems and the economy of prairie Canada comes from this narrow strip of land arrayed along the Continental Divide For all its importance however water management decisions have ignored the importance of land health and focused almost exclusively on building dams The result as the author points out is that the Bow River's annual flows have decreased by more than a tenth even while spring

floods become more frequent and more destructive The solutions to prairie Canada s water challenges lie in healing the wounded landscapes of our headwaters Heart Waters delves deeply into the history and ecology of a landscape whose critical value as a watershed is matched by its sheer beauty and diversity A rich array of stunning photographic imagery by Jasper based photographer Brian Van Tighem complements the author s well researched explorations of the stories whispered by the living waters that drain from Banff National Park Kananaskis Country and the famous ranchlands of the Bow River watershed Heart Waters is a deep exploration of place and an invitation to recognize that our water future depends upon knowing our headwaters better and caring for them more passionately as our heart waters We could belong here too the book concludes We could be like the bull trout the willows the wary horses like the river that continually arises from these fine green places where the waters are born We could find our best selves in the stories of those living waters and the river that gathers them together Sustainable Solutions for Urban Water Security Binaya Kumar Mishra,Shamik

Chakraborty,Pankaj Kumar,Chitresh Saraswat,2020-08-14 This book presents solutions to address water security in rapidly urbanizing cities and explores the new paradigms of water security in changing contexts Highlighting the latest developments in water research changes in water policy and current discourses on water security the book also provides information and tools for local stakeholders water managers and policymakers to build the capacity for sustainable water governance The book discusses a wide range of sustainable solutions and their implementation to ensure that the balance between water supply and demand remains sustainable in the long term with a focus on local solutions to build capacity and developing policy awareness for a wide range of stakeholders As the concept of urban water security in changing contexts is open to multiple interpretations the authors set out various approaches Providing an overview of the changing perspectives of urban water security in different contexts the book is based on findings of the Asia Pacific Network water security project at the United Nations University Tokyo as well as the authors current research based at Pokhara University Nepal Hosei University Tokyo Institute for the Global Environmental Strategies Japan and the Australian National University Australia The book also includes the views of international authorities such as water experts on the subject The solutions are complemented by analysis of case studies of various localized sustainable solutions at different scales The book is a valuable resource for water professionals and policymakers around the globe academics teachers working in water related areas NGOs think tanks water research institutes donor organizations and international and local water utility services **The**

Climate Nexus Robert William Sandford,Jon O'Riordan,2015 Secure supplies of water food and energy are essential to human dignity and well being around the globe Their vitality is dependent on healthy ecosystems supporting thriving biodiversity All four elements are inter related in that actions to govern one will automatically affect the others known as the Nexus Global demand for the first three elements is increasing due to population growth and rising per capital incomes in developing countries with steadily worsening results for the fourth The Nexus elements are also subject to increasing

pressures from climate disruption in the form of more frequent and severe flooding droughts storms pest outbreaks and extreme heat Nature's capacity to moderate these impacts is also being eroded by rapid widespread land use development and associated pollution The combination of increasing demand decreasing supplies and rapidly changing hydro climatic conditions at all points of the Nexus requires transformative policy responses that encompass economy equity social justice fairness and the environment The Climate Nexus outlines these challenges and offers a pathway to resolving them

Storm Warning Robert William Sandford, 2015 Human beings and industrial based society are changing the composition of our planet's atmosphere and causing it to warm at an unnatural and oftentimes astonishing rate Much of that warmth is being absorbed by water which is causing an acceleration in the rate and manner in which water moves through the global hydrological cycle A warmer atmosphere carries more water vapor which means as temperatures continue to rise storms will be more intense last longer and cause more damage to our towns cities and vital infrastructure On the other side of the hydro climate coin we can also expect deeper more persistent and damaging droughts throughout the world resulting in dramatic losses difficult economic outcomes and fundamental alterations to landscape This highly considered accessible and readable book explains how changes in the water cycle have already begun to affect how we think about and value water security and climate stability and what we can do to ensure a sustainable future for our children and grandchildren

Rain Shadow Nicholas Bradley, 2022-08-30 Rain Shadow is a collection of poetry that explores the fraught relationship between the natural world and humans yearning to connect with something greater than themselves The poems range through destabilized lives and landscapes fathoming presence and absence transformation and oblivion They outline the major questions of our time as the poet crisscrosses western Canada and the Pacific Northwest Witty playful serious and heartsore Rain Shadow seeks to understand the space in which people and nature are inextricably entwined I walk like a bear I have a bear's gait but the gate to the bear's mind is closed from The Bear and the Wind
