ship cruise missile threat from the Soviet Union in the early days of the Cold War and with the recent memory of the kamikaze threat from World War II the USN placed a great priority on developing air defence cruise missiles and getting them to sea to protect the fleet The first of these missiles were sizable necessitating large ships to carry them and their sensors which resulted in the conversion of a mix of heavy and light cruisers These ships tasked with protecting carrier groups and acting as flagships entered service from 1955 and served until 1980 The cruisers served in the front lines of the Cold War and many saw combat service engaging in surface actions from Vietnam to the Persian Gulf Complementing the conventionally powered missile cruisers was a much smaller number of expensive nuclear powered cruisers including the Long Beach the USN's largest ever missile cruiser Until replaced by the Ticonderoga and Burke classes of Aegis ships the USN's 38 missile cruisers were the most capable and important surface combatants in the fleet and served all over the globe during the Cold War Using specially commissioned artwork and meticulous research this illustrated title explores the story of these cruisers in unparalleled detail revealing the history behind their development and employment      **The Columbia**

**The Politics of Childhood in Cold War America** Ann Maire Kordas, 2015-10-06 This study examines how childhood and adolescence were shaped by and contributed to Cold War politics in America [Cold War US Foreign Policy](#) Steven Hurst, 2019-07-31 This book provides the first comprehensive description and critique of the six most important historical interpretations of US Cold War foreign policy Traditionalism Revisionism Post Revisionism Corporatism World Systems Theory and Post Structuralism The author uses the levels of analysis approach to demonstrate how each of these perspectives can be understood as an explanatory framework combining different types of factors located at different levels of the international system This original way of explaining the work of the historians discussed helps the reader to see past the narrative and empirical elements of their writings and to grasp more clearly the underlying theoretical assumptions In each chapter a description of the perspective s underlying theoretical framework and how it explains US foreign policy is followed by a critique of that theory and explanation A central theme developed throughout the book is the difficulty of managing the constant tension between the explanatory power of theory and the historian s desire to encompass the complex totality of historical events This critical companion can be read alongside the works of the historians themselves showing how they have sought to explain US Cold War foreign policy and the key differences between their perspectives Key Features 1st complete discussion of the 6 schools of thought in one volume Discusses current issues such as corporatism world systems theory and post structuralism in an accessible manner original use of the levels of analysis framework in studying this subject demonstrates in practical terms how each theory explains US Cold War foreign policy [Native Activism in Cold War America](#) Daniel M. Cobb, 2008-10-24 The heyday of American Indian activism is generally seen as bracketed by the occupation of Alcatraz in 1969 and the Longest Walk in 1978 yet Native Americans had long struggled against federal policies that threatened to undermine tribal sovereignty and self determination This is the first book length study of American Indian political activism during its seminal years focusing on the movement s largely neglected early efforts before Alcatraz or Wounded Knee captured national attention Ranging from the end of World War II to the late 1960s Daniel Cobb uncovers the groundwork laid by earlier activists He draws on dozens of interviews with key players to relate

untold stories of both seemingly well known events such as the American Indian Chicago Conference and little known ones such as Native participation in the Poor People's Campaign of 1968. Along the way he introduces readers to a host of previously neglected but critically important activists: Mel Thom, Tillie Walker, Forrest Gerard, Dr. Jim Wilson, Martha Grass and many others. Cobb takes readers inside the early movement from D. Arcy McNickle's founding of American Indian Development Inc. and Vine Deloria Jr.'s tenure as executive director of the National Congress of American Indians to Clyde Warrior's leadership in the National Indian Youth Council and describes how early activists forged connections between their struggle and anticolonialist movements in the developing world. He also describes how the War on Poverty's Community Action Programs transformed Indian Country by training bureaucrats and tribal leaders alike in new political skills and providing activists with the leverage they needed to advance the movement toward self-determination. This book shows how Native people who never embraced militancy and others who did made vital contributions as activists well before the American Indian Movement burst onto the scene. By highlighting the role of early intellectuals and activists like Sol Tax, Nancy Lurie, Robert K. Thomas, Helen Peterson, and Robert V. Dumont, Cobb situates AIM's efforts within a much broader context and reveals how Native people translated the politics of Cold War civil rights into the language of tribal sovereignty. Filled with fascinating portraits, Cobb's groundbreaking study expands our understanding of American Indian political activism and contributes significantly to scholarship on the War on Poverty, the 1960s, and postwar politics and social movements.
