Collapsing Space And Time Geographic Aspects Of Communications And Information:

Collapsing Space and Time Stanley D. Brunn, Thomas R. Leinbach, 1991 A text which looks at such topics as geography and communication telecommunications services and economic restructuring as well as the political social and cultural aspects of communications expansion Philosophy and Geography III Andrew Light, Jonathan M. Smith, 1998 Places are today subject to contrary tendencies They lose some functions which may scale up to fewer more centralized places or down to numerous more dispersed places and they gain other functions which are scaling up and down from other places This prompts premature prophecies of the abolition of space and the obsolescence of place At the same time a growing literature testifies to the persistence of place as an incorrigible aspect of human experience identity and morality Place is a common ground for thought and action a community of experienced particulars that avoids solipsism and universalism It draws us into the philosophy of the ordinary into familiarity as a form of knowledge into the wisdom of proximity Each of these essays offers a philosophy of place and reminds us that such philosophies ultimately decide how we make use and understand places whether as accidents instruments or fields of care *Global and Organizational Discourse about Information Technology* Eleanor H. Wynn, Edgar A. Whitley, Michael D. Myers, Janice I. DeGross, 2013-06-29 Over the past 20 years the field of information systems has grown dramatically in theoretical diversity and global reach This growth is reflected in the language that policy makers and organizational stakeholders use when they talk about their IT plans As information technology penetrates further into organizational and global life it becomes ever more important to articulate assumptions embedded in the discourse This will help to clarify the complex and yet conceptually improvised or pasted up worldview that becomes embodied in systems The assumptions point to particular domains of discourse The discourse sets up conventions and boundaries It thus shapes what can or cannot legitimately be talked about researched addressed or solved within the scope of IT A number of practical and theoretical topics are discussed in detail including Globalization development and space Mobilization of power ERP systems IS planning and projects Critical research and the study of discourse Public institutions Analytical frameworks This book contains the selected proceedings of the Working Conference on Global and Organizational Discourse About Information Technology sponsored by the International Federation for Information Processing IFIP and held in Barcelona Spain in December 2002 *McLuhan in Space* Richard Cavell, 2002-01-01 Demonstrates how McLuhan extended insights derived from advances in physics and artistic experimentation into a theory of acoustic space which he then used to challenge the assumptions of visual space that had been produced through print culture *Routledge Handbook of Media Geographies* Paul C Adams, Barney Warf, 2021-10-27 This Handbook offers a comprehensive overview of media geography focusing on a range of different media viewed through the lenses of human geography and media theory It addresses the spatial practices and processes associated with both old and new media considering media not just as technologies and infrastructures but also as networks systems and assemblages of things that come together to enable

communication in the real world With contributions from academics specializing in geography and media studies the Routledge Handbook of Media Geographies summarizes the recent developments in the field and explores key questions and challenges affecting various groups such as women minorities and persons with visual impairment It considers geographical aspects of disruptive media uses such as hacking fake news and racism Written in an approachable style chapters consider geographies of users norms rules laws values attitudes routines customs markets and power relations They shed light on how mobile media make users vulnerable to tracking and surveillance but also facilitate innovative forms of mobility space perception and placemaking Structured in four distinct sections centered around control and access to digital media mass media mobile media and surveillance and media and the politics of knowledge the Handbook explores digital divides and other manifestations of the uneven geographies of power It also includes an overview of the alternative social media universe created by the Chinese government Media geography is a burgeoning field of study that lies at the intersections of various social sciences including human geography political science sociology anthropology communication media studies urban studies and women and gender studies Academics and students across these fields will greatly benefit from this Handbook

International Communication and Globalization Ali Mohammadi, 1997-09-15 Addressing the impact on national societies and cultures of the headlong rate of change in communication between nations the contributors offer new approaches to this complex and rapidly growing field The ethics of global communication are discussed *Fifty Years of Regional Science* Raymond Florax, David A. Plane, 2013-04-17 This book contains the complete text of the special Golden Anniversary issue of the flagship journal of the Regional Science Association International RSAI Papers in Regional Science Volume 83 Number 1 as well as the full text of Walter Isard's Presidential Address The future near and far of regional science Professor Isard originally delivered the speech in a special plenary session of the fiftieth North American Meetings of the Regional Science Association International The session began with a ceremonial kickoff to the year long celebration of the multidisciplinary field's first 50 years At the ceremony held on the morning of Friday November 21 2004 at the DoubleTree Hotel in Philadelphia we presented Walter Isard the founder of our multidisciplinary field as well as Antoine Bailly the President of the Regional Science Association International and David Boyce the Association's Archivist with commemorative first copies of the anniversary issue This book entitled *Fifty Years of Regional Science* consists of a compendium of thought papers authored by a representative sampling of some of the field's leading scholars For the special journal issue we originally titled the collection *The Brightest of Dawns* *Geography in America at the Dawn of the 21st Century* Gary L. Gaile, Cort J. Willmott, 2005 *Geography in America at the Dawn of the 21st Century* surveys American geographers' current research in their specialty areas and tracks trends and innovations in the many subfields of geography As such it is both a state of the discipline assessment and a topical reference It includes an introduction by the editors and 47 chapters each on a specific specialty The authors of each chapter were chosen by their specialty group of the American Association of

Geographers AAG Based on a process of review and revision the chapters in this volume have become truly representative of the recent scholarship of American geographers While it focuses on work since 1990 it additionally includes related prior work and work by non American geographers The initial Geography in America was published in 1989 and has become a benchmark reference of American geographical research during the 1980s This latest volume is completely new and features a preface written by the eminent geographer Gilbert White

The Dictionary of Human Geography Derek Gregory, Ron Johnston, Geraldine Pratt, Michael Watts, Sarah Whatmore, 2011-09-23 THE DICTIONARY OF HUMAN GEOGRAPHY Even better than before the Dictionary is an essential tool for all human geographers and over the years has provided an invaluable guide to the changing boundaries and content of the discipline No one can afford to be without this fifth edition Linda McDowell University of Oxford From explanations of core concepts and central debates to lucid discussions of the theories driving contemporary research this is the best conceptual map to the creative and critical thinking that characterises contemporary human geography The fifth edition belongs on the bookshelf of all serious students Gerard Toal Virginia Tech With an exceptional balance between breadth and depth this is undoubtedly a timely and ground breaking revision of the Dictionary An outstanding accomplishment of the editors and contributors and a comprehensive and essential reference for any student or scholar interested in human geography Mei Po Kwan Ohio State University I can't imagine life without it Definitive detailed yet accessible there's still no single volume reference work in the field to rival it Noel Castree University of Manchester The Dictionary of Human Geography represents the definitive guide to issues and ideas methods and theories in human geography Now in its fifth edition this ground breaking text has been comprehensively revised to reflect the changing nature and practice of human geography and its rapidly developing connections with other fields The major entries not only describe the development of concepts contributions and debates in human geography but also advance them Shorter definitional entries allow quick reference and coverage of the wider subject area Changes to the fifth edition include entries from many new contributors at the forefront of developments in the field and over 300 key terms appearing for the first time It features a new consolidated bibliography along with a detailed index and systematic cross referencing of headwords The Dictionary of Human Geography continues to be the one guidebook no student instructor or researcher in the field can afford to be without

The Geography of Southeast Asia Thomas A. Rumney, 2010-04-07 In *The Geography of Southeast Asia* Rumney discusses an area that has long been of interest to geographers and other academics As interest in Southeast Asia has grown particularly over the past forty years the volume and variety of scholarly publications on the varied geographical aspects of the region have also increased This collection is an attempt to identify organize and present as many of these works as possible The region as a whole and each individual country of the area are covered in individual chapters Each chapter is further systematically organized by topic including general works cultural social geography economic geography historical geography physical geography political geography and urban geography This book presents a myriad of

sources such as atlases books chapters articles dissertations and theses are included as well as works written in English French German and other languages providing the reader with a thorough view of Southeast Asian geography

Telecommunications and the City Steve Graham, Simon Marvin, 2002-11-01 Telecommunications and the City provides the first critical and state of the art review of the relations between telecommunications and all aspects of city development and management Drawing on a range of theoretical approaches and a wide body of recent research the book addresses key academic and policy debates about technological change and the future of cities with a fresh perspective Through this approach the complex and crucial transformations underway in cities in which telecommunications have central importance are mapped out and illustrated Key areas where telecommunications impinge on the economic social physical environmental and institutional development of cities are illustrated by using boxed extracts and wide range of case study examples from Europe Japan and North America Rejecting the extremes of optimism and pessimism in current hype about cities and telecommunications Telecommunications and the City offers a sophisticated new perspective through which city telecommunications relations can be understood

The Digital Economy Edward J. Malecki, Bruno Moriset, 2007-12-07 This book provides an up to date account of the technologies organizations and dynamics which constitute the digital economy and assesses the impacts they have on regions and communities

A Companion to Cultural Geography James Duncan, Nuala C. Johnson, Richard H. Schein, 2008-04-15 A Companion to Cultural Geography brings together original contributions from 35 distinguished international scholars to provide a critical overview of this dynamic and influential field of study Provides accessible overviews of key themes debates and controversies from a variety of historical and theoretical vantage points Charts significant changes in cultural geography in the twentieth century as well as the principal approaches that currently animate work in the field A valuable resource not just for geographers but also those working in allied fields who wish to get a clear understanding of the contribution geography is making to cross disciplinary debates

The Virtual University? Kevin Robins, Frank Webster, 2002-11-07 Higher education is changing in scope style technology and objectives This book looks at the impact of information technologies on higher education and the reorganization of universities in more managerial and business directions The book combines empirical and analytical chapters from scholars on both sides of the Atlantic

The Economic Geography of the Tourist Industry Dimitri Ioannides, Keith G. Debbage, 1998 The Economic Geography of the Tourist Industry explains tourism s definitions and examines whether or not tourism can be conceptualized as an industry

Parchment, Printing, and Hypermedia Ronald Deibert, 2000-01-15 Interweaving media theory and historical analysis this book explores the effect new digital telecommunication technologies which Deibert calls hypermedia will have on the distribution of political power in the next century Deibert tracks the transf

The Cybercities Reader Stephen Graham, 2004 Providing the most comprehensive international and interdisciplinary analysis yet of the relationships between cities urban life and new technologies this informative book incorporates detailed discussions of cybercity history

theory economic processes mobilities physical forms social and cultural worlds digital divides public domains strategies politics and futures The book includes coverage of post modern technoculture virtual reality and the body global city economies urban surveillance e commerce teleworking community informatics digital architecture urban technology strategies and the role of cities and new technologies in the war on terrorism The first interdisciplinary book to address the complex interrelationships between the use and application of electronic technologies and practices and processes of contemporary metropolitan life this key text adopts a uniquely international perspective Detailed case studies include virtual cities in Amsterdam Internet cabins in Lima back offices in Jamaica and smart highways in Melbourne An excellent teaching aid with part section and individual extract introductions this outstanding book provides an up to date snapshot of how policies for cities and cyberspaces are being combined across the world

Community Journalism Midst Media

Revolution Sue Robinson, 2016-04-14 This edited volume documents the changes taking place in local community practices globally Digital technologies and globalization have forced evolutions in how we go about producing and consuming journalism and these essays empirically and theoretically advance the scholarly conversations about those trends What does it mean to serve the information needs of a community in a digitized social world where so many of our ties weak and strong are at least partially maintained in virtual worlds With authors and data from all over the world this work celebrates a fundamental connectedness to citizens and their community and renews the emphasis on home as a mandate for any locally focused news organization The contributions to this volume explore the flows within both digital spaces and geographic places that are an important foreground to any conversation about what is community today Several terms are coined and explored in the volume including geosocial journalism and reciprocal journalism that account for the essentiality of information sharing in global public realms to inspire feelings of community belonging Other chapters include a review of Patch com one of the largest grassroots digital platforms for journalism a survey of how Norwegian community media organizations are adapting to digital worlds how Swedish citizen sites operate and the ethics of community journalists to advocate for their citizenry regarding digital matters Venturing towards both optimism and dismay the collection argues that understandings of communal borders have expanded So even if journalists cannot reach the current locals such as in Africa as one chapter relates or globally transient locals digital technologies can help relocate fractured community into a less problematic virtual space This requires commitment on the part of both journalists and citizens to preserve those connections utilize those technologies and exercise those fundamental principles of community journalism that go back more than half a century This book was originally published as a special issue of Journalism Practice

Cosmopolitan Communications

Pippa Norris, Ronald Inglehart, 2009-08-31 Societies around the world have experienced a flood of information from diverse channels originating beyond local communities and even national borders transmitted through the rapid expansion of cosmopolitan communications For more than half a century conventional interpretations Norris and Inglehart argue have

commonly exaggerated the potential threats arising from this process A series of firewalls protect national cultures This book develops a new theoretical framework for understanding cosmopolitan communications and uses it to identify the conditions under which global communications are most likely to endanger cultural diversity The authors analyze empirical evidence from both the societal level and the individual level examining the outlook and beliefs of people in a wide range of societies The study draws on evidence from the World Values Survey covering 90 societies in all major regions worldwide from 1981 to 2007 The conclusion considers the implications of their findings for cultural policies

When the Medium Was the Mission Jenna Supp-Montgomerie, 2021-02-16 FINALIST 2022 PROSE Award in Theology Religious Studies An innovative exploration of religion's influence on communication networks When Samuel Morse sent the words what hath God wrought from the US Supreme Court to Baltimore in mere minutes it was the first public demonstration of words travelling faster than human beings and farther than a line of sight in the US This strange confluence of media religion technology and US nationhood lies at the foundation of global networks The advent of a telegraph cable crossing the Atlantic Ocean was viewed much the way the internet is today to herald a coming world wide unification President Buchanan declared that the Atlantic Telegraph would be an instrument destined by divine providence to diffuse religion civilization liberty and law throughout the world through which the nations of Christendom would spontaneously unite Evangelical Protestantism embraced the new technology as indicating God's support for their work to Christianize the globe Public figures in the US imagined this new communication technology in primarily religious terms as offering the means to unite the world and inspire peaceful relations among nations Religious utopianists saw the telegraph as the dawn of a perfect future Religious framing thus dominated the interpretation of the technology's possibilities forging an imaginary of networks as connective so much so that connection is now fundamental to the idea of networks In reality however networks are marked at core by disconnection With lively historical sources and an accessible engagement with critical theory *When the Medium was the Mission* tells the story of how connection was made into the fundamental promise of networks illuminating the power of public Protestantism in the first network imaginaries which continue to resonate today in false expectations of connection
