Focus In Grade 5 Teaching With Curriculum Focal Points:

Focus in Grades 3-5 Amy Mirra, 2008 Focus in Grades 3-5 is part of a series that shows teachers how to incorporate NCTM's Curriculum Focal Points for PreK-8 into their current mathematics curricula. The book provides practical ideas, sample student work, and a sample state math curriculum organised around the focal points. By focusing more intensely on fewer topics at each grade level, students gain a deeper understanding of mathematical ideas. This volume will help teachers think about what a focused curriculum means and how they might begin to build focus into their existing curricula. **Focus**

in Grade 5 Karen C. Fuson, John SanGiovanni, Thomasenia Lott Adams, 2009 One in a series of grade level publications, this is designed to support teachers, supervisors, and coordinators as they begin the discussion of a more focused curriculum across and within prekindergarten through eighth grade as presented in Curriculum Focal Points. Additionally, teacher educators should find it useful as a vehicle for exploring mathematical ideas and curriculum issues involving the grade 5 mathematics curriculum with their preservice teachers. **Focus in Grade 6**, 2010 Focus in Grade 6 Teaching with Curriculum Focal

Points describes and illustrates learning paths for the mathematical concepts and skills of each grade 6 Focal Point as presented in Curriculum Focal Points for Prekindergarten through Grade 8 Mathematics. It includes representational supports for teaching and learning that can facilitate understanding, stimulate productive discussions about mathematical thinking, and provide a foundation for fluency with the core ideas. This book also discusses common student errors and misconceptions, reasons the errors may arise, and teaching methods or visual representations to address the errors. Because learning paths cut across grades, related Focal Points for grades 5 and 7 have been included to describe and clarify prerequisite knowledge and show how the grade 6 understandings build on what went before. Focus in Grade 6, one in a series of grade level publications, is designed to support teachers, supervisors, and coordinators as they develop and refine the mathematics curriculum. **Focus in Grade 4** Jane F. Schielack, 2009 Shows teachers and others how to organise

instruction in grade 4 around the three Focal Points that Curriculum Focal Points identifies for this grade level. Practical suggestions support focusing on developing quick recall of multiplication and division facts and fluency in whole number multiplication, understanding decimals and their connection with fractions, and working with area and the areas of two-dimensional shapes. **Focus in Grade 3** Jane F. Schielack, 2009 The goal of each grade-specific book in the Teaching with Curriculum Focal Points series is to present the mathematics in each of the Focal Points in more detail. Follow an instructional progression from introducing and building concepts to developing depth of understanding to strengthening fluency. **Focus in Grades 6-8** Amy Mirra, 2009 Shows teachers how they can incorporate the Curriculum Focal Points for PreK-8 into their current mathematics curricula. The book provides practical ideas, sample student work, and sample state math curriculum organised around the Focal Points. This volume will help teachers think about what a focused curriculum means and how they might begin to build focus into their existing curriculum. **Teaching Children Mathematics**
