Elisa Bertino, James Joshi, 2009-07-20 CollaborateCom is an annual international forum for dissemination of original ideas and research results in collaborative computing networks systems and applications A major goal and feature of CollaborateCom is to bring researchers from networking systems CSCW collaborative learning and collaborative education areas together CollaborateCom 2008 held in Orlando Florida was the fourth conference of the series and it reflects the accelerated growth of collaborative computing both as research and application areas Concretely recent advances in many computing fields have contributed to the growing interconnection of our world including multi core architectures 3G 4G wi less networks Web 2 0 technologies computing clouds and software as a service just to mention a few The potential for collaboration among various

components has exceeded the current capabilities of traditional approaches to system integration and interoperability. As the world heads towards unlimited connectivity and global computing collaboration becomes one of the fundamental challenges for areas as diverse as eCommerce, eGovernment, eScience and the storage management and access of information through all the space and time dimensions. We view collaborative computing as the glue that brings the components together and also the lubricant that makes them work together. The conference and its community of researchers demonstrate the concrete progress we are making towards this vision. The conference would not have been successful without help from so many people.
