The Civil War and the Transformation of American Citizenship Paul D. Quigley, 2018-06-04 The meanings and practices of American citizenship were as contested during the Civil War era as they are today By examining a variety of perspectives from prominent lawmakers in Washington D C to enslaved women from black firemen in southern cities to Confederate migr s in Latin America **The Civil War and the Transformation of American Citizenship** offers a wide ranging exploration of citizenship s metamorphoses amid the extended crises of war and emancipation Americans in the antebellum era considered citizenship at its most basic level as a legal status acquired through birth or naturalization and one that offered certain rights in exchange for specific obligations Yet throughout the Civil War period the boundaries and consequences of what it meant to be a citizen remained in flux At the beginning of the war Confederates relinquished their status as U S citizens only to be mostly reabsorbed as full American citizens in its aftermath The Reconstruction years also saw African American men acquire at least in theory the core rights of citizenship As these changes swept across the nation Americans debated the parameters of citizenship the possibility of adopting or rejecting citizenship at will and the relative importance of political privileges economic opportunity and cultural belonging Ongoing inequities between races and genders over the course of the Civil War and in the years that followed further shaped these contentious debates **The Civil War and the Transformation of American Citizenship** reveals how war Emancipation and Reconstruction forced the country to rethink the concept of citizenship not only in legal and constitutional terms but also within the context of the lives of everyday Americans from imprisoned Confederates to former slaves

Timelines Lloyd Leon,2025-04-12 Timelines are a fundamental concept that can shape our understanding of personal and collective experiences At their core timelines represent a sequence of events a linear progression from past to future In the context of our lives we often think of timelines as the unfolding of our stories marked by significant milestones decisions and changes Understanding how timelines function helps us recognize patterns in our lives and the world around us particularly when we find ourselves in challenging situations This knowledge becomes even more critical when identifying the signs that indicate we may be entrenched in a darkest timeline

On-Farm Implementation of Transformative Technologies and Practices for Sustainability Transitions in Agriculture Callum Eastwood,Julie Ingram,Alan Renwick, Simon Fielke,Paul Edwards, Margaret Ayre,2025-05-21 There is increased pressure on agri food sectors globally to transition to more sustainable food systems This is a response to ongoing challenges associated with environmental impacts food security workplace attractiveness changing knowledge and advisory systems farmer well being and technological change Transformative technology and practices advocated by scholars and policy makers include digitalization and automation agroecological systems diversification de intensification local food systems circularity transformative value chains and land use change These changed practices ultimately need to be implemented at a farm scale but the implications will ripple through regional and global food systems The potential role of transformative agricultural technologies and practices in sustainability transitions is widely researched However greater focus is required on the real world implications at a farm system level and the positive and negative effects of change in the livelihoods of those being urged to change i e farmers farm businesses and supply chains At the farm level transformation can be a complex process that intersects land livelihoods and security of the wider food supply system As a consequence theoretical concepts of transformation to achieve more sustainable food systems can be difficult to implement for farmers due to unforeseen interactions and implications Better understanding of these experiences is needed for effective and viable transformation options to progress environmental social and economic sustainability

Transdisciplinary Perspectives on Transitions to Sustainability Edmond Byrne,Gerard Mullally,Colin

Sage,2016-06-17 Demonstrating how a university can in a very practical and pragmatic way be re envisioned through a transdisciplinary informed frame this book shows how through an open and collegiate spirit of inquiry the most pressing and multifaceted issue of contemporary societal unsustainability can be addressed and understood in a way that transcends narrow disciplinary work It also provides a practical exemplar of how far more meaningful deliberation understandings and options for action in relation to contemporary sustainability related crises can emerge than could otherwise be achieved Indeed it helps demonstrate how only through a transdisciplinary ethos and approach can real progress be achieved The fact that this can be done in parallel to or perhaps underneath the day to day business of the university serves to highlight how even micro seed initiatives can further the process of breaking down silos and reuniting C P Snow's two cultures after some four centuries of the relentless project of modernity While much has been written and talked about with respect to both sustainability and transdisciplinarity this book offers a pragmatic example which hopefully will signpost the ways others can will and indeed must follow in our common quest for real progress

Youth Media Matters Korina M. Jocson,2018-01-15 In an information age of youth social movements *Youth Media Matters* examines how young people are using new media technologies to tell stories about themselves and their social worlds They do so through joint efforts in a range of educational settings and media environments including high school classrooms youth media organizations and social media sites Korina M Jocson draws on various theories to show how educators can harness the power of youth media to provide new opportunities for meaningful learning and do it together production Describing the impact that youth media can have on the broader culture Jocson demonstrates how it supports expansive literacy practices and promotes civic engagement particularly among historically marginalized youth In *Youth Media Matters* Jocson offers a connective analysis of content area classrooms career and technical education literary and media arts organizations community television stations and colleges and universities She provides examples of youth media work including videos television broadcasts websites and blogs produced in the San Francisco Bay Area Los Angeles New York and St Louis At a time when educators are increasingly attentive to participatory cultures yet constrained by top down pedagogical requirements Jocson highlights the knowledge production and transformative potential of youth media with import both in and out of the classroom

Environment As a Focus for Public Policy Lynton Keith Caldwell,1995 Before the environmental movement had gained prominence in this country one writer began to explore the environment and the human condition as a topic of public policy From 1963 through 1973 Lynton K Caldwell was alone among political scientists and policy analysts in writing about the subject in any breadth or depth His pioneering work led to his role as one of the architects of the National Environmental Policy Act of 1970 and established environmental policy and politics as a field of academic research Caldwell's early work is richly relevant to current understanding of environmental policy This volume brings together the best of his writing from that first decade making it available for policy debates theorizing and reference This collection is of both historical significance and

contemporary relevance and will be invaluable to the many scholars and professionals across various disciplines fields and nations who have read and been profoundly influenced by Caldwell s more recent work including nine widely praised and cited books and dozens of articles The fourteen articles and papers in this volume address the definition of environmental policy analysis of international environmental policy development and environmental policy as a product of and fundamental challenge to modernity An original analytical introduction by the volume editors places Caldwell s early work in the context of the research that has followed Caldwell has written especially for this book a new retrospective chapter a brief introduction to each article and an epilogue on the meaning of environmental policy
