My Second Childhood K. L. Smith, 2025-03-17 *My Second Childhood* is a collection of my random thoughts and memories I have lived through my first childhood and many years of being an adult Everything has seasons in the sun including us The spring summer and fall of my life have passed too quickly I am now living in the winter of my life or as some may call it my second childhood I consider it a blessing to have lived long enough to reach old age It is a gift that everyone does not receive I have released myself from the binding ties of doing what others think I should do I am no longer obligated to employers nor bonded by schedules I have turned the child in me loose to enjoy the last days of my life I am grateful that God has allowed me and my husband of nearly sixty years to enjoy our second childhood together I have time to sit for hours and reminisce and remember moments from my past I have time to analyze stories that were told to me by my ancestors about my family's history I wonder how much of the stories are true and complete Have there been parts of the stories omitted Relatives who have been disowned may not have been included in the accounts of the past We all have secrets and stories that we will never tell What secrets have not been told in these stories Are the stories altered or enhanced to make the past more glorified or sensational There are many questions that I wish I had asked my relatives while they were still alive The answers to these questions will probably go unanswered Over the years I have heard varying accounts of the same stories of our family's history from my younger ancestors Their stories are not congruent with the family history told to me from the lips of my ancestors Their stories do not track with the things that I myself experienced and observed in the presence of my long

deceased relatives I was there in the flesh with some of these relatives I can still close my eyes and see them in my mind s eyes I can still hear their voices in my mind s ears I remember these relatives and what they were like In the pages of this book I have written stories about friends and relatives from my past and present I have written a partial accounting of my family s history according to how it was told to me and from my personal observations and experiences As I get older I find that a lot of things no longer matter It does not matter to me who my relatives were or where they came from All that matters is that I was born and had the privilege of living the four seasons of my life in God s beautiful world Ultimately we are all God s children and brothers and sisters in Christ We are all connected through God **Life To Death** Mann Y

has long been a neglected area of epidemiological research as the traditional focus has been on specific chronic diseases of older life. There is a growing consensus from scientists, research funders and policy makers that ageing itself needs to be studied from an interdisciplinary and life course perspective to inform strategies for reducing the societal and individual costs of an ageing population. A Life Course Approach to Healthy Ageing is a synthesis of life course perspectives in epidemiology and interdisciplinary perspectives in ageing research. It brings together expert investigators of maturing birth cohort and ageing studies, cross-cutting methodologists and authorities in ageing research and knowledge transfer from across the world in one wide-ranging volume. Contributors discuss how aspects of healthy ageing are conceptualised, defined and measured, relate to each other, change across life and are influenced by biological, psychological and social factors operating from early life onwards. They identify research gaps and suggest how evidence from observational studies can be strengthened through improved study design and longitudinal analysis, thereby increasing the research contribution to practice or policy change. The book considers how we might delay or slow down the progressive generalised impairment of function that occurs at the individual, body system and cellular levels as people grow older. It also considers the determinants of wellbeing in older people, including personal fulfilment, positive emotions and social relationships. Broad in scope, discussing topics from genetics to psychological and social wellbeing, A Life Course Approach to Healthy Ageing is a key resource for epidemiologists, social scientists, clinicians, public health physicians, policy makers and practitioners with a research interest in healthy ageing.

Vlachonis, 2014-04-22 Foreword by Gwyneth Paltrow Integrative medical practitioner to the stars and Goop contributor Vicky Vlachonis offers a groundbreaking program to eliminate pain and look and feel your best every day. In *The Body Doesn't Lie: The Three-Step Program to End Chronic Pain and Become Positively Radiant*, Vicky Vlachonis focuses on pain release instead of on pain relief. Back problems, nightly headaches, tight shoulders, achy feet—all of us have nagging daily pains that seem to get worse when our lives get most busy. While the immediate reaction to pain is to take short-term measures to make it go away, this does nothing to address the underlying cause. Vlachonis shows us how to locate the source of our pain, understand its origin and manifestation in the body and then let it go for good using a holistic approach that includes easy-to-implement approaches to diet, exercise and emotional well-being. Vlachonis' proven and successful pain eradication program was developed over years working with a wide range of clients from celebrities and CEOs to overworked ballerinas and working moms. The book includes a detailed meal plan with recipes, body maps to identify areas of pain and healing touch points and step-by-step remedies for specific issues including fatigue, digestive problems and depression. This groundbreaking approach uses pain as a tool, not the undefeatable enemy, to help you look and feel better immediately and release your body from

physical and emotional pain for good
