*Engagement in Online Distance Learning* Ucar, Hasan, Kumtepe, Alper Tolga, 2021-06-25 Motivation is an important factor in and for all education levels. However, as learners in online distance education milieus are away from both teachers and other learners and the learning environments physically, this concept becomes more important for online education. Motivating learners in distance education and keeping their motivation alive throughout the learning process is an issue that should be emphasized and taken care of for teachers and instructional designers. At this point, although there are many approaches, models, and theories regarding enhancing and sustaining motivation and engagement in the education processes, it is seen that there is not enough work on effective and efficient strategies that can be applied in online distance learning environments. *Motivation Volition and Engagement in Online Distance Learning* evaluates motivational obstacles in online distance education, both theoretically and practically, identifies the strengths and weaknesses of the online education environments regarding motivation, and provides actionable motivational and volitional strategies for online educators. This book offers coverage of topics such as learning theories, motivation research, and synchronous online learning environments, making it a valuable resource for researchers, professionals, decision makers, institutions in all education levels, academicians, pre-service teachers, and most importantly, online educators from various disciplines and learners from all educational landscapes.
