## **Empathy In Literature:**

**Empathy and the Novel** Suzanne Keen, 2007-04-19 Does empathy felt while reading fiction actually cultivate a sense of connection leading to altruistic actions on behalf of real others Empathy and the Novel presents a comprehensive account of the relationships among novel reading empathy and altruism Drawing on psychology narrative theory neuroscience literary history philosophy and recent scholarship in discourse processing Keen brings together resources and challenges for the literary study of empathy and the psychological study of fiction reading Empathy robustly enters into affective responses to fiction yet its role in shaping the behavior of emotional readers has been debated for three centuries Keen surveys these debates and illustrates the techniques that invite empathetic response She argues that the perception of fictiveness increases the likelihood of readers empathy in part by releasing them from the guarded responses necessitated by the demands of real others Narrative empathy is a strategy and subject of contemporary novelists from around the world writers who tacitly endorse the potential universality of human emotions when they call upon their readers empathy If narrative empathy is to be taken seriously Keen suggests then women s reading and responses to popular fiction occupy a central position in literary inquiry and cognitive literary studies should extend its range beyond canonical novels In short Keen s study extends the playing field for literature practitioners causing it to resemble more closely that wide open landscape inhabited by readers

**Empathy and Reading** Suzanne Keen, 2022-06-23 This pioneering collection brings together Suzanne Keen s extensive body of work on empathy and reading charting the development of narrative empathy as an area of inquiry in its own right and extending cross disciplinary conversations about empathy evoked by reading The volume offers a brief overview of the trajectory of research following the 2007 publication of Empathy and the Novel with empathy understood as a suite of related phenomena as stimulated by representations in narratives The book is organized around three thematic sections theories empathetic readers and interdisciplinary applications each preceded by a short framing essay The volume features excerpts from the author s seminal works on narrative empathy and makes available her harder to access contributions The book brings different strands of the author s research into conversation with existing debates with the aim of inspiring future interdisciplinary research on narrative empathy This book will be of interest to students and scholars in such fields as literary studies cognitive science emotion studies affect studies and applied contexts where empathetic practitioners work

*Rethinking Empathy through Literature* Meghan Marie Hammond, Sue J. Kim, 2014-07-11 In recent years a growing field of empathy studies has started to emerge from several academic disciplines including neuroscience social psychology and philosophy Because literature plays a central role in discussions of empathy across disciplines reconsidering how literature relates to feeling with others is key to rethinking empathy conceptually This collection challenges common understandings of empathy asking readers to question what it is how it works and who is capable of performing it The authors reveal the exciting research on empathy that is currently emerging from literary studies while also making productive connections to

other areas of study such as psychology and neurobiology While literature has been central to discussions of empathy in divergent disciplines the ways in which literature is often thought to relate to empathy can be simplistic and or problematic The basic yet popular postulation that reading literature necessarily produces empathy and pro social moral behavior greatly underestimates the complexity of reading literature empathy morality and society Even if empathy were a simple neurological process we would still have to differentiate the many possible kinds of empathy in relation to different forms of art All the complexities of literary and cultural studies have still to be brought to bear to truly understand the dynamics of literature and empathy Promises, Pedagogy and Pitfalls: Empathy's Potential for Healing and Harm Pam

Morrison,Quanta Gauld,Veronica Wain,2019-07-22 This volume was first published by Inter Disciplinary Press in 2016 The nature of empathy its potential for healing and harm and its potency to effect change for good or ill at inter personal ecological and global levels are key themes represented in this interdisciplinary volume Section one looks at physiological and philosophical roots of empathy exploring neurological factors as well as the question of human selfhood in relation to the other The notion of wrong empathy then comes under scrutiny where the potential for empathic responses to upturn moral codes is examined This leads into a focus on the written word with exploration of written text and the act of writing on empathic responses The scope is widened in the final sections to focus on ways to teach empathy and potential global effects of expanded empathic awareness Amidst critical challenges facing humanity today it poses the crucial question how can we find more peaceful communion with those whose differences we fear *Literature and Human Rights* Ian Ward,2015-03-10 The idea of human rights is not new But the importance of taking rights seriously has never been more urgent The eighteen essays which comprise *Literature and Human Rights* are written as a contribution to this vital debate Each moreover is written in the spirit of interdisciplinarity reaching across the myriad constitutive disciplines of law literature and the humanities in order to present an array of alternative perspectives on the nature and meaning of human rights in the modern world The taking of human rights seriously it will be suggested depends just as much on taking seriously the idea of the human as it does the idea of rights Literature, Interpretation and Ethics Colin Davis,2024-04-02 *Literature Interpretation and Ethics* argues for the centrality of hermeneutics in the context of ongoing debates about the value and values of literature and about the role and ethics of literary study Hermeneutics is the endeavor to understand the nature of interpretation as it poses vital questions about how we make sense of works of art our own lives other people and the world around us The book outlines the contribution of hermeneutics to literary study through detailed accounts of role of interpretation in the work of key thinkers such as Martin Heidegger Hans Georg Gadamer Paul Ricoeur Umberto Eco Jacques Derrida and Emmanuel Levinas It also illustrates problems of interpretation posed by specific literary texts and films emphasising how our interpretive acts also entail ethical engagements The book develops a hermeneutics of guarded trust which calls for attention to the agency of art without surrendering critical vigilance Through a series of forays into

theoretical texts literary works and films the book contributes to contemporary debates about critical practice and the cultural value Interpretation it suggests is always fallible but it is also essential to our place in the world and to the importance of the humanities

**Empathy and the Strangeness of Fiction** Maria C. Scott,2020-03-02 Explores how and why narrative fiction engages empathy including Theory of MindOffers a broad overview of current scientific work on the effects of fiction reading on empathy including Theory of MindProvides an original intervention in the field of literary theory centring on the reflexive properties of the fictional strangerIncludes stand alone close readings of three novels by important French authorsThis book studies recent psychological findings which suggest that reading fiction cultivates empathy encouraging us to be critically reflective suspicious readers as well as participatory nave readers Scott draws on literary theory and close readings to argue that engagement with fictional stories also teaches us to resist uncritical forms of empathy and reminds us of the limitations of our ability to understand other people The book treats figures of the stranger in Balzac s La Fille aux yeux d or Stendhal s Le Rouge et le Noir and Sand s Indiana as emblematic of the strangeness of narrative fiction both drawing us in and keeping us at a distance

*Empathy in the Reading and Teaching of English Literature* Lauren A. Weber,2025-08-05 Empathy in the Reading

and Teaching of Literature explores the educational potential of empathy for literary studies across a historical generic and geographic continuum. The book draws on interdisciplinary methodologies to offer new readings of popularly taught literary texts and discuss their relation to empathy. As a result, the book resists neoliberalism's commodification of empathy and makes recommendations for the future of the teaching of literature at school and university. The book begins by providing a theoretical and historical overview of empathy as a term and educational tool in the English speaking context. The first two chapters lay the groundwork for the remaining close reading chapters by introducing two new terms: pop empathy and empathic education. I argue that pop empathy is defined by neoliberalism and the commodification of empathy in marketing, advertising, politics, and artificial intelligence, and that this is impacting the rhetoric of contemporary educational policy in Australia and the United States. Empathic education is defined by educational theory and practice where the experience of empathy is foregrounded as a form of knowledge creation or acquisition. I draw pop empathy and empathic education into conversation throughout the book and use both terms to assist my argument that a complex approach to empathy for literary studies may benefit classroom teaching and learning by resisting over-systematised education. The remaining chapters of the book offer four unique approaches to empathic literary criticism informed by interdisciplinary methodologies including educational theory, cognitive science, the philosophy of psychology, and literary studies. Chapters 3, 4, 5, and 6 provide readings of texts frequently prescribed for English literary study belonging to different genres: Shakespeare's *Hamlet*, the poetry of John Keats, the short stories *A Good Man Is Hard to Find* and *Everything That Rises Must Converge* by Flannery O'Connor, and Mark Haddon's novel *The Curious Incident of the Dog in the Night-Time*. Each chapter engages with the text's historical educational context and its contemporary relation to empathy while offering fresh close readings by applying a critical empathy lens. As a result, these chapters complicate and contribute to debates about the empathic value of subject English. I show how the authors and texts studied bear the mark of empathic education and as a result, they offer unique impressions of empathy's make-up and capabilities. Through my readings, I show how empathy has consistently featured in literary studies across time periods and genres while complicating popular rhetorical uses of empathy. I address this wide scope of historical and generic texts as they relate to the current educational landscape because I argue for a new approach to integrating empathy into subject English that privileges empathy as a form of critical interpretation rather than a student outcome.
