## **Enchanted Objects Enchanted Objects:**

*Enchanted Objects* Allan Hepburn, 2010-01-01 *Enchanted Objects* investigates the relationship between visual art and contemporary fiction addressing the problems that arise when paintings, books, porcelains or statues are represented in contemporary novels. The distinction between objects and art objects depends on aesthetics. While some objects are authenticated through museum exhibits, others are hidden, broken, neglected, coveted, hoarded or salvaged. Allan Hepburn asks four broad questions about aesthetics and value: What is a detail in visual art? Is all art ornamental? Does the value of an object increase because it is fragile? What defines ugliness? Contemporary novels such as Tracy Chevalier's *Girl with a Pearl Earring*, Barry Unsworth's *Stone Virgin* and Bruce Chatwin's *Utz* offer implicit answers to these questions while critiquing museums and the determination to invest objects with value through display. Addressing current debates in museum studies, cultural studies, art history and literary criticism, *Enchanted Objects* develops an extensive theory of how contemporary literature engages with and relates to aesthetic objects.

*Enchanted Objects* David Rose, 2015-04-28 We are now standing at the precipice of the next transformative development: the Internet of Things. Soon, connected technology will be embedded in hundreds of everyday objects we already use: our cars, wallets, watches, umbrellas, even our trash cans. These objects will respond to our needs, come to know us and learn to think on our behalf. David Rose calls these devices, which are just beginning to creep into the marketplace, *Enchanted Objects*. Some believe the future will look like more of the same: more smartphones, tablets, screens embedded in every conceivable surface. Rose has a different vision: technology that atomizes, combining itself with the objects that make up the very fabric of daily living. Such technology will be woven into the background of our environment, enhancing human relationships and channeling desires for omniscience, long life and creative expression. The enchanted objects of fairy tales and science fiction will enter real life. Groundbreaking, timely and provocative, *Enchanted Objects* is a blueprint for a better future where efficient solutions come hand in hand with technology that delights our senses.

**Magical Objects** Elmar Schenkel, Stefan Welz, 2007 [The Long Life of Magical Objects](#) Allegra Iafrate, 2020-01-17 This book explores a series of powerful artifacts associated with King Solomon via legendary or extracanonical textual sources. Tracing their cultural resonance throughout history, art historian Allegra Iafrate delivers exciting insights into these objects and interrogates the ways in which magic manifests itself at a material level. Each chapter focuses on a different Solomonic object: a ring used to control demons, a mysterious set of bottles that constrain evil forces, an endless knot or seal with similar properties, the shamir known for its supernatural ability to cut through stone, and a flying carpet that can bring the sitter anywhere he desires. Taken together, these chapters constitute a study on the reception of the

figure of Solomon but they are also cultural biographies of these magical objects and their inherent aesthetic morphological and technical qualities Thought provoking and engaging Iafra's study shows how ancient magic artifacts live on in our imagination in items such as Sauron's ring of power Aladdin's lamp and the magic carpet It will appeal to historians of art religion folklore and literature

*New Romantic Cyborgs* Mark Coeckelbergh,2017-02-24 An account of the complex relationship between technology and romanticism that links nineteenth century monsters automata and mesmerism with twenty first century technology s magic devices and romantic cyborgs Romanticism and technology are

widely assumed to be opposed to each other Romanticism understood as a reaction against rationalism and objectivity is perhaps the last thing users and developers of information and communication technology ICT think about when they engage with computer programs and electronic devices And yet as Mark Coeckelbergh argues in this book this way of thinking about technology is itself shaped by romanticism and obscures a better and deeper understanding of our relationship to technology Coeckelbergh describes the complex relationship between technology and romanticism that links nineteenth century monsters automata and mesmerism with twenty first century technology s magic devices and romantic cyborgs Coeckelbergh argues that current uses of ICT can be interpreted as attempting a marriage of Enlightenment rationalism and romanticism He describes the romantic dialectic when this new kind of material romanticism particularly in the form of the cyborg as romantic figure seems to turn into its opposite He shows that both material romanticism and the objections to it are still part of modern thinking and part of the romantic dialectic Reflecting on what he calls the end of the machine Coeckelbergh argues that to achieve a more profound critique of contemporary technologies and culture we need to explore not only different ways of thinking but also different technologies and that to accomplish the former we require the latter
