**Investing in Enchantment** Michelle Janning,2024-08-06 Should we keep the family cabin or list it on Airbnb U S second homes are formally classified as investment properties used primarily for financial gain or vacation homes primarily reserved for personal use but what have families actually been doing with them before during and after COVID 19 lockdowns Today s desire for authenticity and family connectedness has made family vacation homes a compelling site to examine how we think of labor and leisure whom we include as family members and neighbors and how all of this is represented both spatially and materially Framed as a magical place for family members to look back on nostalgically the family vacation home remains an enchanted and memory filled site that is artificially removed from the marketplace even if it is rented to others for their family vacations It is meant to be a magical escape from the challenges of work and family stress politics and social inequalities In reality the family vacation home requires labor has financial value as a piece of family wealth and the magic is not accessible to all In Investing in Enchantment Michelle Janning tells a new story about the cultural meanings and structural outcomes surrounding family vacation homes today [AI in eHealth](#) Marcelo Corrales

Compagnucci,Michael Lowery Wilson,Mark Fenwick,Nikolaus Forgó,Till Bärnighausen,2022-09-15 The emergence of digital platforms and the new application economy are transforming healthcare and creating new opportunities and risks for all stakeholders in the medical ecosystem Many of these developments rely heavily on data and AI algorithms to prevent diagnose treat and monitor diseases and other health conditions A broad range of medical ethical and legal knowledge is now required to navigate this highly complex and fast changing space This collection brings together scholars from medicine and law but also ethics management philosophy and computer science to examine current and future technological policy and regulatory issues In particular the book addresses the challenge of integrating data protection and privacy concerns into the design of emerging healthcare products and services With a number of comparative case studies the book offers a high level global and interdisciplinary perspective on the normative and policy dilemmas raised by the proliferation of information technologies in a healthcare context

Current Problems and Ways of Industry Development: Equipment and Technologies Olga G. Shakirova, Oleg V. Bashkov, Akhmet A. Khusainov, 2021-04-28. This book is a reflection of the modern scientific view of current and future problems and prospects of industry development equipment and technologies. It combines the results of advanced researches of industry development equipment and technologies in the field of various sciences both technical and humanitarian, the synthesis of which allowed forming a holistic meta-scientific concept of industry development equipment and technologies. The book consists of two parts. The first part reflects technical problems and ways of industry development equipment and technologies. It examines the promising technologies for modern industrial development, the technogenic factors of neo-industrialization in the context of digital economy, strategic guidelines for the industry development equipment and technologies from the standpoint of sustainable development as well as integration mechanisms for the industry development equipment and technologies and scientific support for their activation. In the second part, organizational and managerial problems and ways of industry development equipment and technologies are disclosed. The industry development equipment and technologies were studied from a view from the standpoint of economics and management, legal barriers to the industry development equipment and technologies and the prospects for overcoming them, the impact of globalization on the industry development equipment and technologies and recommendations for managing internationalization as well as social issues of industry development equipment and technologies in the aspect of human resources training and management. The book combines the best works presented at the International Research and Practice Conference Actual Problems and Ways of Industry Development Equipment and Technologies organized by the Komsomolsk on Amur State University and the Institute of Scientific Communications and held in Komsomolsk on Amur, Russia, September 28-October 1, 2020. The target audience of the book is academic scientists studying issues of industry development equipment and technologies as well as industrial enterprises and government regulators of industry development equipment and technologies.

**Bored, Lonely, Angry, Stupid** Luke Fernandez, Susan J. Matt, 2020-07-07. An Entrepreneur Best Book of the Year. Facebook makes us lonely. Selfies breed narcissism. On Twitter, hostility reigns. Pundits and psychologists warn that digital technologies substantially alter our emotional states, but in this lively investigation of changing feelings about technology, we learn that the gadgets we use don't just affect how we feel; they can profoundly change our sense of self. When we say we're bored, we don't mean the same thing

as a Victorian dandy Could it be that political punditry has helped shape a new kind of anger Luke Fernandez and Susan Matt take us back in time to consider how our feelings of loneliness boredom vanity and anger have evolved in tandem with new technologies Technologies have been shaping our emotional culture for more than a century argue computer scientist Luke Fernandez and historian Susan Matt in this original study Marshalling archival sources and interviews they trace how norms say around loneliness have shifted with technological change Nature A powerful story of how new forms of technology are continually integrated into the human experience Publishers Weekly *Internet of Things* Nasreddine Bouhaï, Imad Saleh, 2017-11-29 The development of connected communicating objects is showing no signs of slowing down With an increasing number of objects available on the market the evolution of the Internet of Things is leading to more and more fields being explored via information and communication sciences This book analyzes the ecosystem of the Internet of Things by retracing the historical and technological context of the Internet's evolution from traditional to dynamic social and semantic and then towards this ecosystem of connected objects The evolution of concepts surrounding the Internet of Things is explored via real life examples of connected objects both those used for specific functions and for more general everyday objects Numerous issues associated with these new technological and digital transformations in a hyperconnected world as well as the impact of the massive influx of connected objects are discussed The crucial questions of potential intrusion into the private lives of users as well that of security are then studied Leaders Make the Future, Third Edition Bob Johansen, Jeremy Kirshbaum, Gabe Cervantes, 2025-03-04 In a world of chaos how can generative AI help leaders lead Over the next decade all leaders will be augmented with some form of generative artificial intelligence or GenAI For the best leaders this will mean dramatic improvement For mediocre leaders this will mean persistent confusion distraction and pretense With futureback thinking looking ten years ahead then planning backward from future to next to now this third edition of Leaders Make the Future shows how people can improve their leadership skills while expanding their human perspective Now 75 percent revised and expanded with resources from the Institute for the Future this new edition is organized around ten future leadership skills Augmented futureback curiosity Augmented clarity Augmented dilemma flipping Augmented bio engaging Augmented immersive learning Augmented depolarizing Augmented commons creating Augmented smart mob swarming Augmented strength with humility Human calming AI augmented leadership will be key for any organization to tackle the uncertainty of the future And by incorporating practical methodologies ethical guidelines and innovative leadership practices this book will help leaders develop their clarity and moderate their certainty Solving Critical Design Problems Tania Allen, 2019-06-06 Solving Critical Design Problems demonstrates both how design is increasingly used to solve large complex modern day problems and as a result how the role of the designer continues to develop in response With 13 case studies from various fields including program and product design Tania Allen shows how types of design thinking such as systems thinking metaphorical thinking and empathy can be used together with methods

such as brainstorming design fiction and prototyping This book helps you find ways out of your design problems by giving you other ways to look at your ideas so that your designs make sense in their setting Solving Critical Design Problems encourages a design approach that challenges assumptions and allows designers to take on a more critical and creative role With over 100 images this book will appeal to students in design studios industrial and product design as well as landscape and urban design

**Operations Strategy** Nigel Slack, Michael Lewis, 2019 Operations strategy is a major source of competitive advantage in for profit businesses and the route to achieving social welfare in not for profit enterprises No matter what sector it can have a huge impact not just in the short term but also on an enduring basis

Startup Your Life Anna Akbari, 2016-12-27 A young entrepreneur and sociologist shows readers how to reach personal fulfillment using the same strategies that power Silicon Valley's greatest startups As an entrepreneur Anna Akbari learned that one of the best things about startups is their ability to pivot quickly basically a euphemism for failing and starting over And she quickly found that personal success is no different It's not just about developing and following the right process but also having a good idea And that demands rigor and daily maintenance far beyond a few positive affirmations Like any Silicon Valley startup the business of life is not as glamorous as its Instagram account would make it seem What do you do when planning is not an option When control is out of your reach You isolate the small stuff experiment constantly and use the results to lay a more sustainable foundation for the future You validate your idealized vision by testing it out in bite sized increments You see what sticks integrate and move forward And inevitably you experience a series of failures along the way but those failures are key to your next success Living a start up life is about maximizing flexibility and measuring on going results not

avoiding failure or reaching one particular end goal It s about embracing defeat analyzing it and failing up In Startup Your Life Akbari shows that after all it s often the stumbles that pave the way for real happiness      **Essentials of Operations**

Batteau,Christine Z. Miller,2025-02-11 This book provides a critical perspective on technology answering the questions of why technologies often disappoint It takes a sociotechnical and historical perspective on technology as developed by an engineer anthropologist and a design anthropologist to answer questions not only about why modern societies have great expectations of technology but also of why these technologies often fail to meet expectations Modern societies often search for technological solutions technofixes to what are institutional problems which include border crossings or urban mobility or improvements in productivity or improved communication It is disappointing when technofixes whether border walls or driverless cars or social media fail to live up to their promises of greater personal autonomy such as afforded by driverless cars or improved social harmony through social media Examining technology from the perspectives of instrumentality tools identity totems and world defining systems totalities develops a comprehensive perspective that is at once historically informed and cross culturally accurate Although instrumentality is obvious and is at the core of any understanding of technology identity is less so yet many modern tribes create their identity in terms of technological objects and systems whether transport systems cars and airplanes or social media or weapons guns Further modern technologies span the globe so that they exert imperative coordination over distant populations the use of cell phones around the world is testimony to this fact Such a critical perspective on technology can be useful in policy discussions of numerous issues affecting contemporary institutions      *Innovative Manufacturing Engineering and Energy* Angelos Markopoulos,2024-12-15 The key
