Encountering China Rachana Sachdev, Qingjun Li, 2012 *Encountering China* addresses the responses of early modern travelers to China who awed by the wealth and sophistication of the society they encountered attempted primarily to build bridges to explore similarities and to emulate the Chinese though they were also critical of some local traditions and practices Contributors engage critically with travelogues treating them not just as occasional sources of historical information but as primary literary texts deeply revelatory of the world they describe Contributors reach back to the earliest European writings available on China in an effort to broaden and nuance our understanding of European contact with the Middle Kingdom in the early modern period While the primary focus of these essays is the external gaze European sources about China contributors also tease out aspects of the Chinese world view of the time thus generating a conversation between Chinese literary and historical texts and European ones *The Great Encounter of China and the West, 1500-1800* D. E. Mungello, 2005-04-14 In the twenty first century China has emerged as the leading challenger to U S global dominance China is often seen as a sleeping giant emerging out of poverty backwardness and totalitarianism and moving toward modernization However history shows that this vast country is not newly awakening but rather returning to its previous state of world eminence With this compelling perspective in mind D E Mungello convincingly shows that contemporary relations between China and the West are far more like the 1500 1800 period than the more recent past This fully revised second edition retains the clear and concise qualities of its predecessor while developing important new social and cultural themes such as gender sexuality music and technology Drawing from the author s thirty years of experience teaching world history this book illustrates the importance of history to students and general readers trying to understand today s world The Great Encounter of China and the West, 1500-1800 D. E. Mungello, 1999-08-25 For too long the history of contract between China and the West has been portrayed as a one sided encounter Europeans were said to have discovered China while Chinese responses to the West went largely unnoticed **The Great Encounter of China and the West, 1500-1800** David Emil Mungello, 2013 For the Chinese the drive toward growing political and economic power is part of an ongoing effort to restore China s past greatness and remove the lingering memories of history s humiliations This widely praised book explores the 1500 1800 period before China s decline when the country was viewed as a leading world culture and power Europe by contrast was in the early stages of emerging from provincial to international status while the United States was still an uncharted wilderness D E Mungello argues that this earlier era ironically may contain more relevance for today than the more recent past This fully revised fourth edition retains the clear and concise quality of its predecessors while drawing on a wealth of new research on Sino Western history and the increasing contributions of Chinese historians Building on the author s decades of research and teaching this compelling book illustrates the vital importance of history to readers trying to understand China s renewed rise China s renewed rise China s renewed rise China s renewed rise *China in European*

China Through European Eyes: 800 Years Of Cultural And Intellectual Encounter Kerry Brown, Gemma Cheng, Deng, 2022-03-04 China Through European Eyes provides a reader's perspective on the conceptualisation of China by Europeans over the last 800 years With annotated excerpts of their key China related writings by influential figures such as Voltaire Ricci Leibniz Montesquieu Marx Weber Hegel Barthes and Kristeva this collection brings together the visions and ideas of individuals who had a unique impact upon European culture The views within range wildly as the authors wrestle with what sense to make of China's cultural and social difference to their lives in the West conceptualising China as a place of threat otherness exoticism but also inspiration This important selection allows for comparison of perspectives across different times in Europe allowing readers to map out continuities and evolutions of attitudes towards China It shows that contemporary European attitudes towards China have deep roots With an extensive introduction full bibliography and widespread annotations on original texts this book will be of interest to anyone engaged with the role of China in the world today particularly those interested in how the crucial relationship between China and Europe developed over time

The Emergence of Civilizational Consciousness in Early China Uffe Bergsten, 2018-12-17 This book provides a conceptual history of the emergence of civilizational consciousness in early China Focusing on how words are used in pre-Qin before 221 BCE texts to construct identities and negotiate relationships between a civilised self and uncivilised others it provides a re-examination of the origins and development of these ideas By adopting a novel approach to determining when civilizational consciousness emerged in pre-Qin China this book analyzes this question in ways that establish a fresh hermeneutical dialogue between Chinese and modern European understandings of civilization Whereas previous studies have used archaeological data to place its origin somewhere between 3000 BCE and 1000 BCE this book explores changes in word meanings in texts from the pre-Qin period to reject this view Instead this book dates the emergence of civilizational consciousness in China to around 2500 years ago In the process new chronologies of the coining of Old Chinese terms such as customs barbarians and the Great ones are proposed which challenge anachronistic assumptions about these terms in earlier studies Examining important Chinese classics such as the Analects the Mencius and the Muzi as well as key historical periods and figures in the context of the concept of civilization this book will be useful to students and scholars of Chinese and Asian history

In contrast to the economic and cultural dominance by the south and the east coast over the past several centuries influence in China in the early Middle Ages was centered in the north and featured a significantly multicultural society Many events that were profoundly formative for the future of East Asian civilization occurred during this period although much of this multiculturalism has long been obscured due to the Confucian monopoly of written records Multicultural China in the Early Middle Ages endeavors to expose a number of long hidden non Sinitic characteristics and manifestations of heritage some lasting to this very day Sanping Chen investigates several foundational aspects of Chinese culture during this period including the legendary unicorn and the fabled heroine Mulan to determine the origin and development of the lore His meticulous research yields surprising results For instance he finds that the character Mulan is not of Chinese origin and that Central Asian influences are to be found in language religion governance and other fundamental characteristics of Chinese culture As Victor Mair writes in the Foreword While not everyone will acquiesce in the entirety of Dr Chen's findings no reputable scholar can afford to ignore them with impunity These foreign origin elements were largely the legacy of the Tuoba whose descendants in fact dominated China's political and cultural stage for nearly a millennium Long before the Mongols the Tuoba set a precedent for using the civilized to rule the civilized by attracting a large number of sedentary Central Asians to East Asia This not only added a strong pre Islamic Iranian layer to the contemporary Sinitic culture but also commenced China's golden age under the cosmopolitan Tang dynasty whose nominally Chinese ruling house is revealed by Chen to be the biological and cultural heir of the Tuoba [A Sketch of Chinese History, Ancient and Modern](#): Karl Friedrich August Gützlaff, 1834 China is daily becoming more and more an object of interest and curiosity to European nations in proportion as commerce the fore runner if not the cause of all improvement in the arts of civilization discloses its resources and sheds new light on the character and intellectual cultivation of its inhabitants Hitherto the remoteness of its situation with respect to
