**Frontiers in Clinical Drug Research - CNS and**

**Neurological Disorders** Atta-ur-Rahman, 2013-10-11 *Frontiers in Clinical Drug Research CNS and Neurological Disorders* is an ebook series that brings updated reviews to readers interested in advances in the development of pharmaceutical agents for the treatment of central nervous system CNS and other nerve disorders. The scope of the ebook series covers a range of topics including medicinal chemistry, pharmacology, molecular biology, and biochemistry of contemporary molecular targets involved in neurological and CNS disorders. Reviews presented in the series are mainly focused on clinical and therapeutic aspects of novel drugs intended for these targets. *Frontiers in Clinical Drug Research CNS and Neurological Disorders* is a valuable resource for pharmaceutical scientists and postgraduate students seeking updated and critical information for developing clinical trials and devising research plans in the field of neurology. The second volume of this series features 8 chapters that cover a variety of topics including treatment of multiple sclerosis and schizophrenia, neurochemistry of tremors, relationship between GABA and Alzheimer's disease, therapy, relationship between neurological diseases and cancer, research on angiogenesis, related blindness. *Physical Management in Neurological Rehabilitation* Maria Stokes, 2004. Building upon the success of the first edition of this popular book, the new edition of *Physical Management in Neurological Rehabilitation* has been completely updated and revised to reflect changes in practice today. The authors consider the theoretical basis and scientific evidence of effective treatment, taking a multidisciplinary problem-solving approach to patient management which involves patients and carers in goal setting and decision making. Book jacket

The Right Therapy for Neurological Disorders E. Beghi, G. Logroscino, 2016-07-26. Most neurological disorders are chronic and aging related. With the increase of life expectancy, their incidence and prevalence will grow in the decades to come, which in turn will increase the load on medical and social systems worldwide. There is thus a desperate need for successful preventive and therapeutic measures based on randomized clinical trials (RCTs) conducted by independent organizations. This book provides a compendium relating most of the principles of reliable RCTs to specific neurological diseases. Contributed by specialized neurologists, the articles touch on important aspects of RCTs with a clear critical approach, highlighting their limitations as well as giving recommendations for their planning and conducting to address the variable genotypic and phenotypic aspects of neurological conditions. Consideration is also given to combining the clinical impact of the study results with patients' values and the interests of pharmaceutical companies. Neurologists involved in clinical trials will certainly benefit from this book, which should become a basic text for all neurological courses dealing with evidence-based neurology.

*Apheresis in Neurological Disorders* Johannes Dorst, 2020-12-03. Apheresis refers to an extracorporeal therapy which aims at removing pathological constituents from the patient's blood. Due to the development of new techniques as well as the discovery of novel autoimmune antibodies, it is increasingly recognized as an important therapeutic option for a variety of autoimmune-mediated neurological disorders, including multiple sclerosis, myasthenia gravis, autoimmune encephalitis, Guillain-Barré syndrome, and many others. Therapeutic plasma exchange (TPE) constitutes the standard method of apheresis for

most indications while immunoadsorption IA offers a more specific low risk alternative Both methods aim at removing auto antibodies from the blood Evidence for most neurological diseases is still low Interestingly more recent developments suggest that apheresis is not limited to the removal of autoantibodies but may also be useful in neurodegenerative and possibly even in acute vascular disorders
